Why Sleep Mood?

Sleep is a cornerstone of mental wellness, directly affecting mood, stress levels, focus, and overall well-being. By integrating a sleep mode, the app addresses a critical user need, offering tailored tools like **calming soundscapes, bedtime stories, and progress tracking** to improve sleep quality. Helping users establish healthier sleep habits enhances their mental clarity, reduces anxiety, and fosters consistent engagement with wellness practices. Sleep mode **bridges** the gap between **relaxation** and **routine**, making the app a comprehensive tool for holistic mental health support.

Emma's Scenario:

After a long day at work, Emma feels mentally drained but struggles to unwind. She opens the app, selects her favorite ocean wave **soundscape**, and listens to a 10-minute bedtime story while lying in bed. A gentle **reminder** nudges her to put her phone aside, helping her fall asleep without **interruptions**. Over time, she notices improved energy levels and **reduced stress**, motivating her to consistently use the app for sleep and **overall wellness**.

Goals

1. Improve sleep quality to wake up feeling refreshed and ready for the day.
2. Establish a consistent bedtime routine that helps her unwind from work stress.
3. Reduce nighttime anxiety and create a sense of calm.
4. Track her progress to see how her sleep impacts her mental wellness.

Barriers

1. Inconsistent routines due to unpredictable work hours.
2. Skepticism about whether an app can genuinely help with sleep.
3. Overwhelmed by features—she prefers simplicity.
4. Difficulty creating new habits that stick.

Emma Taylor, 29,
Marketing Specialist

Elevator Pitch

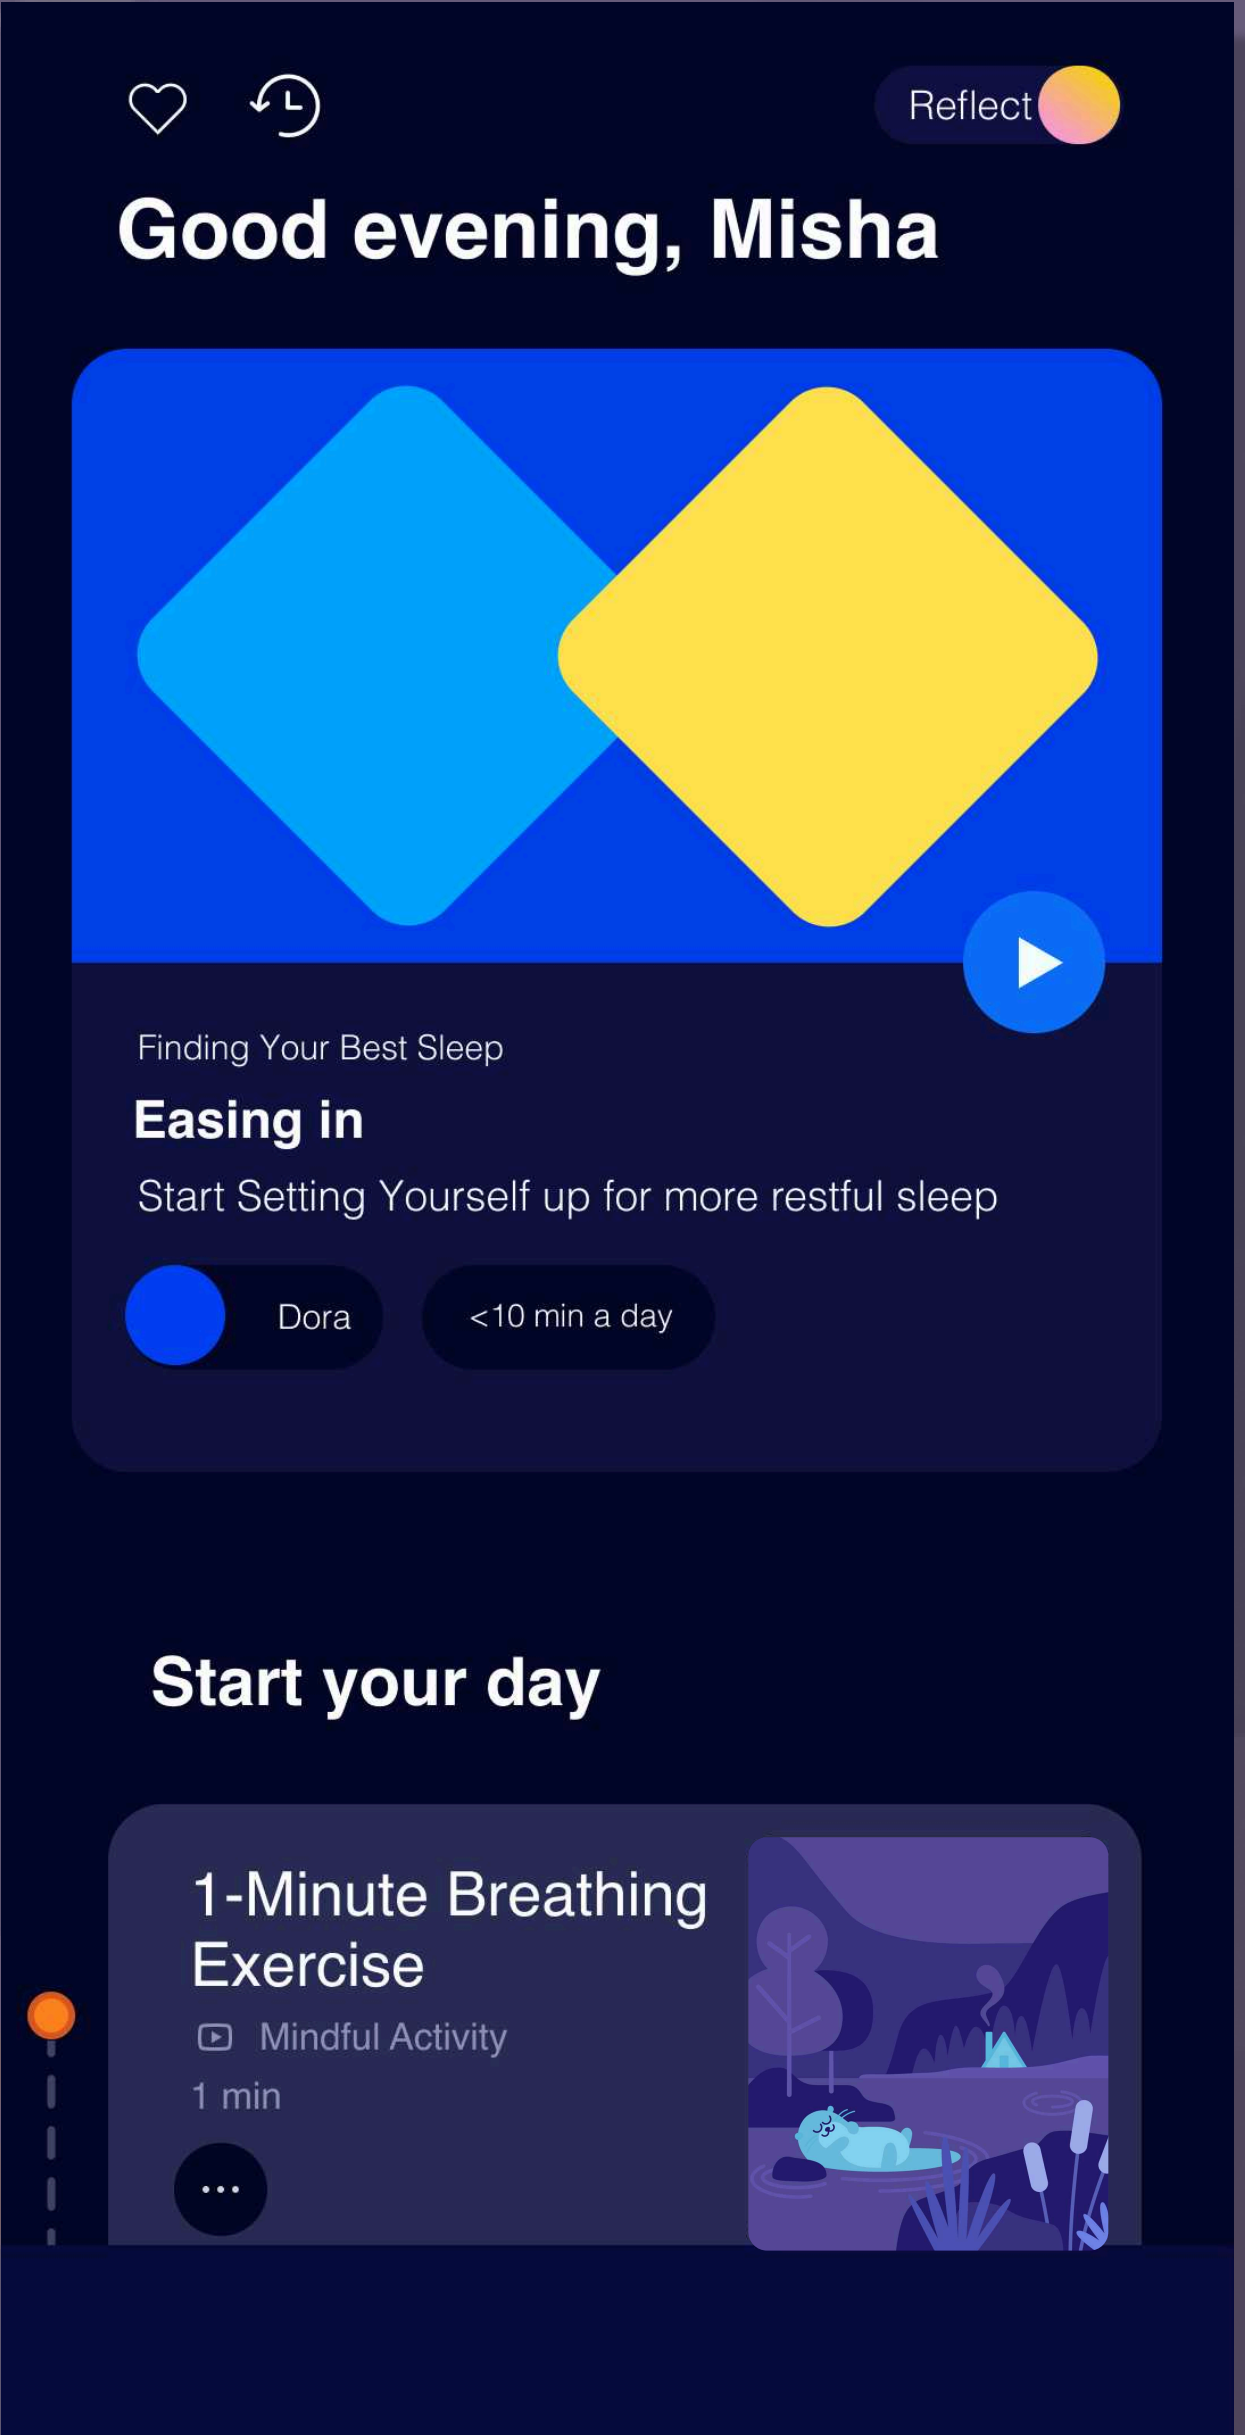

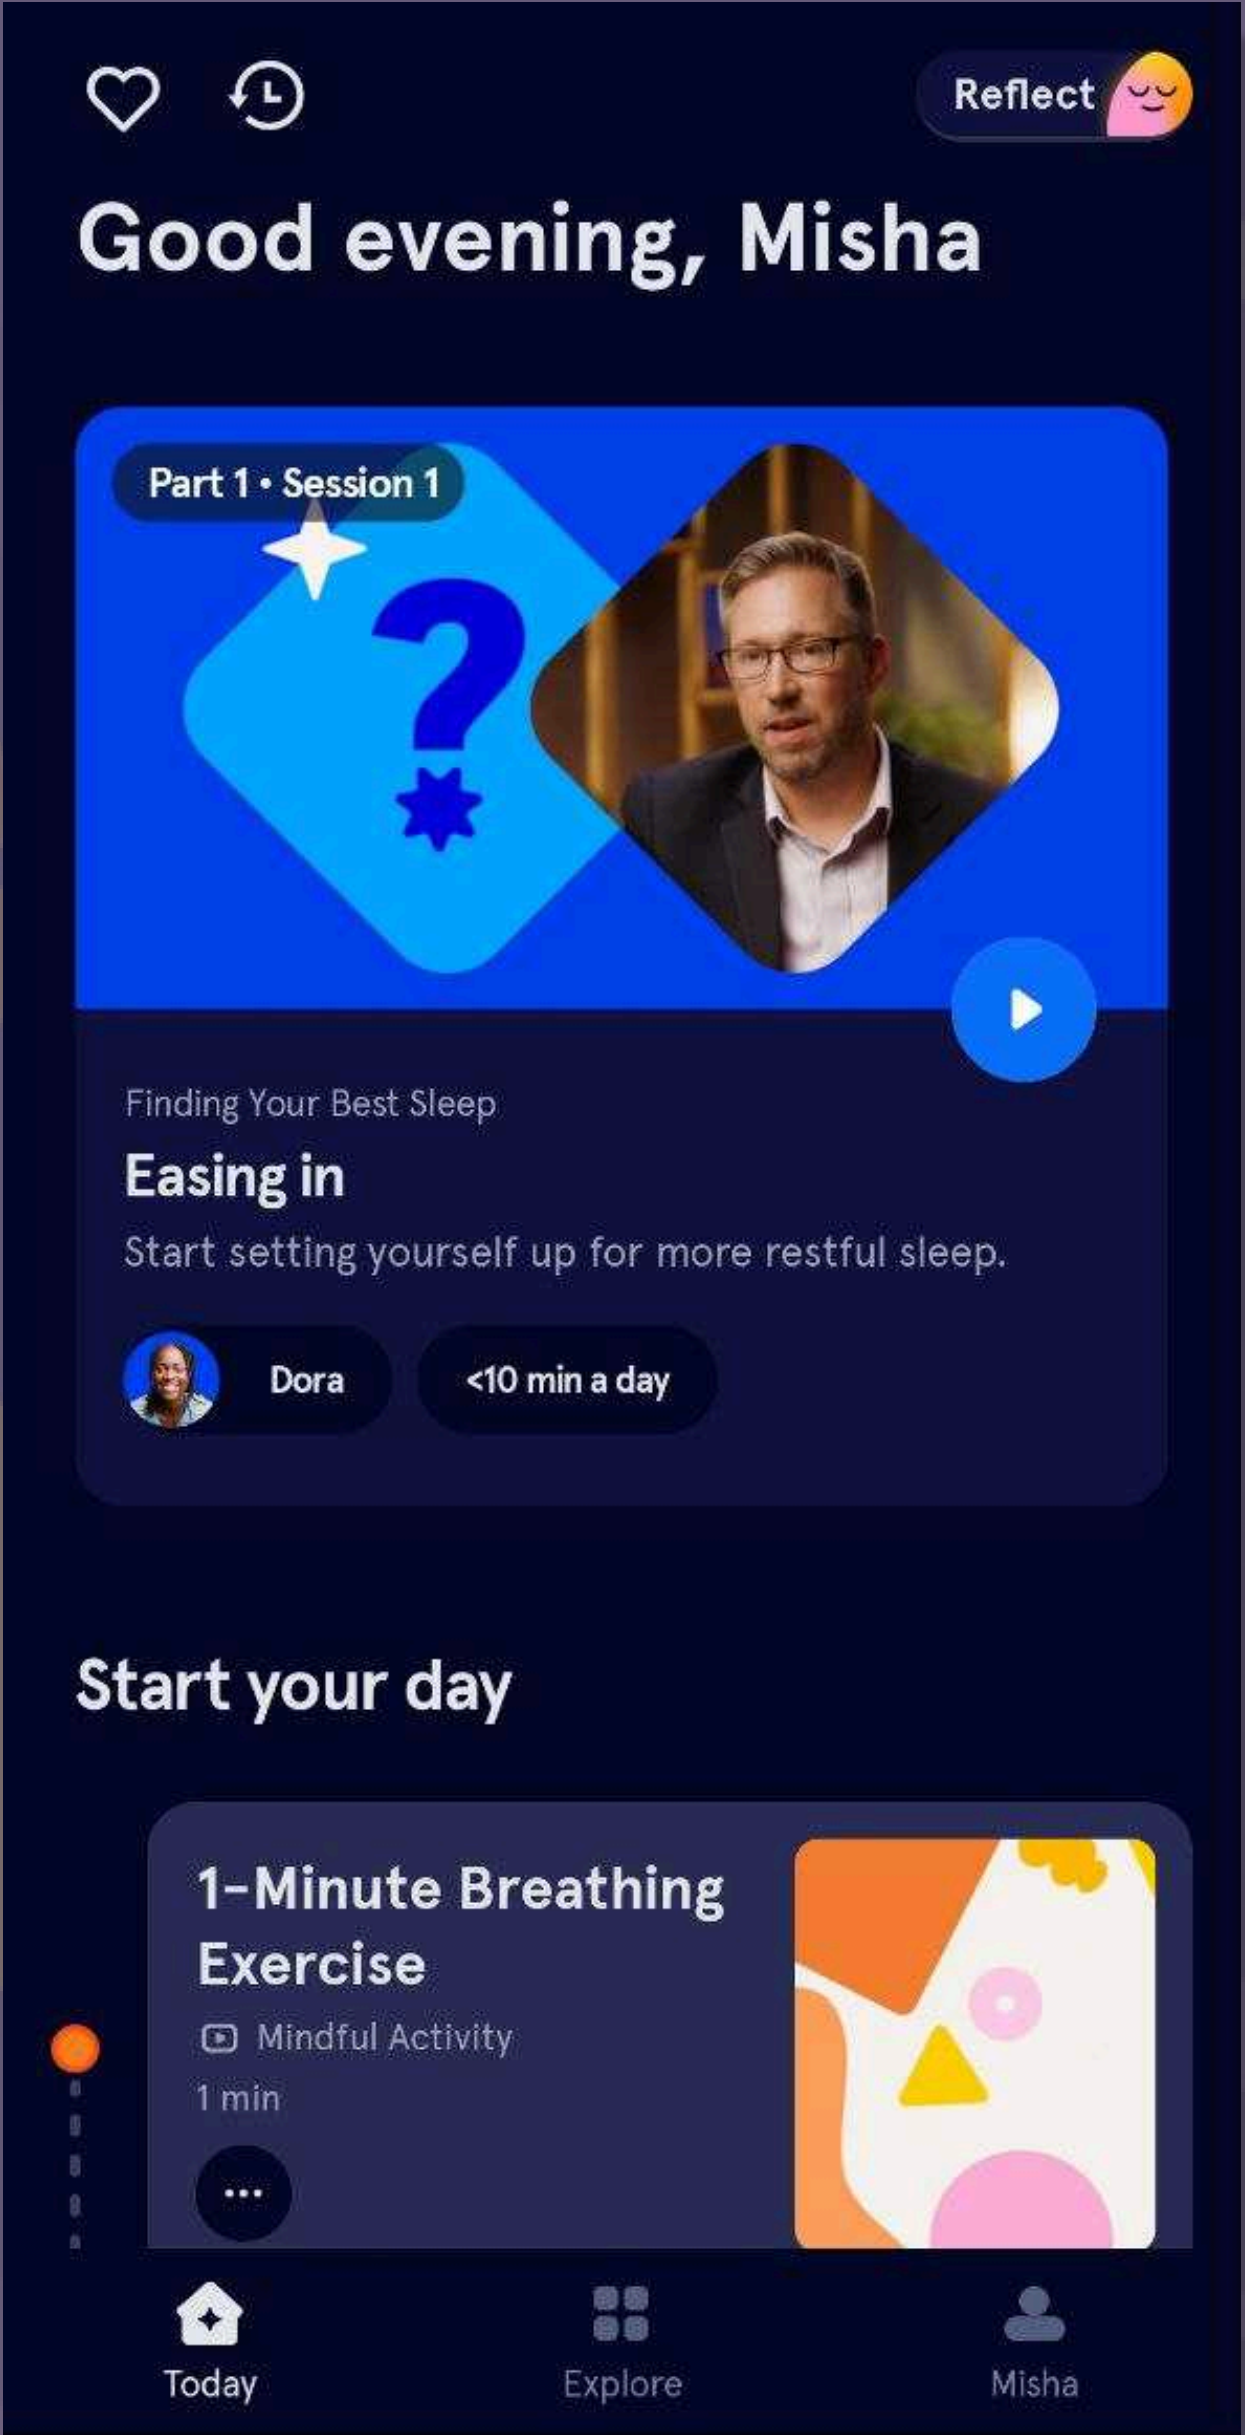

"Struggling to unwind and get quality sleep? Our app's Sleep Mode offers personalized bedtime stories, soothing soundscapes, and tools to help you establish a consistent nighttime routine. By improving sleep quality, you'll wake up refreshed and ready to tackle the day while enhancing your overall mental wellness. It's simple, calming, and tailored just for you—because better sleep means a better you."

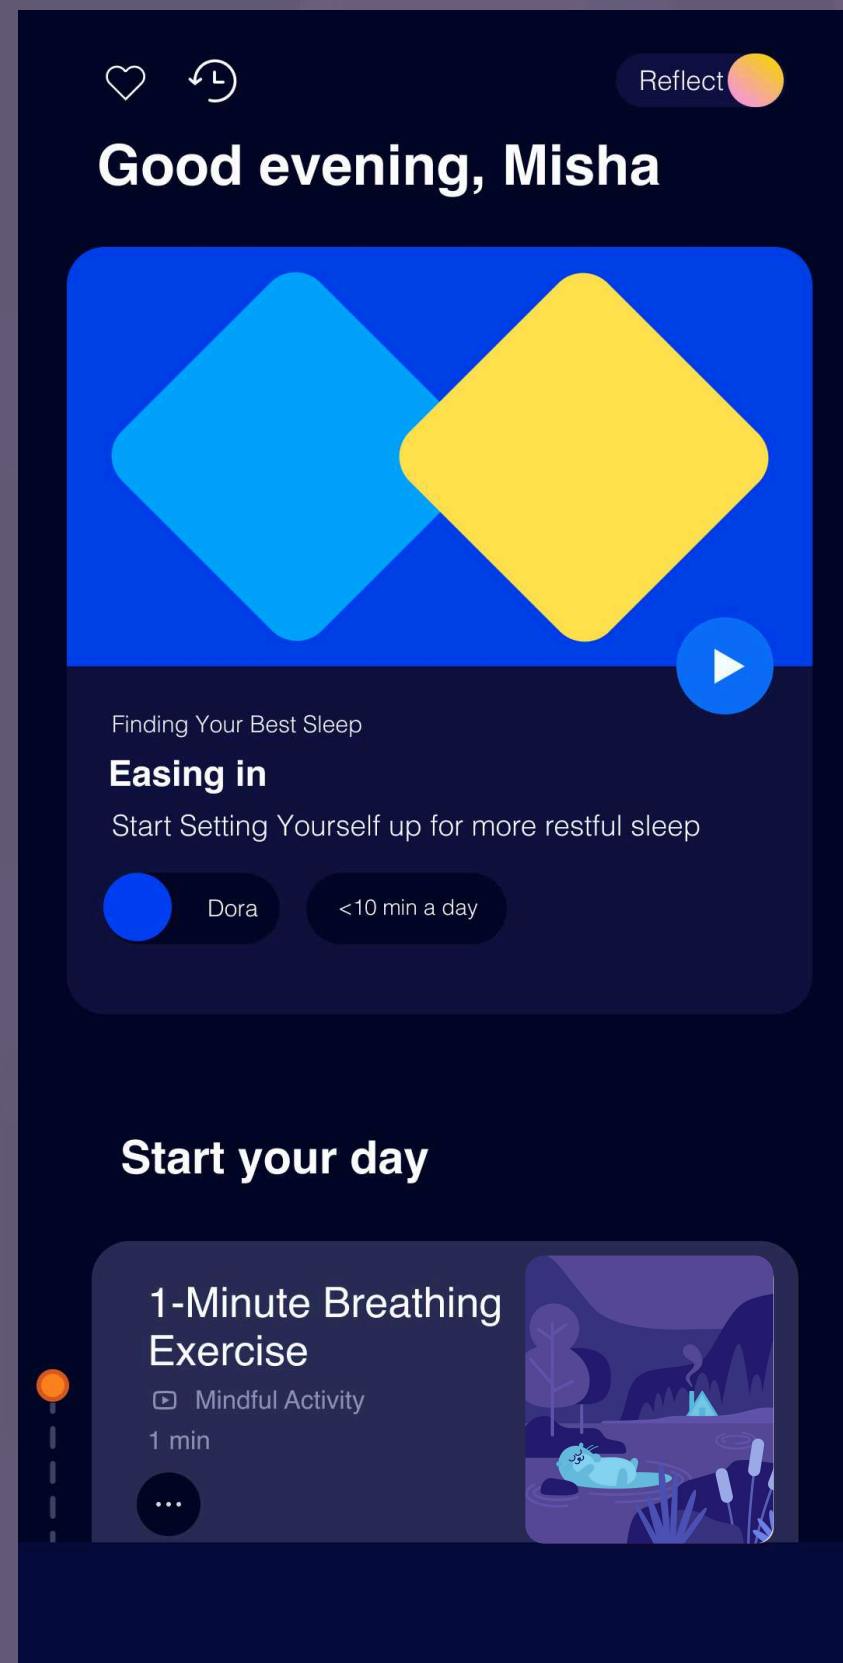

Sleep Mood

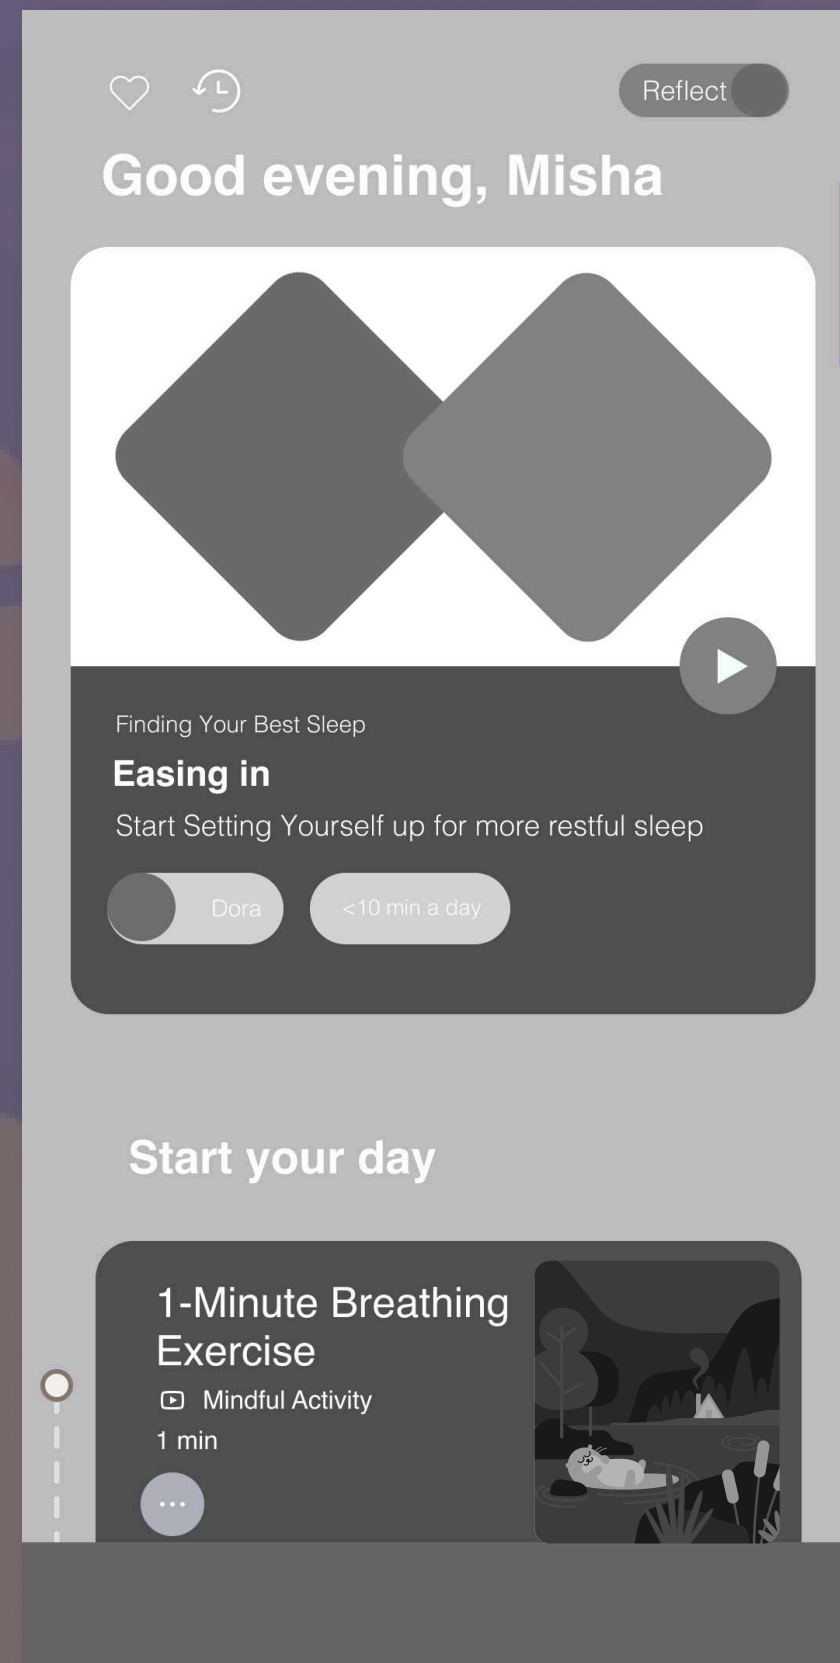

How to get in Sleep Mood

First, Making Wireframe!

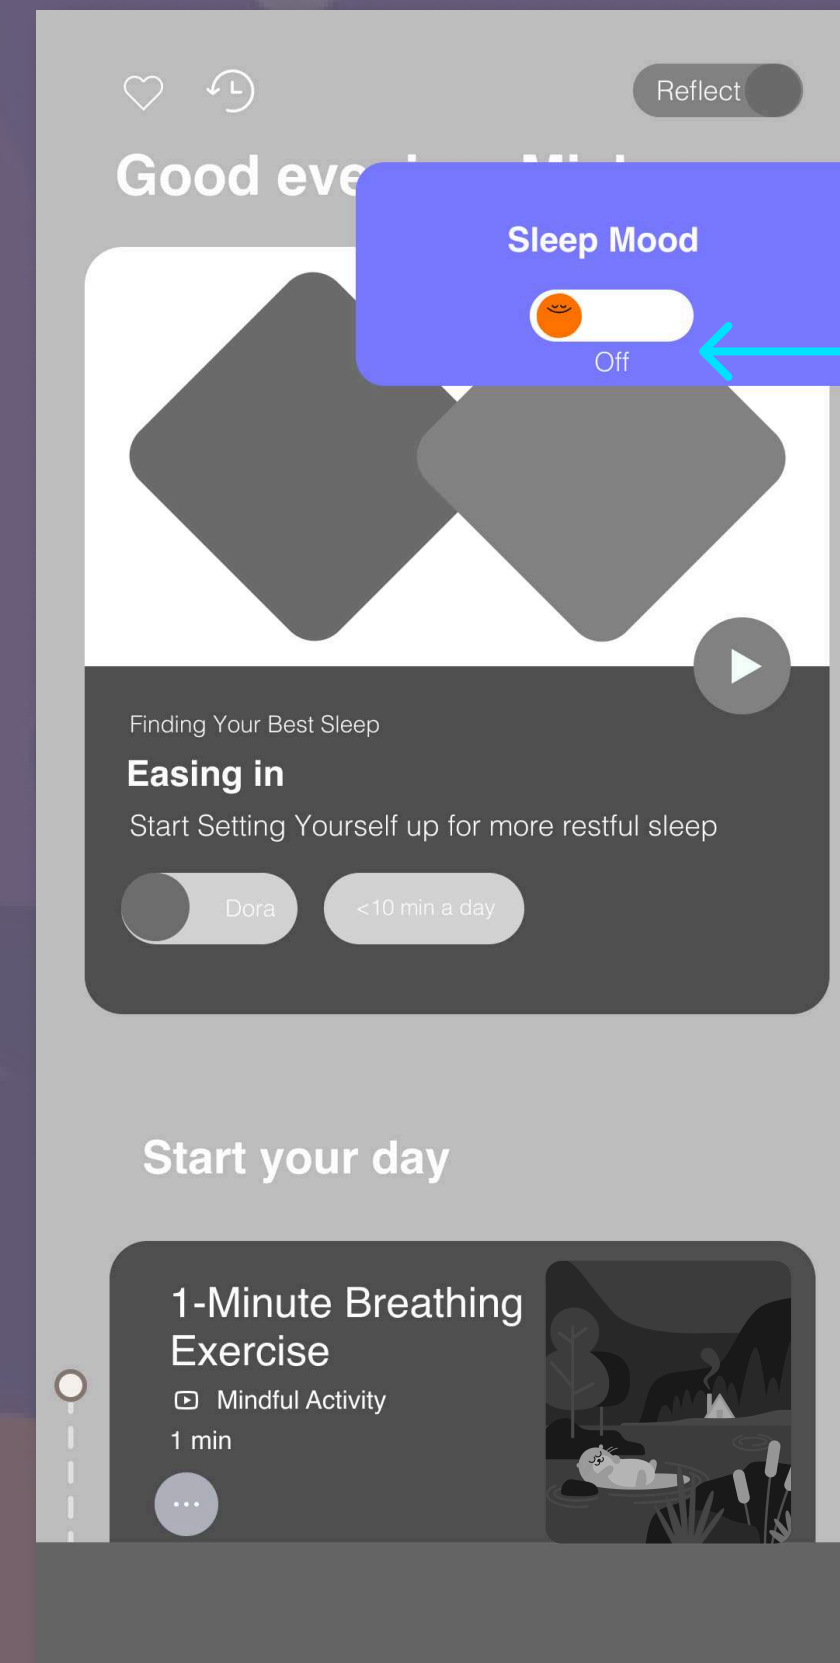

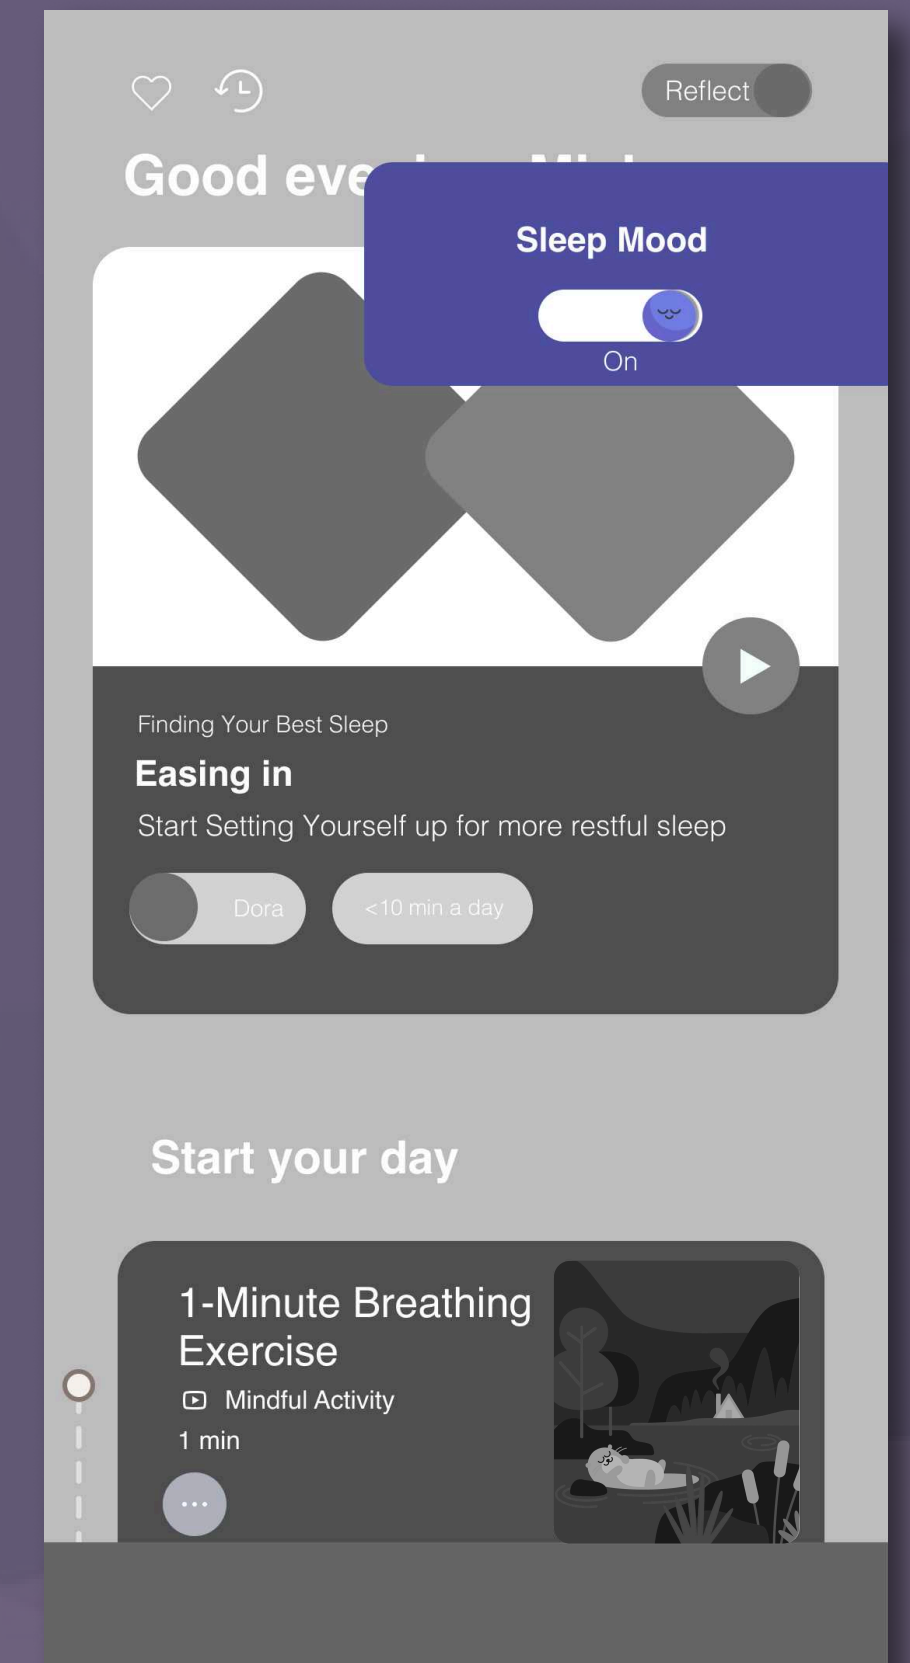

1. This is how we decided to interduce sleep mood

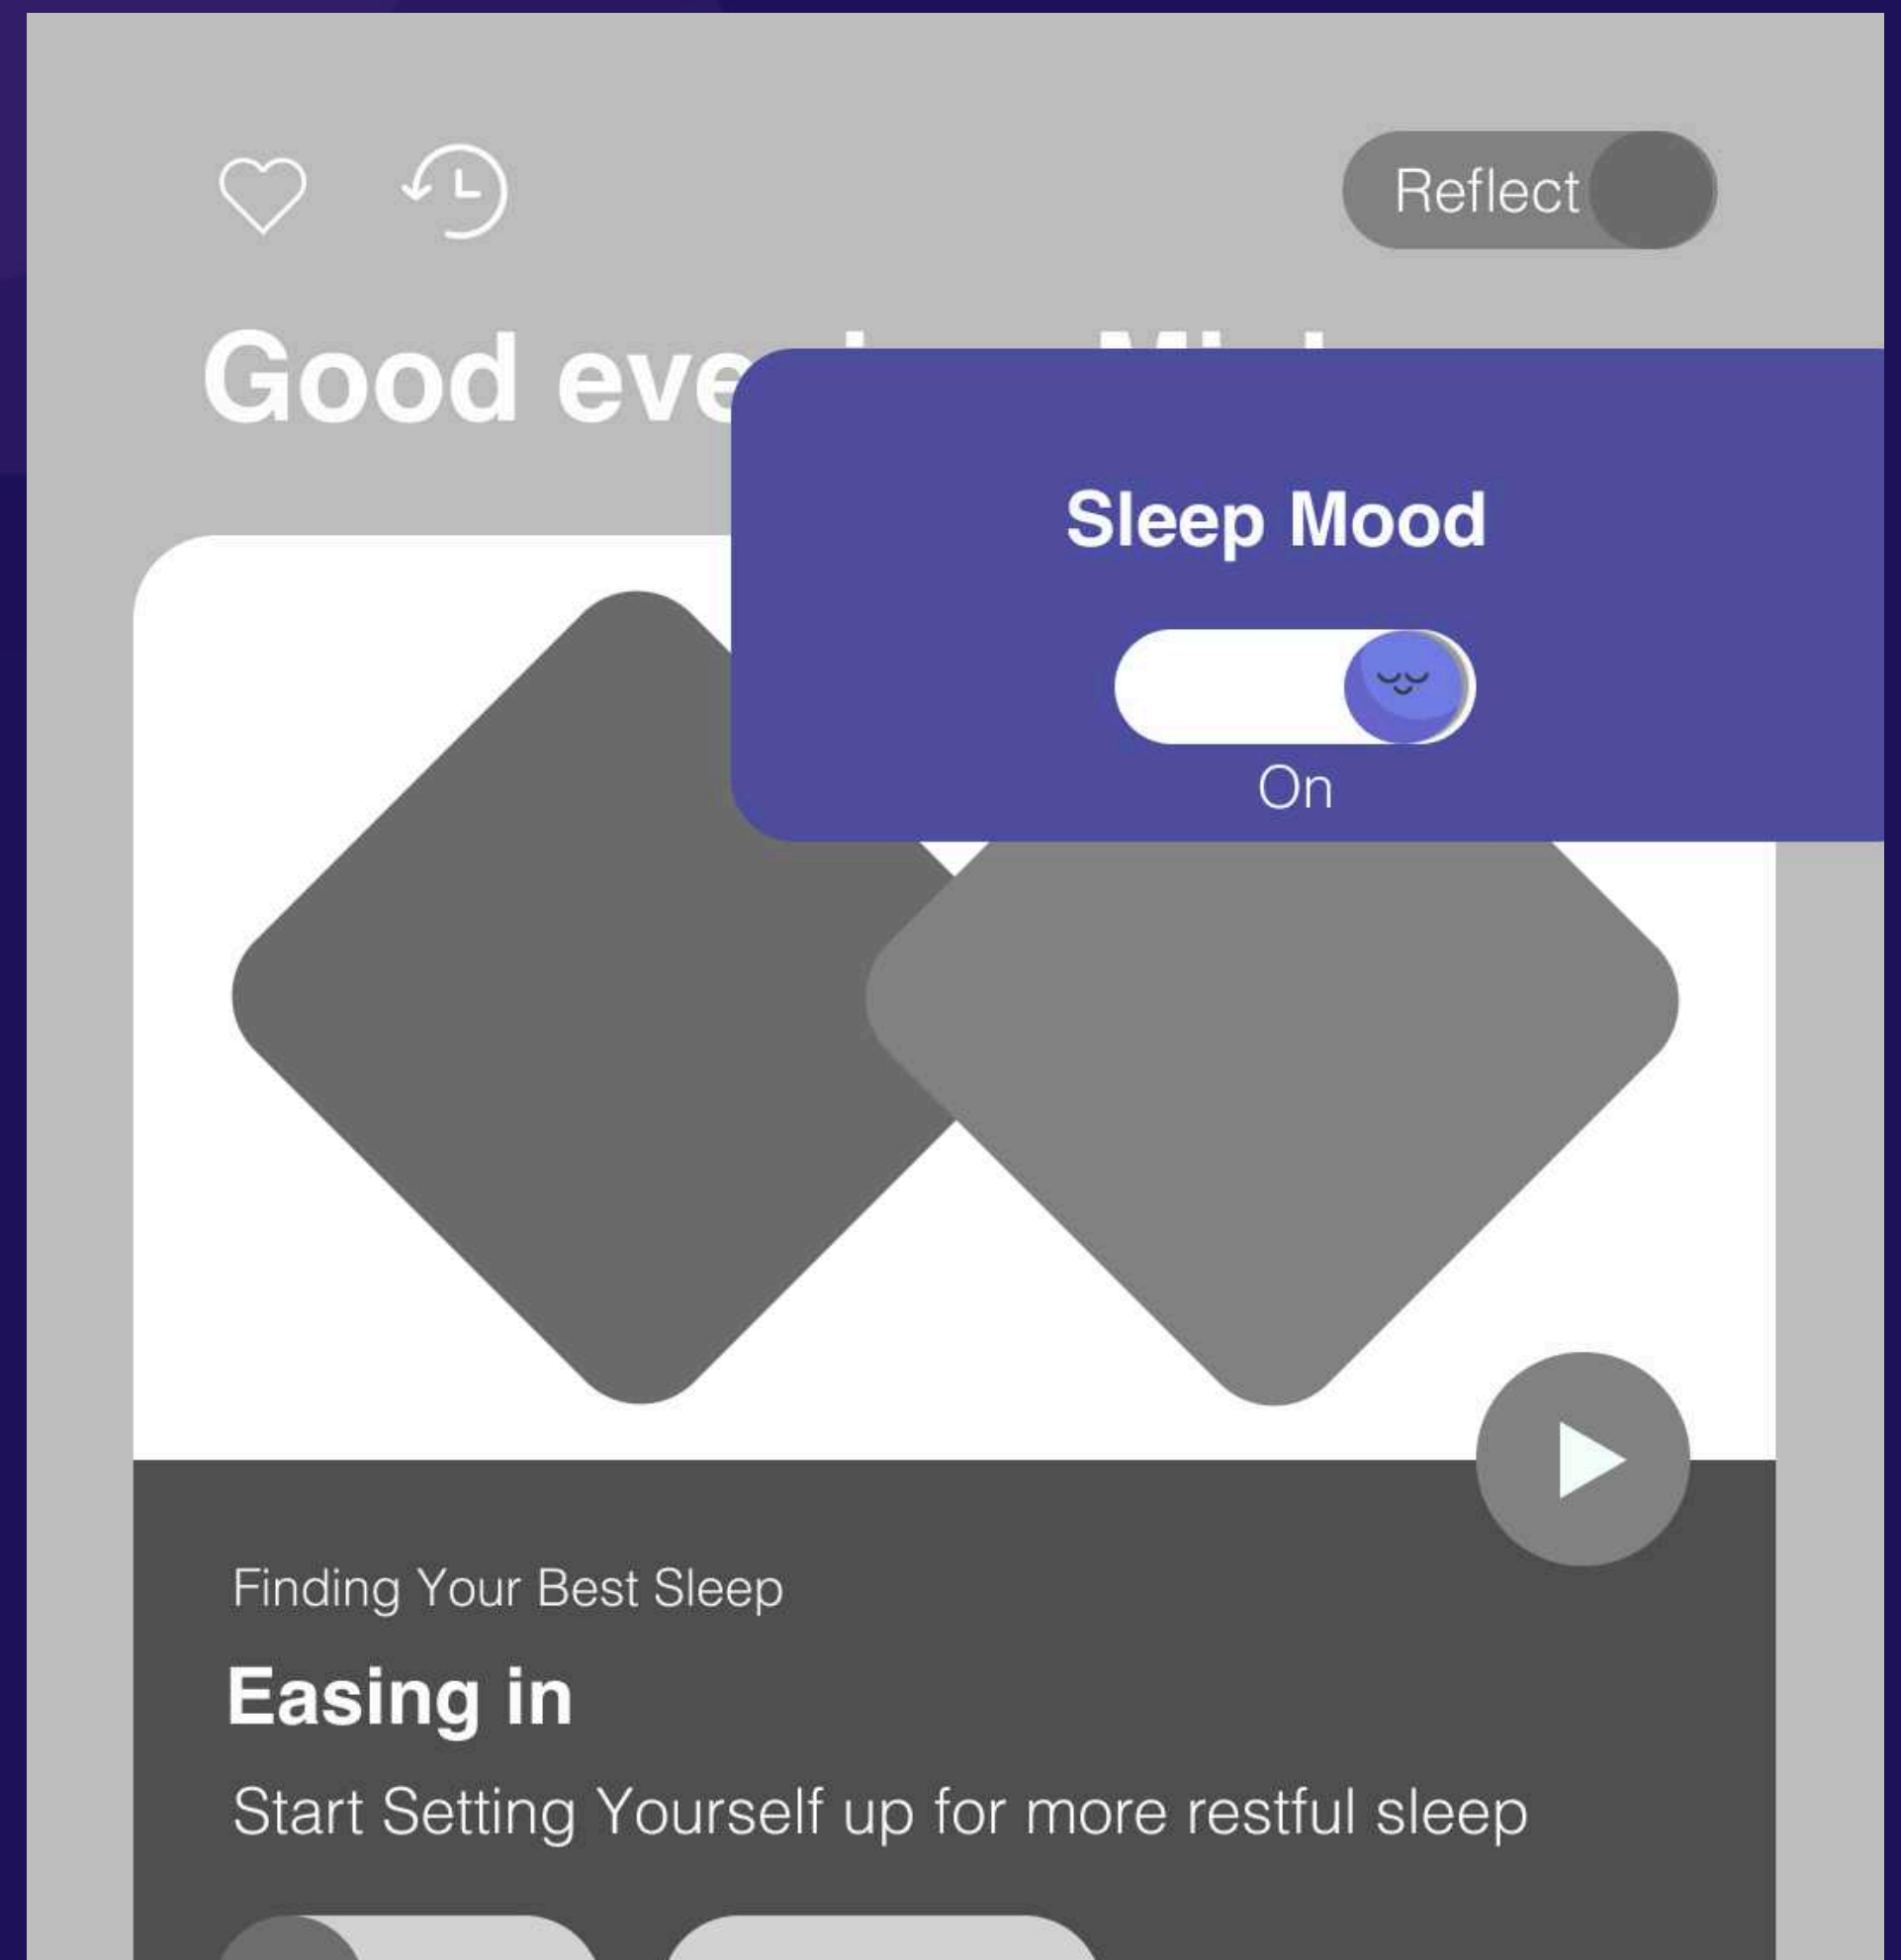

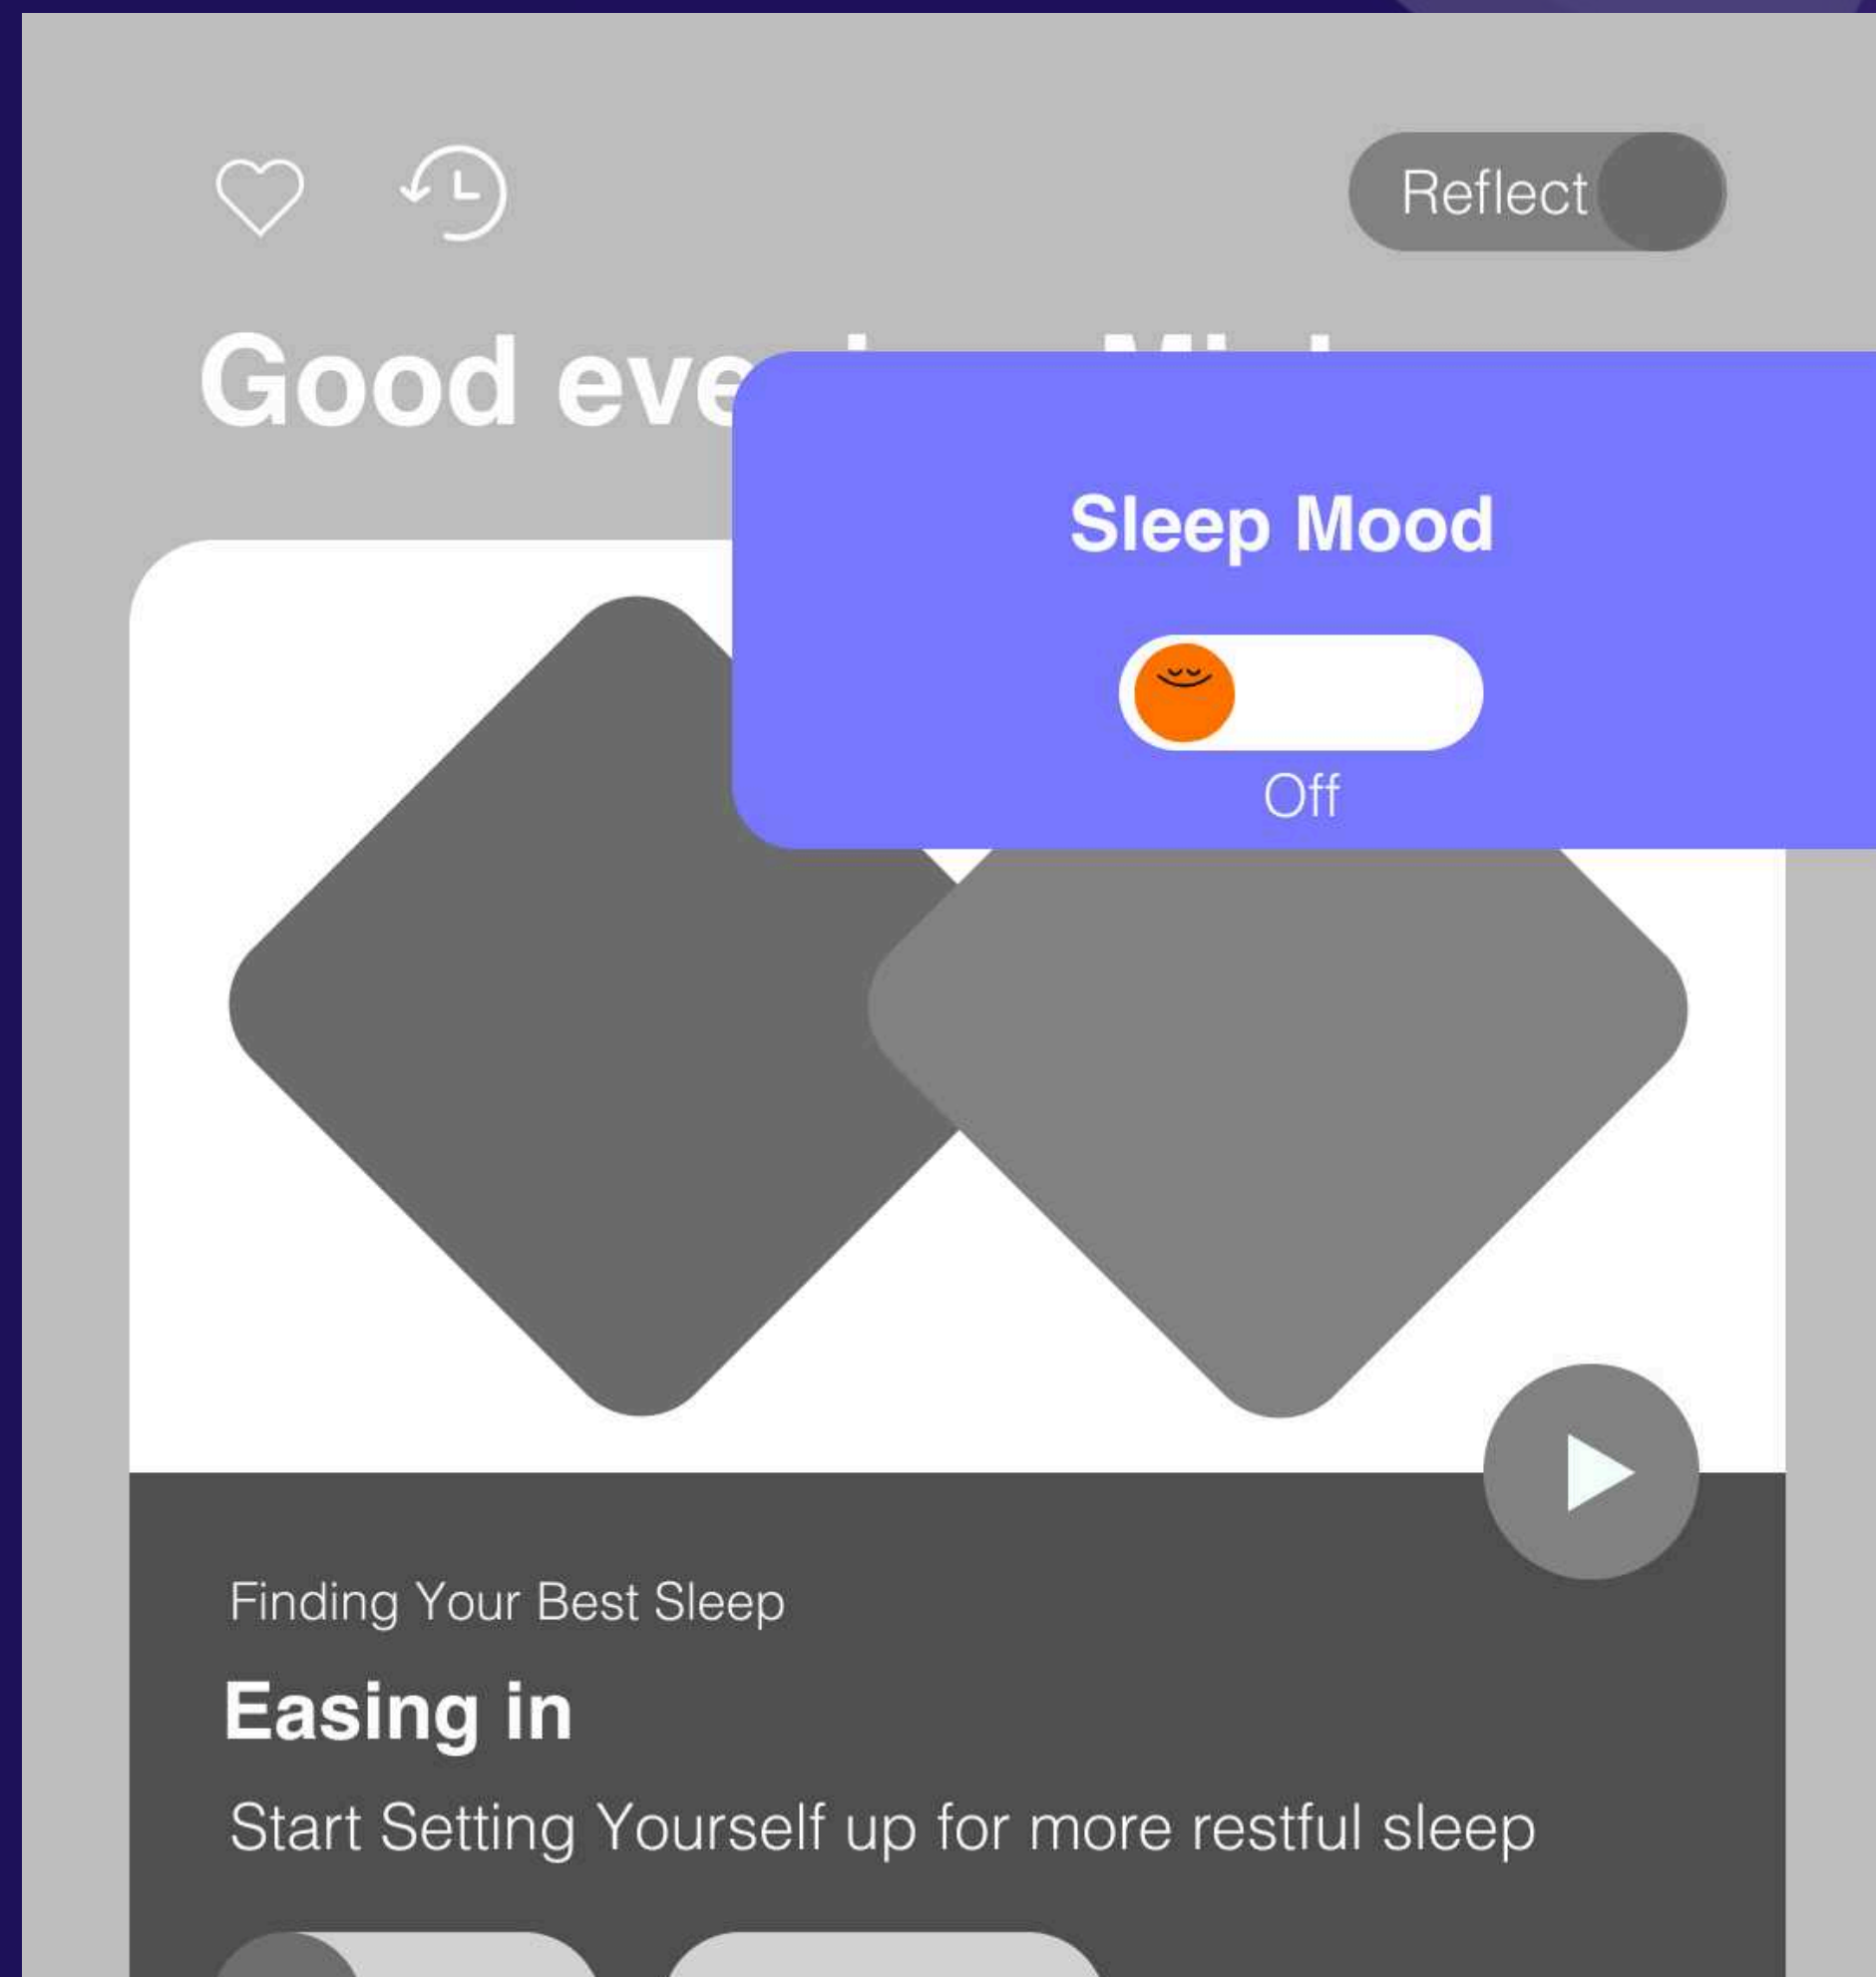

2. small scroll bar which scroll it from right to left

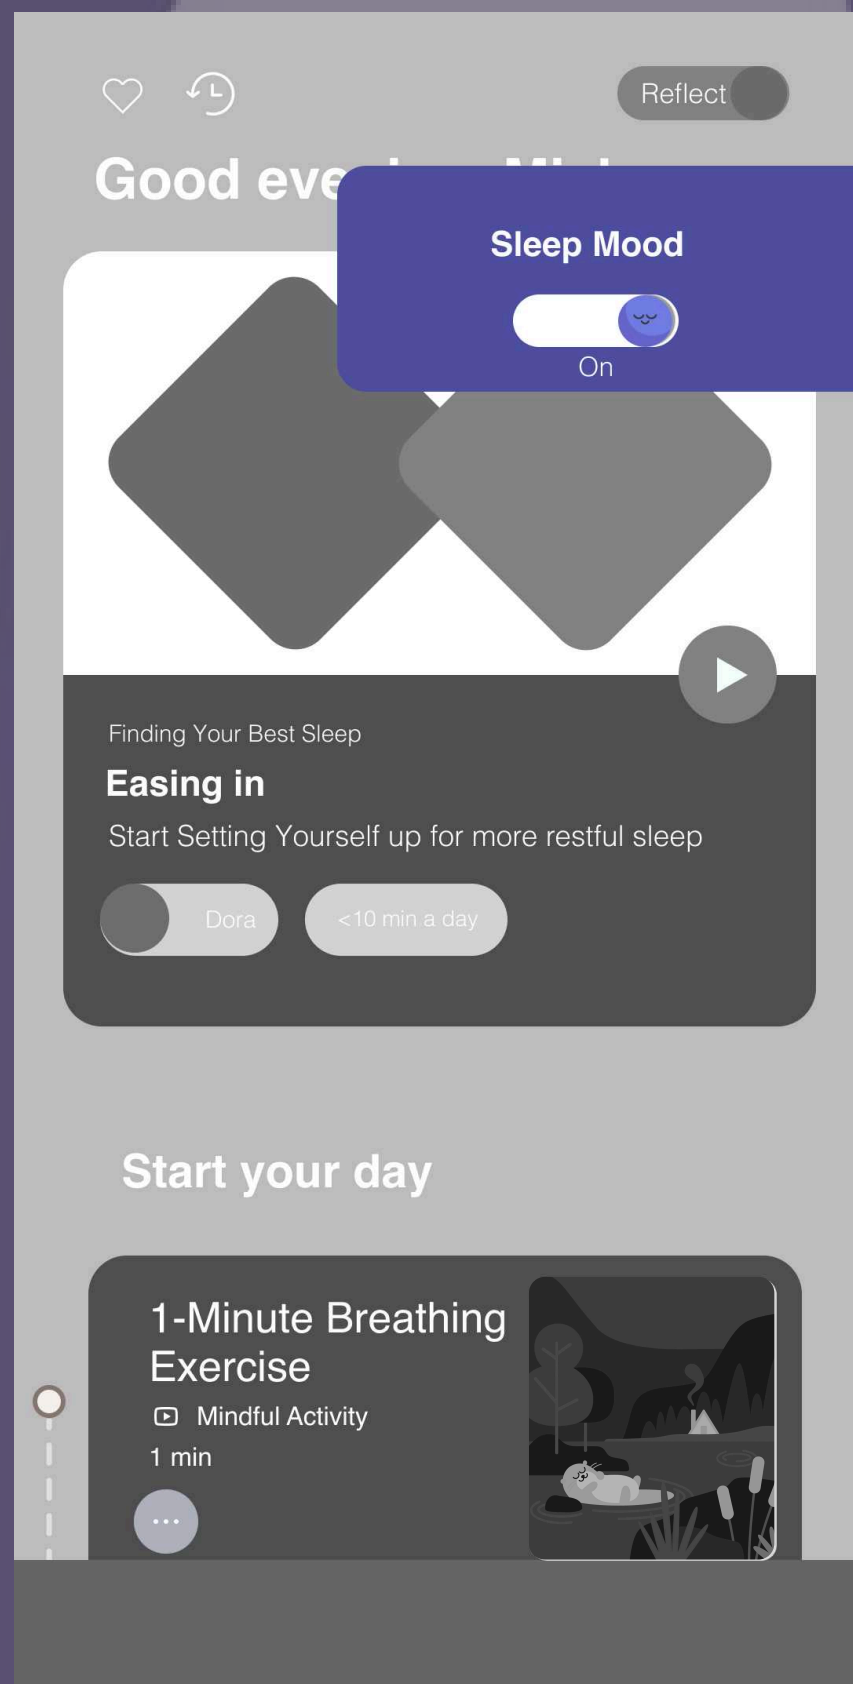

3. and it will show Sleep mood to be ON/ OFF

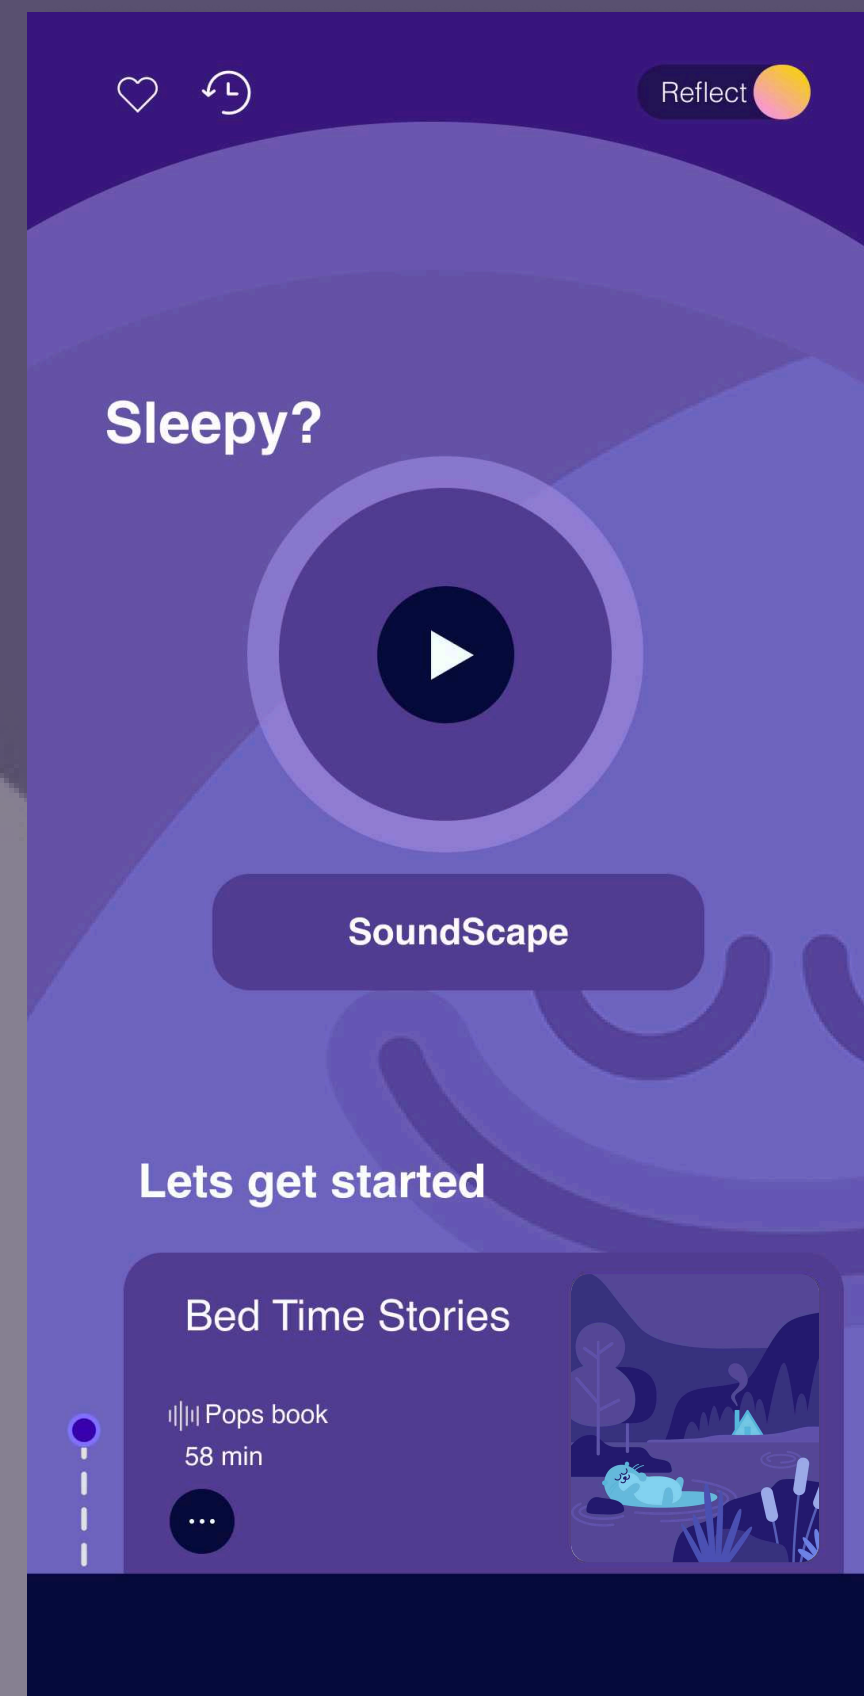

This is how its gonna show the sleep mood

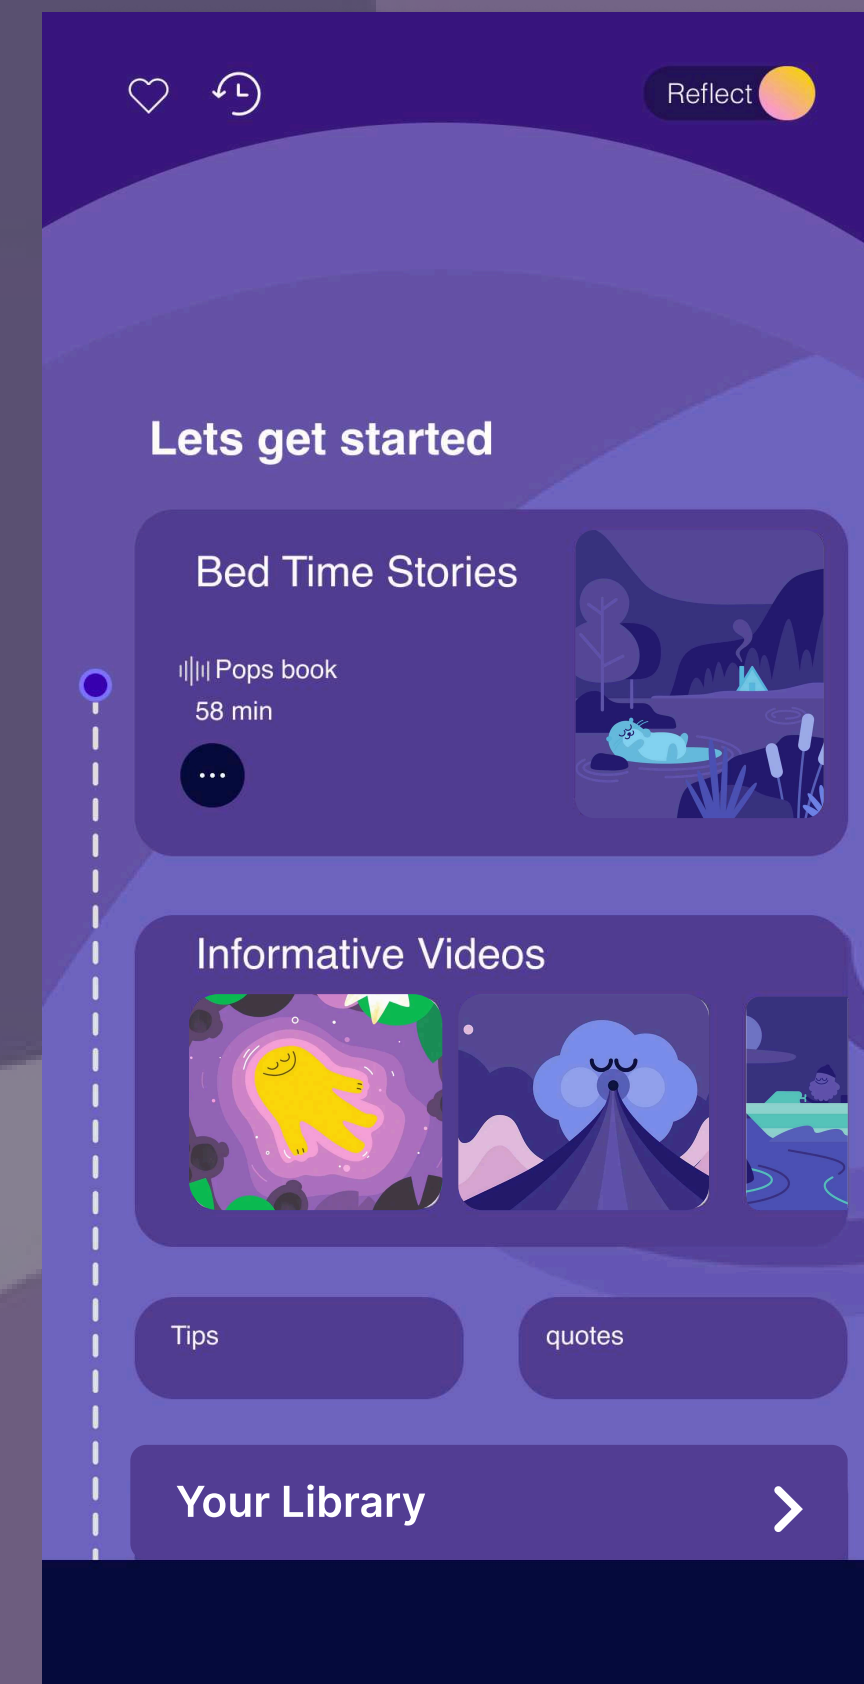

as soon as Sleep Mood Turns ON
The whole wireframe will
changes in Sleep Mood

In this Mood colour pallet
changes to **cooler** tunes

Brightness and
sound will **reduce**
Automatically

First page will show SoundScape
future and..

By scrolling down, Other
features such as Bed Time
Stories or Videos will appear

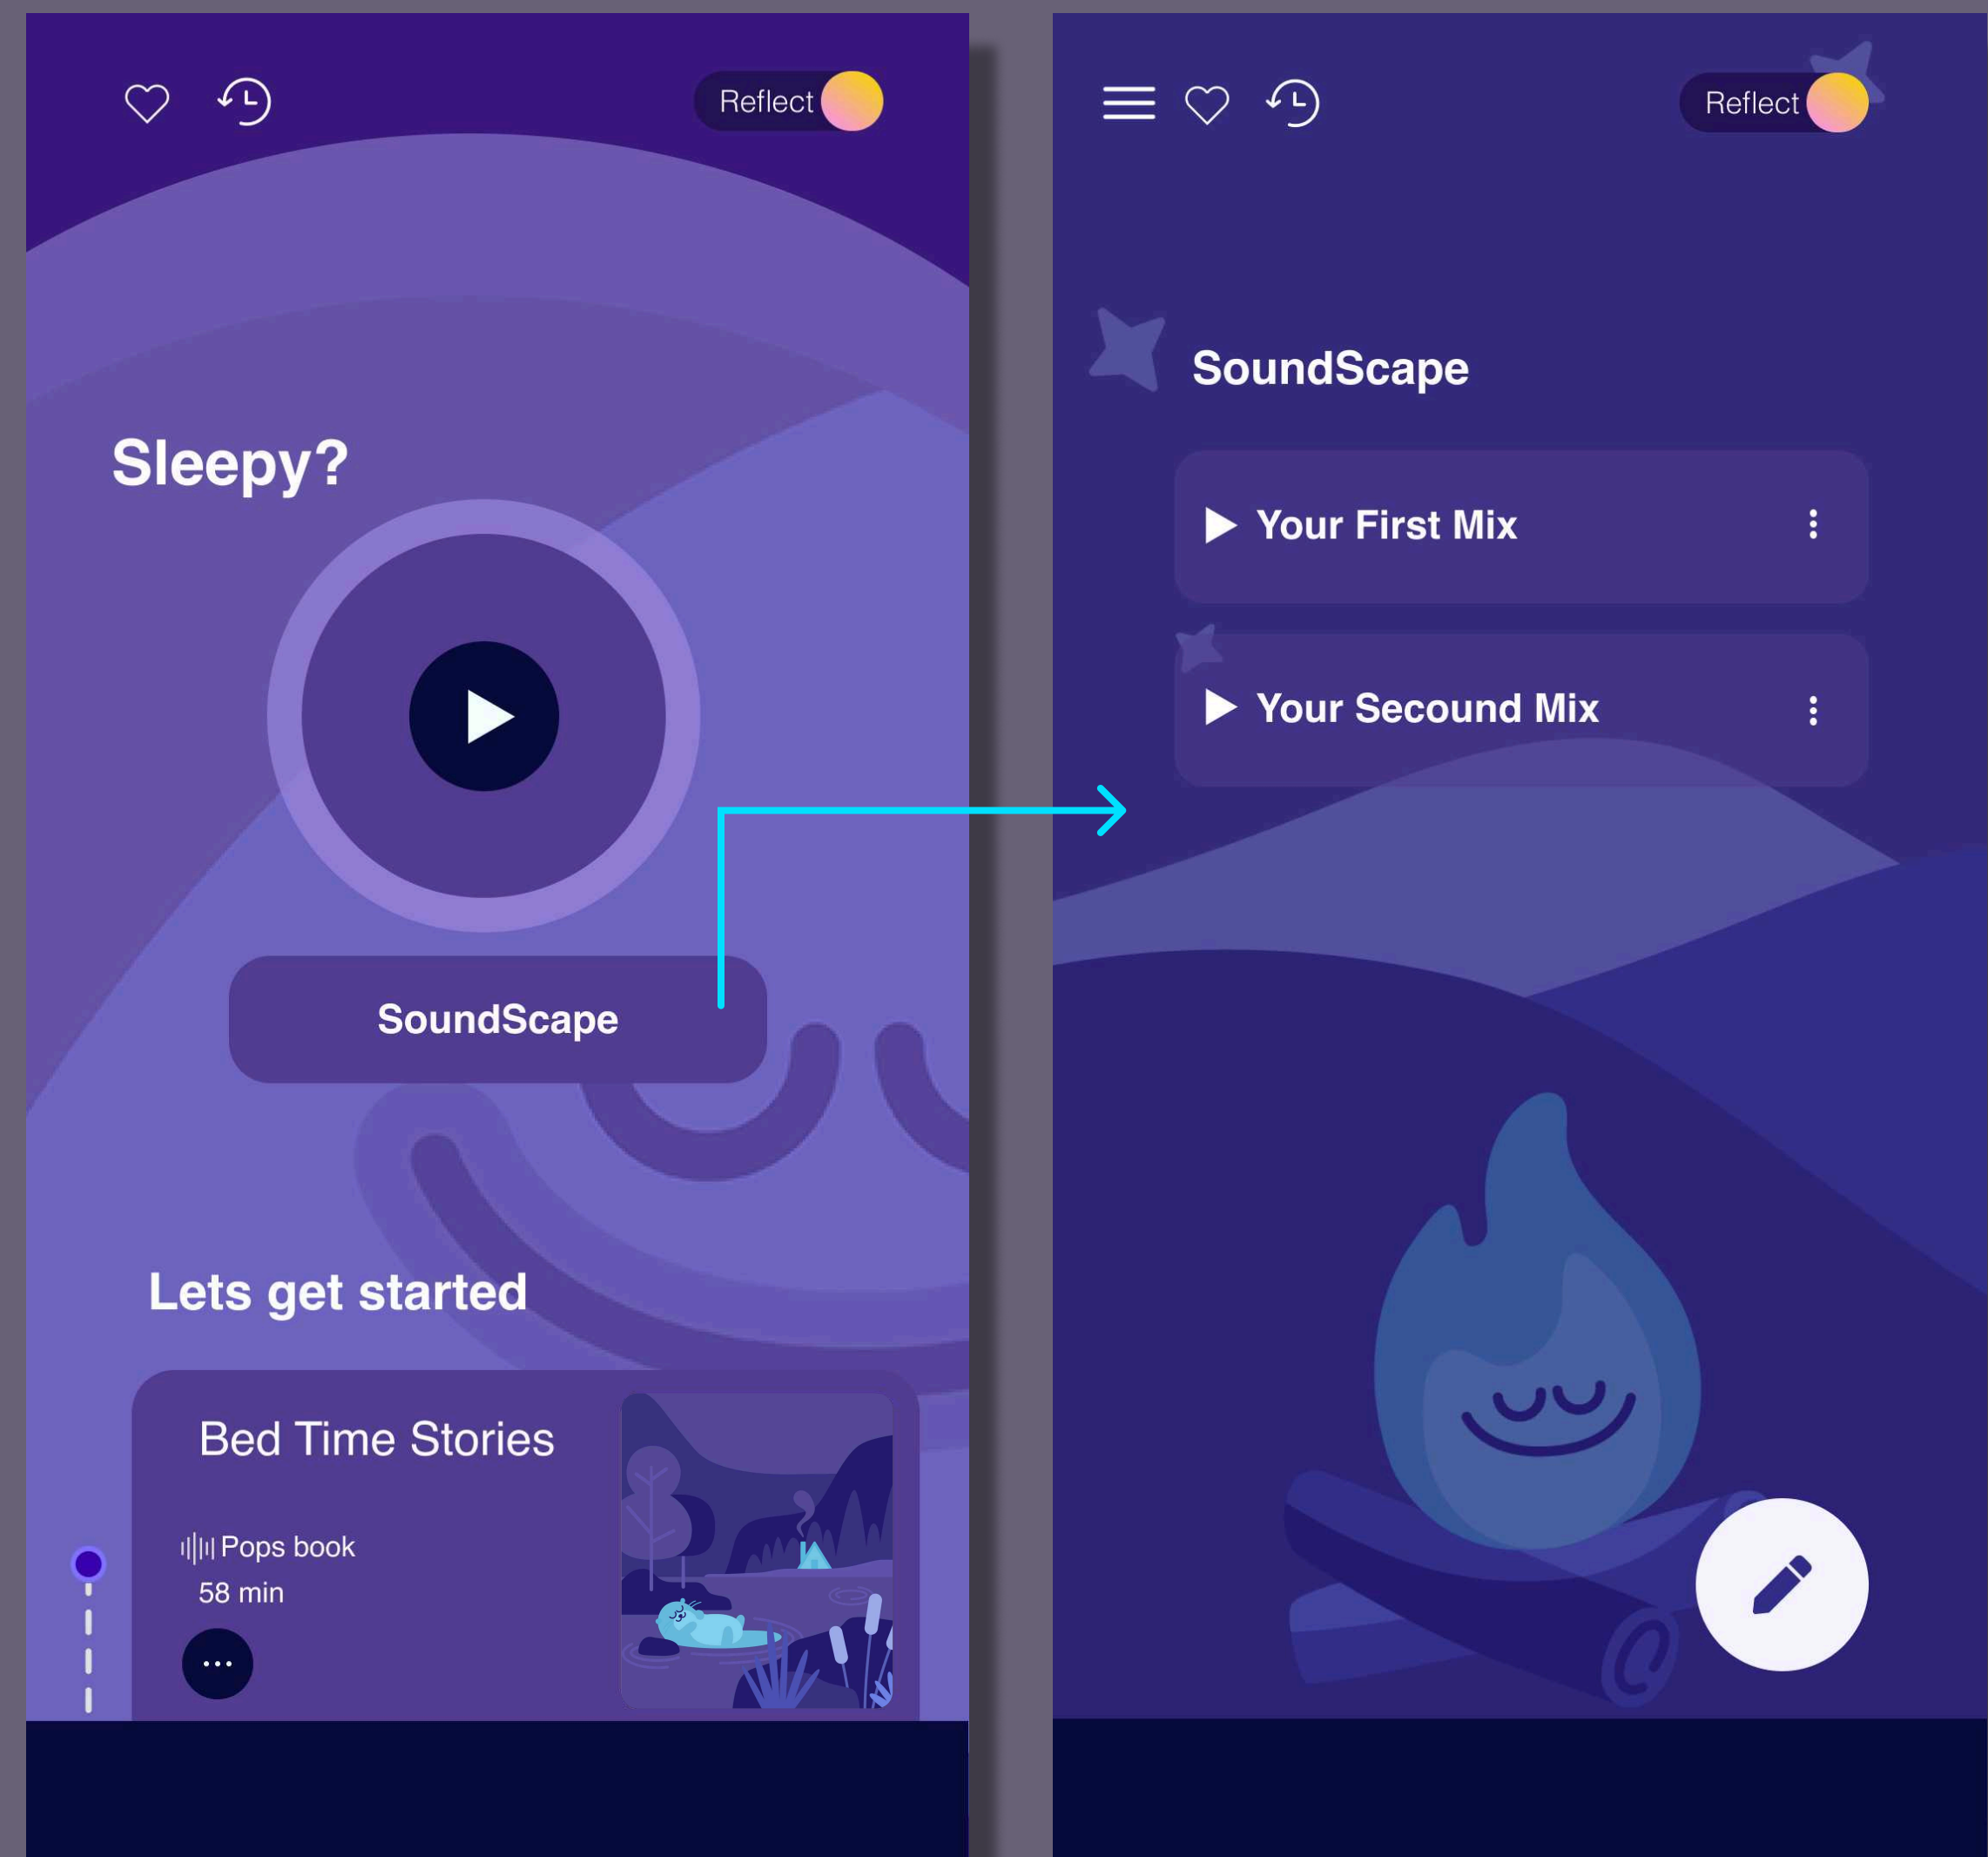

The whole design will follow the
original design of the
Headspace App in order to give
users connection and Calm
feelings

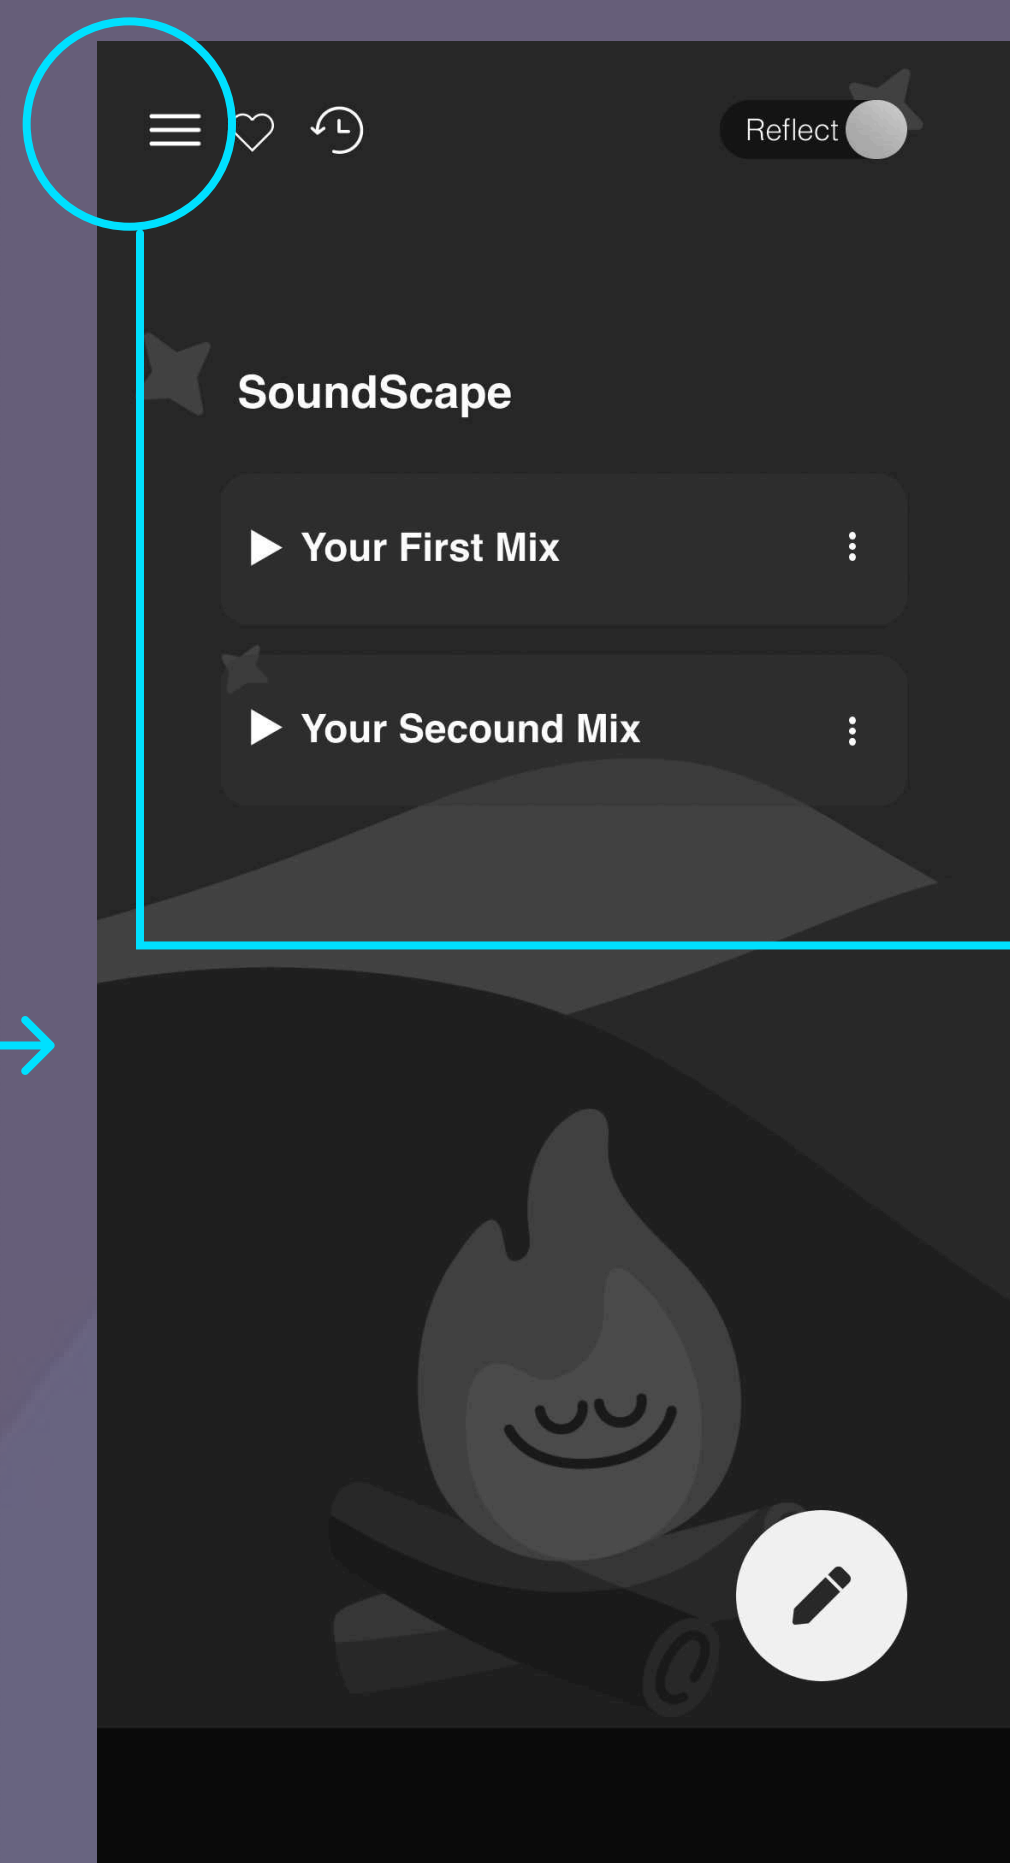

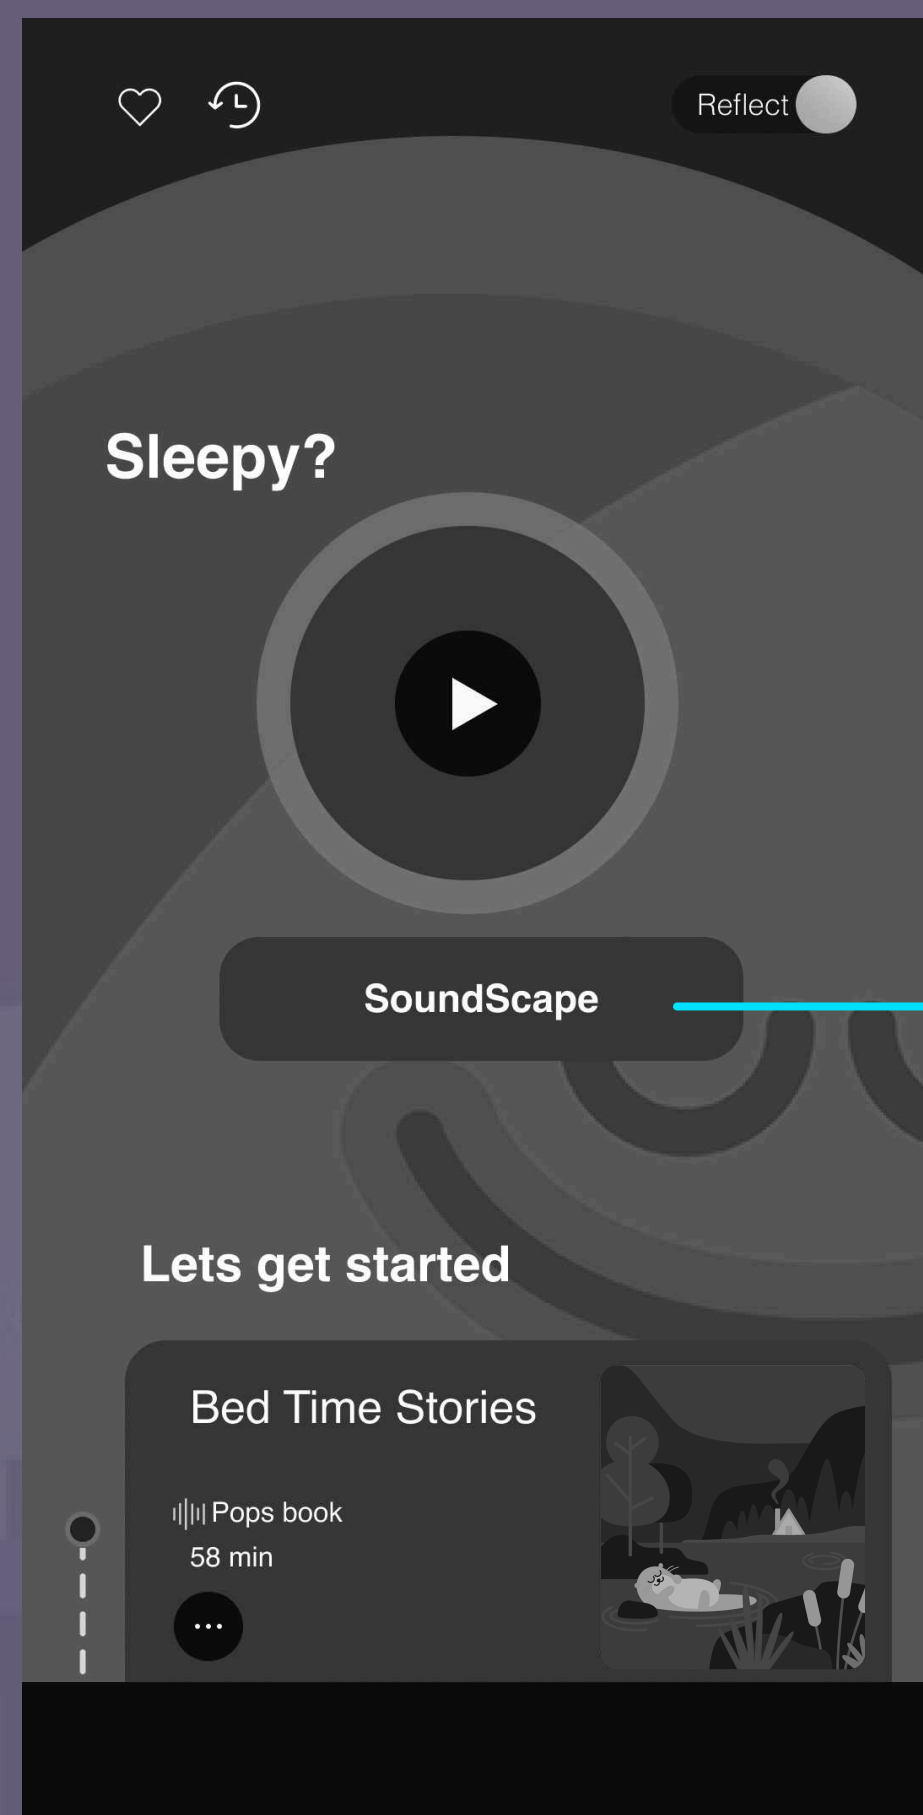

Soundscape

This future mainly Focused on Calming sounds with ability of customizing it, in different ways

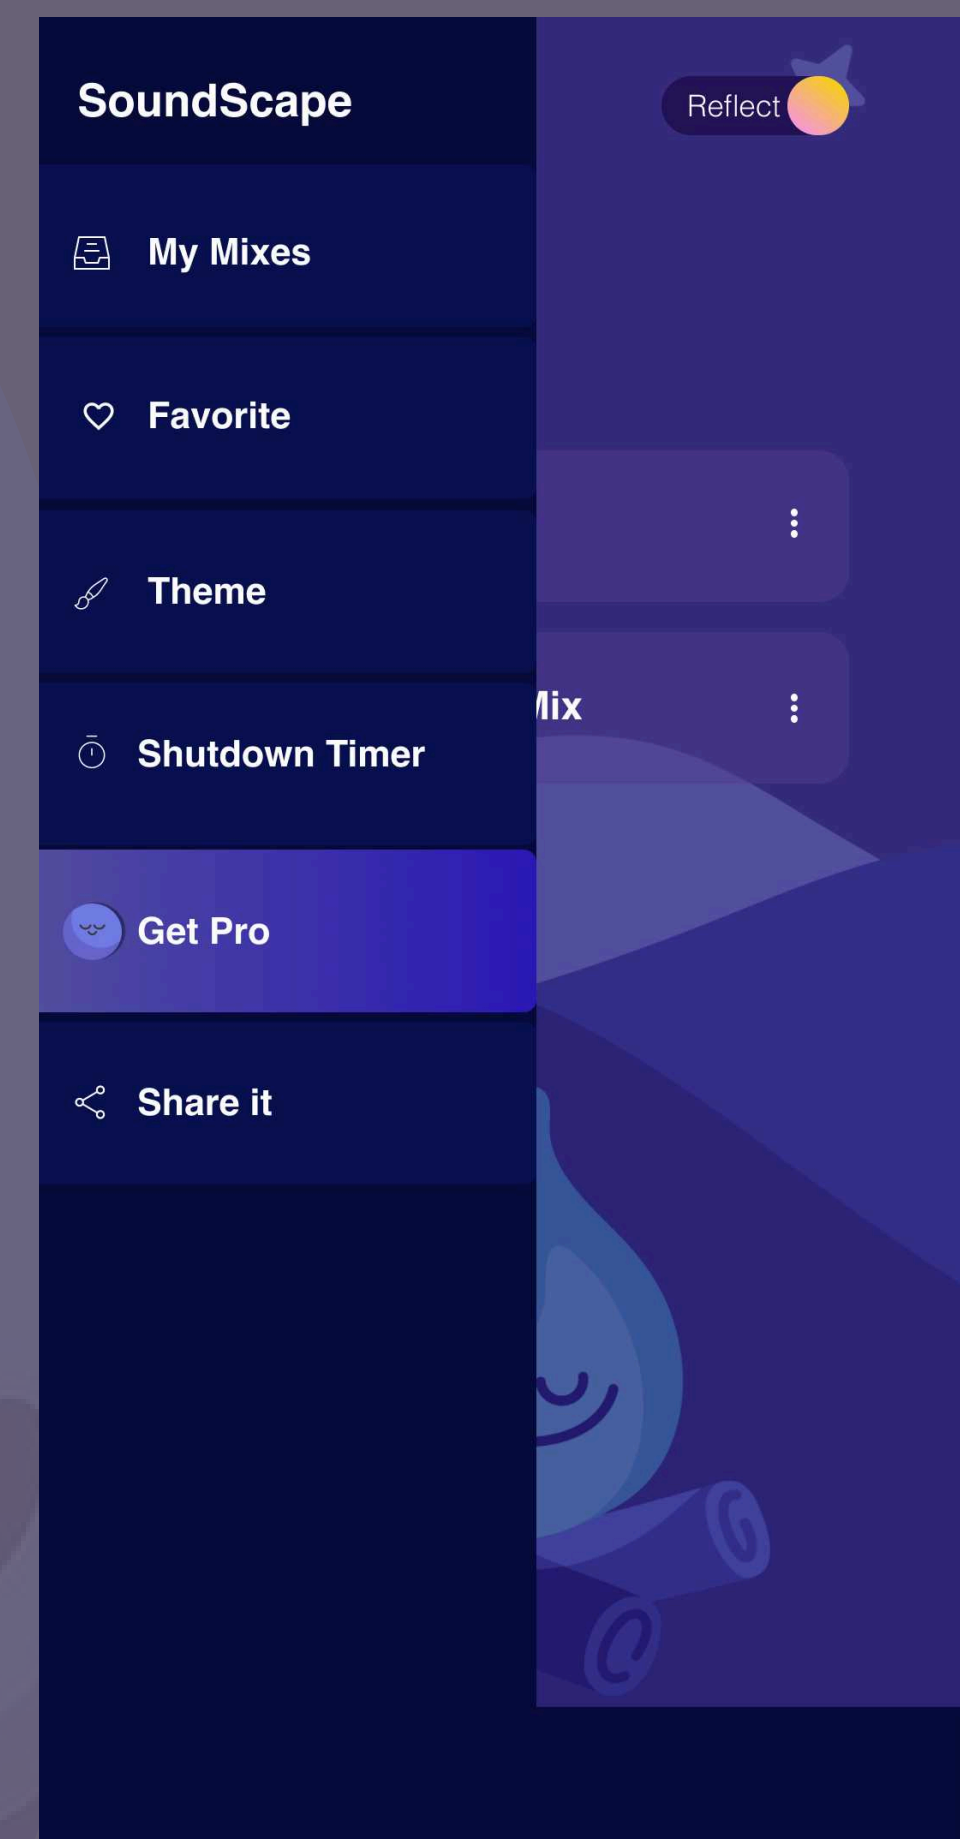

By Clicking on SoundScape wireframe will goes to SoundScape Sections

Which it shows your personal playlists

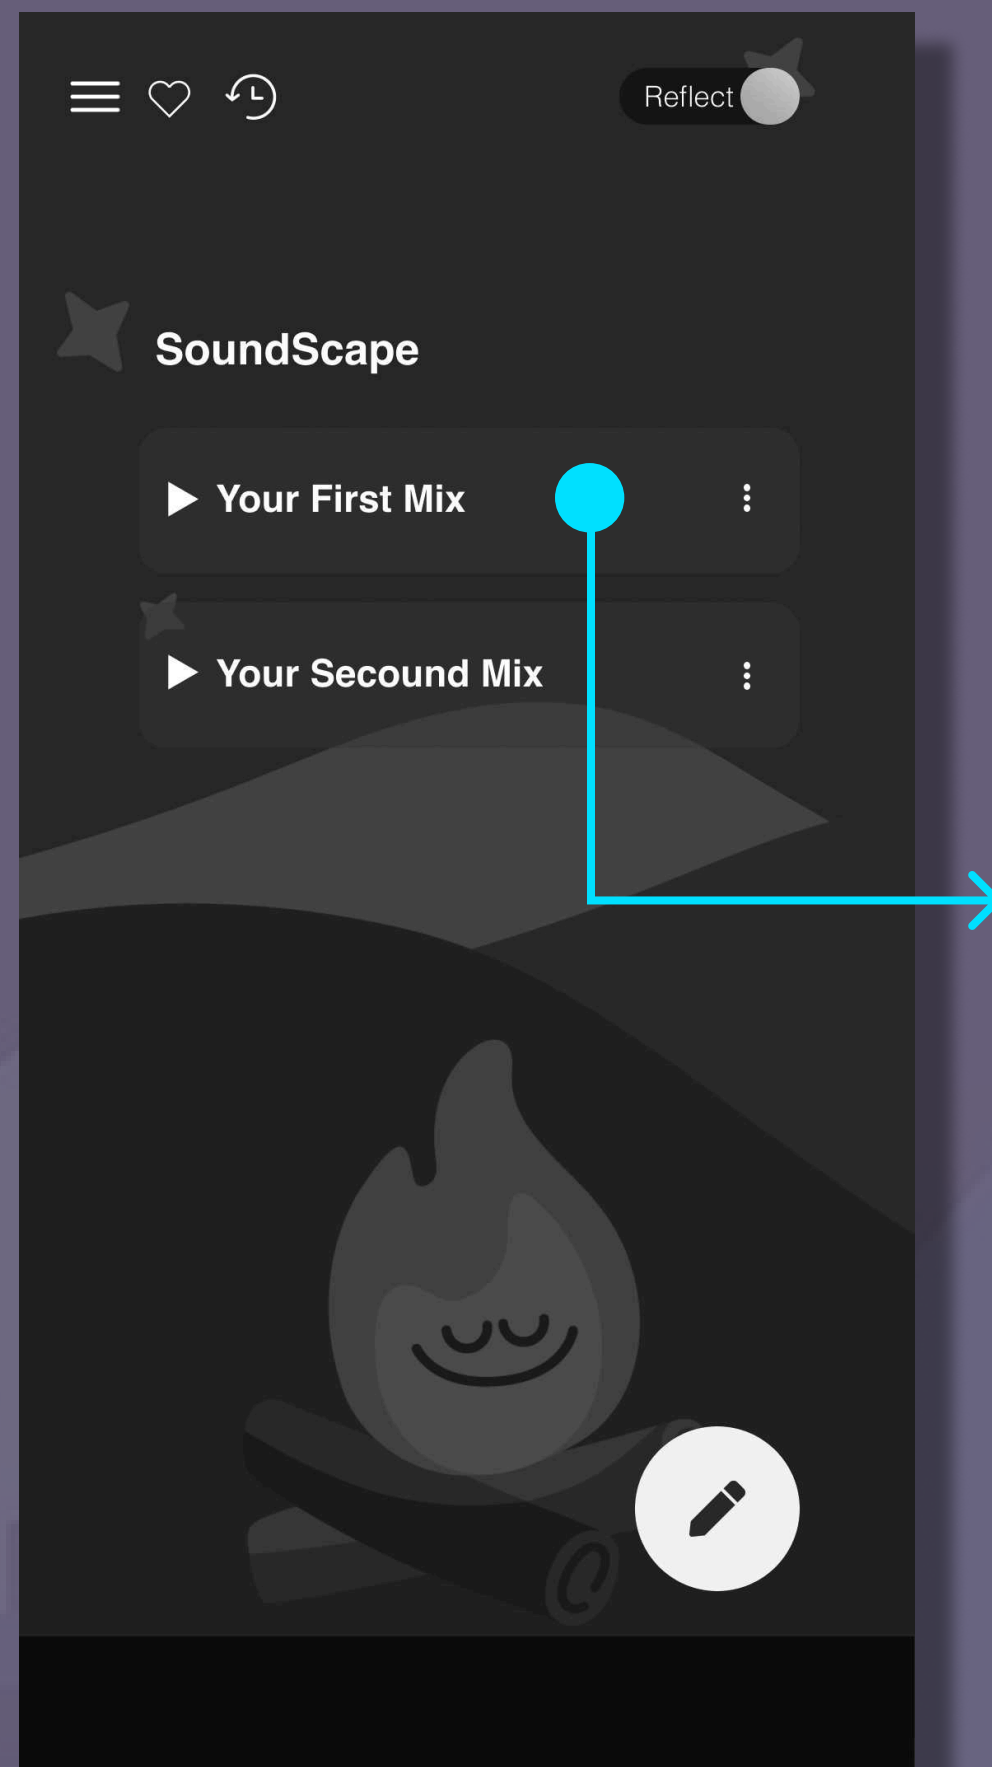

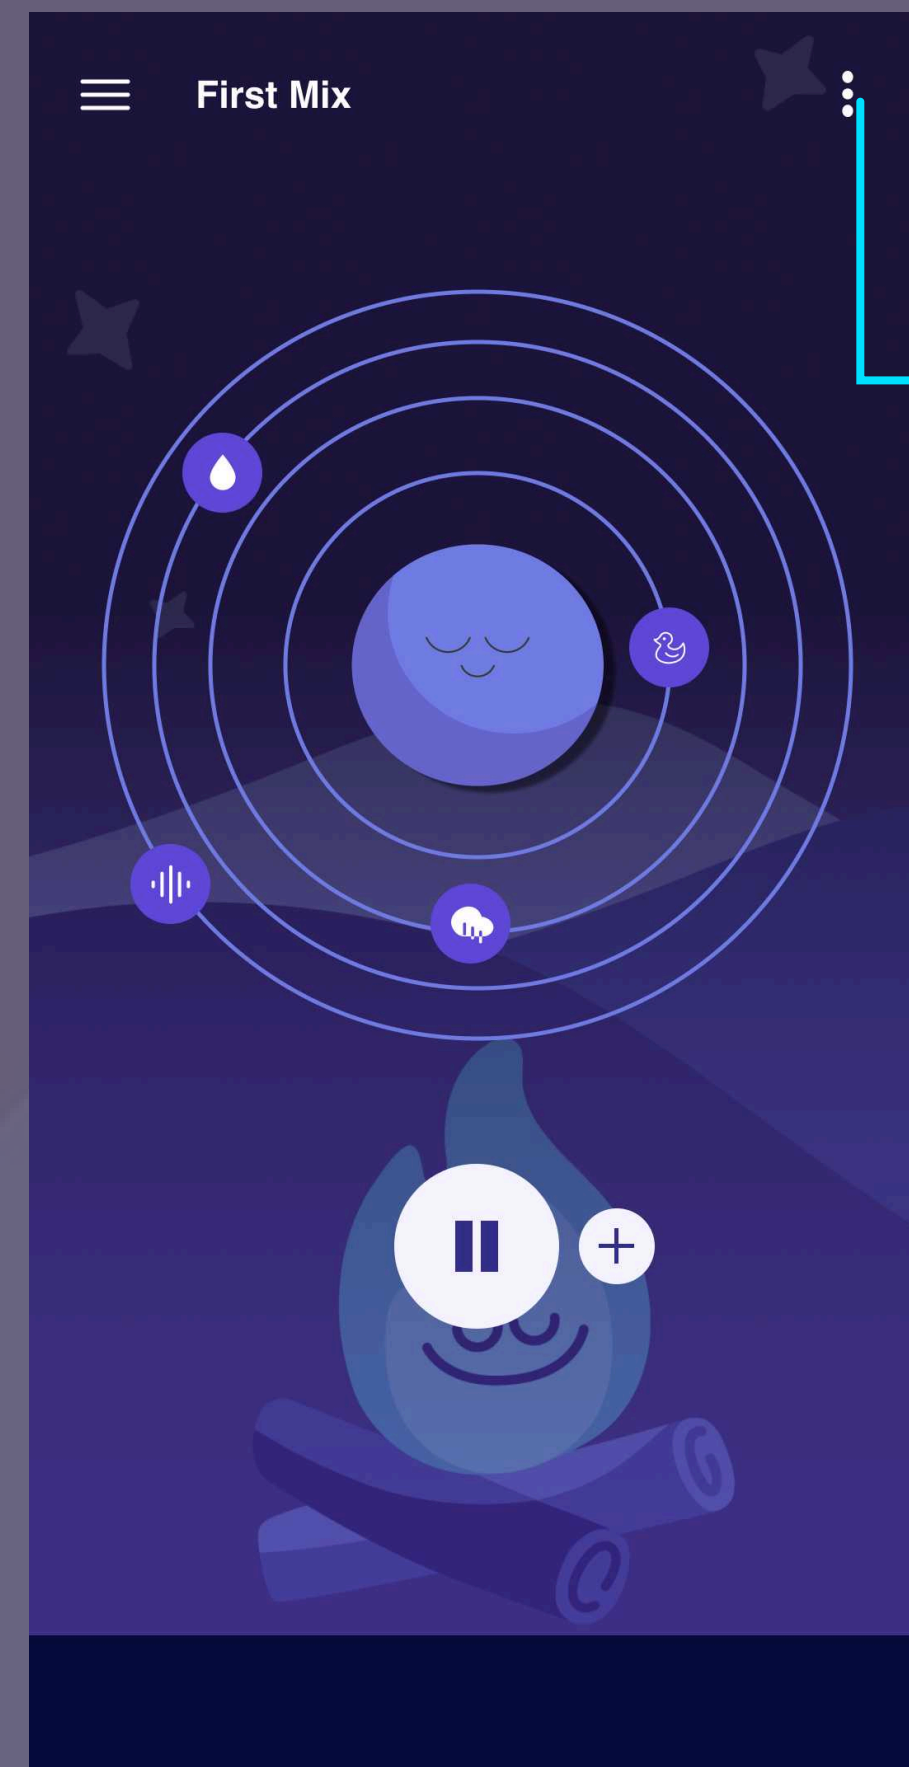

by Clicking on Hamburger menu, option menu will Overlay the page

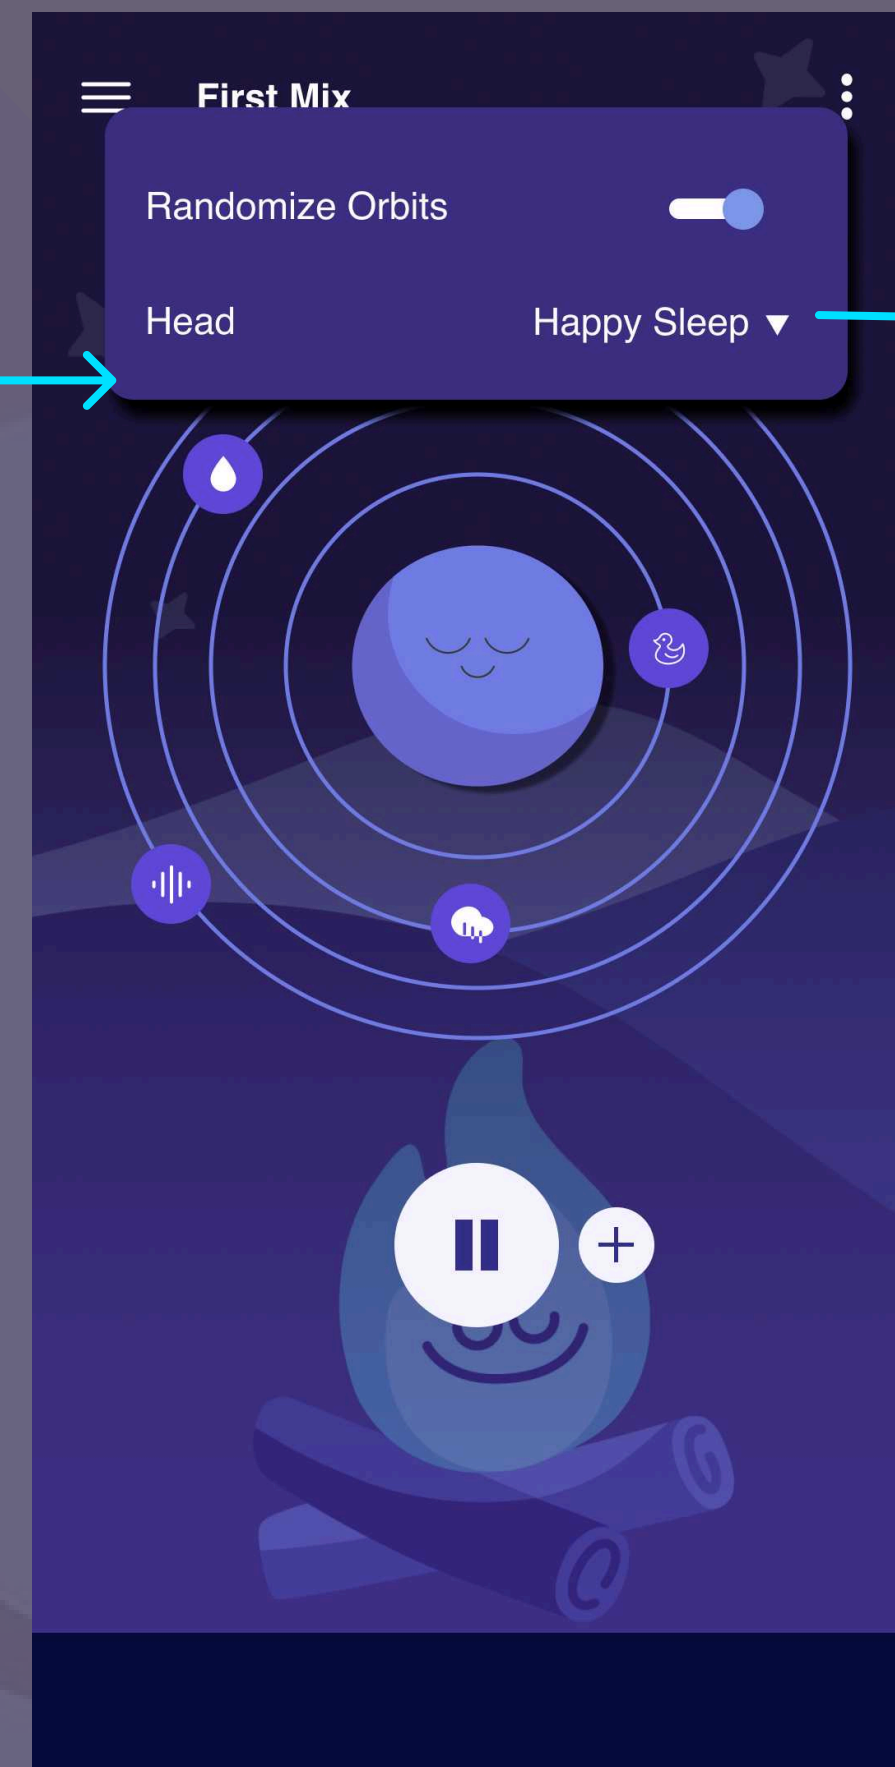

Inside of the Hamburger menu, it will be options such as share, Favorite and timer for stopping the sounds

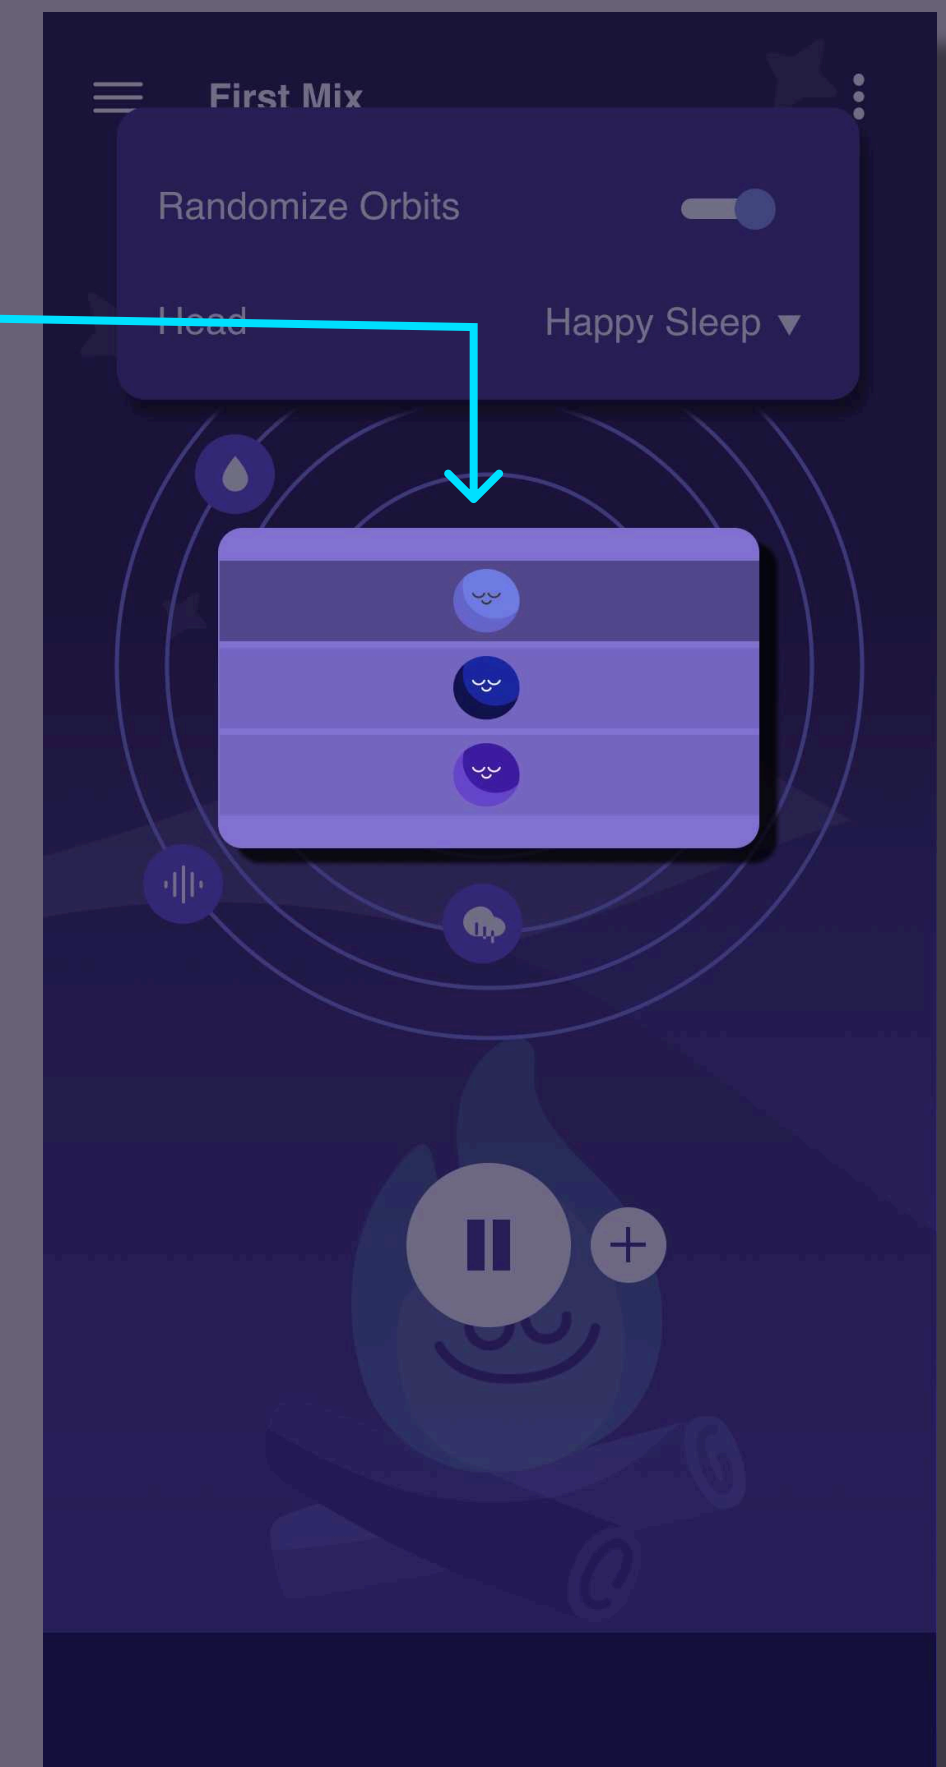

by Clicking on "Your First Mix" users will enter into the SoundScape page

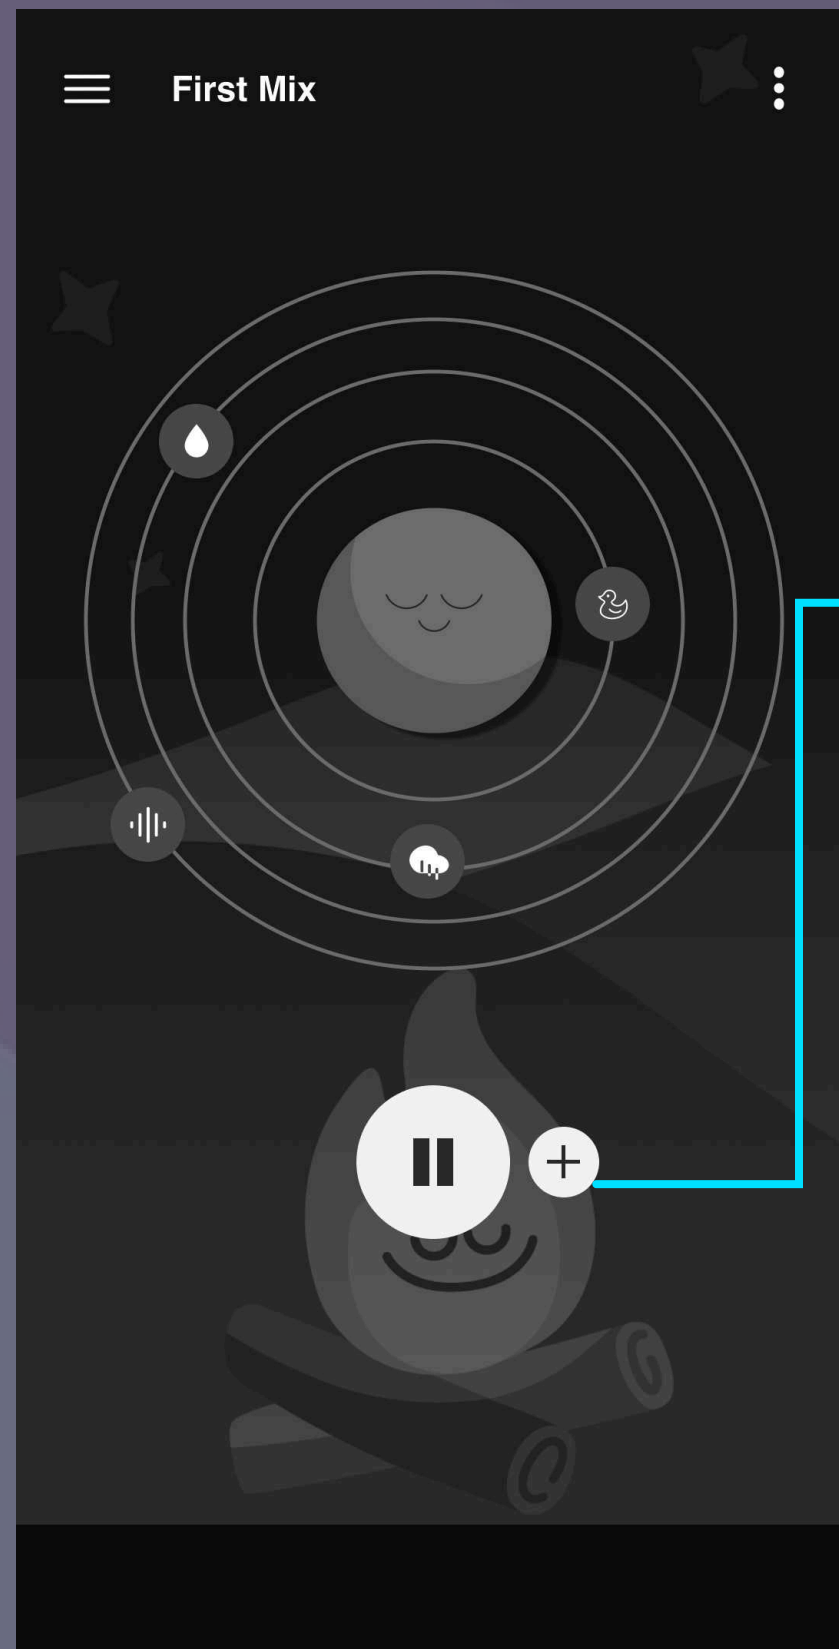

In this page users can add sounds, customize their playlist, Pause the sounds or even by dragging, the circles users can decide whether if they want to listen curtain sound near to their ears or far away

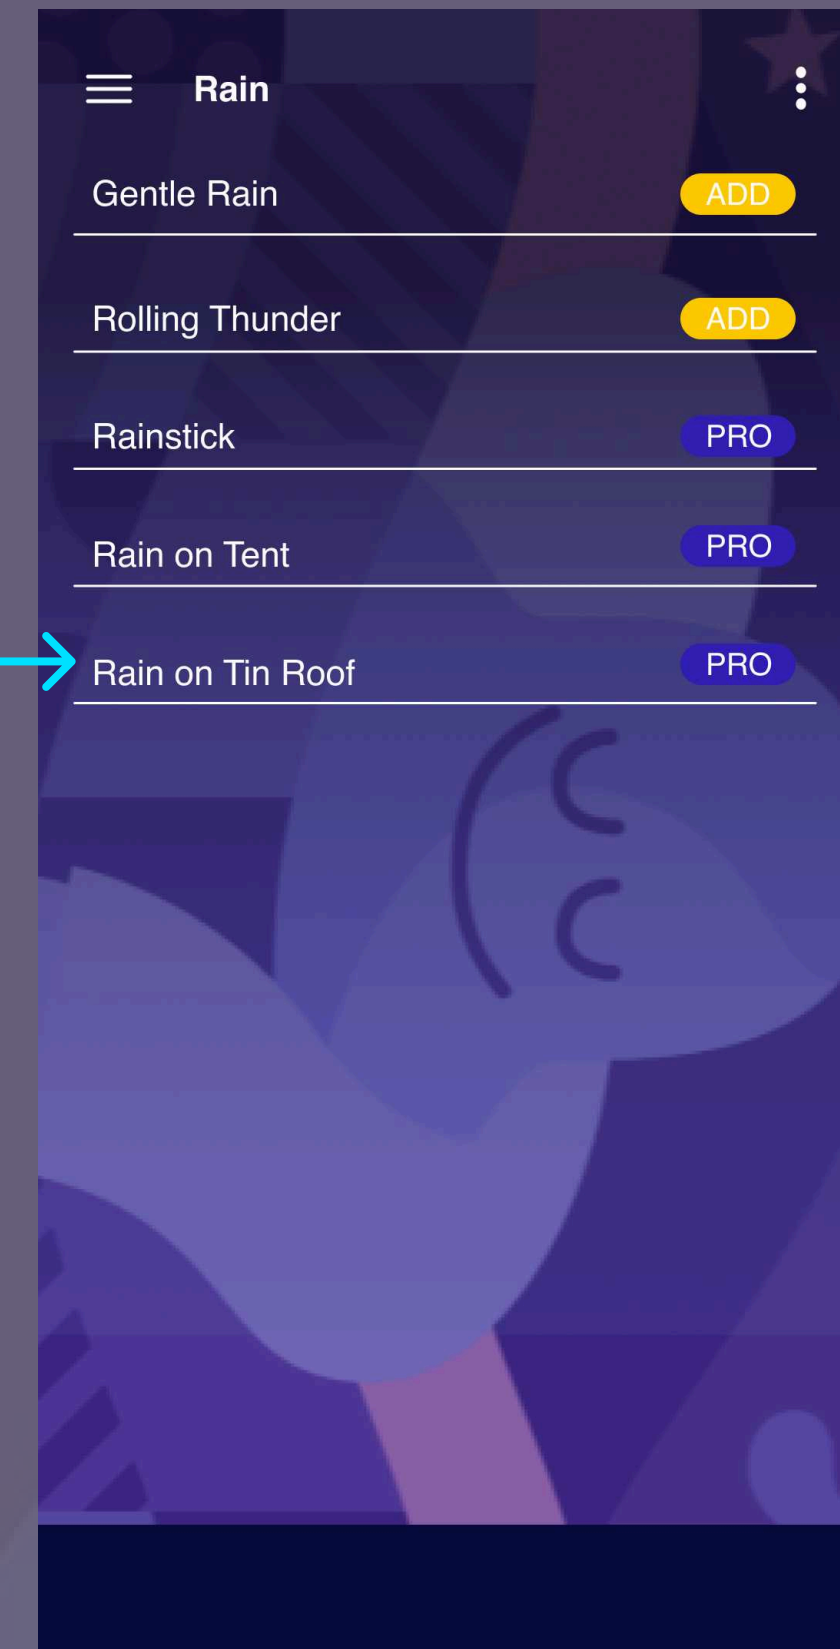

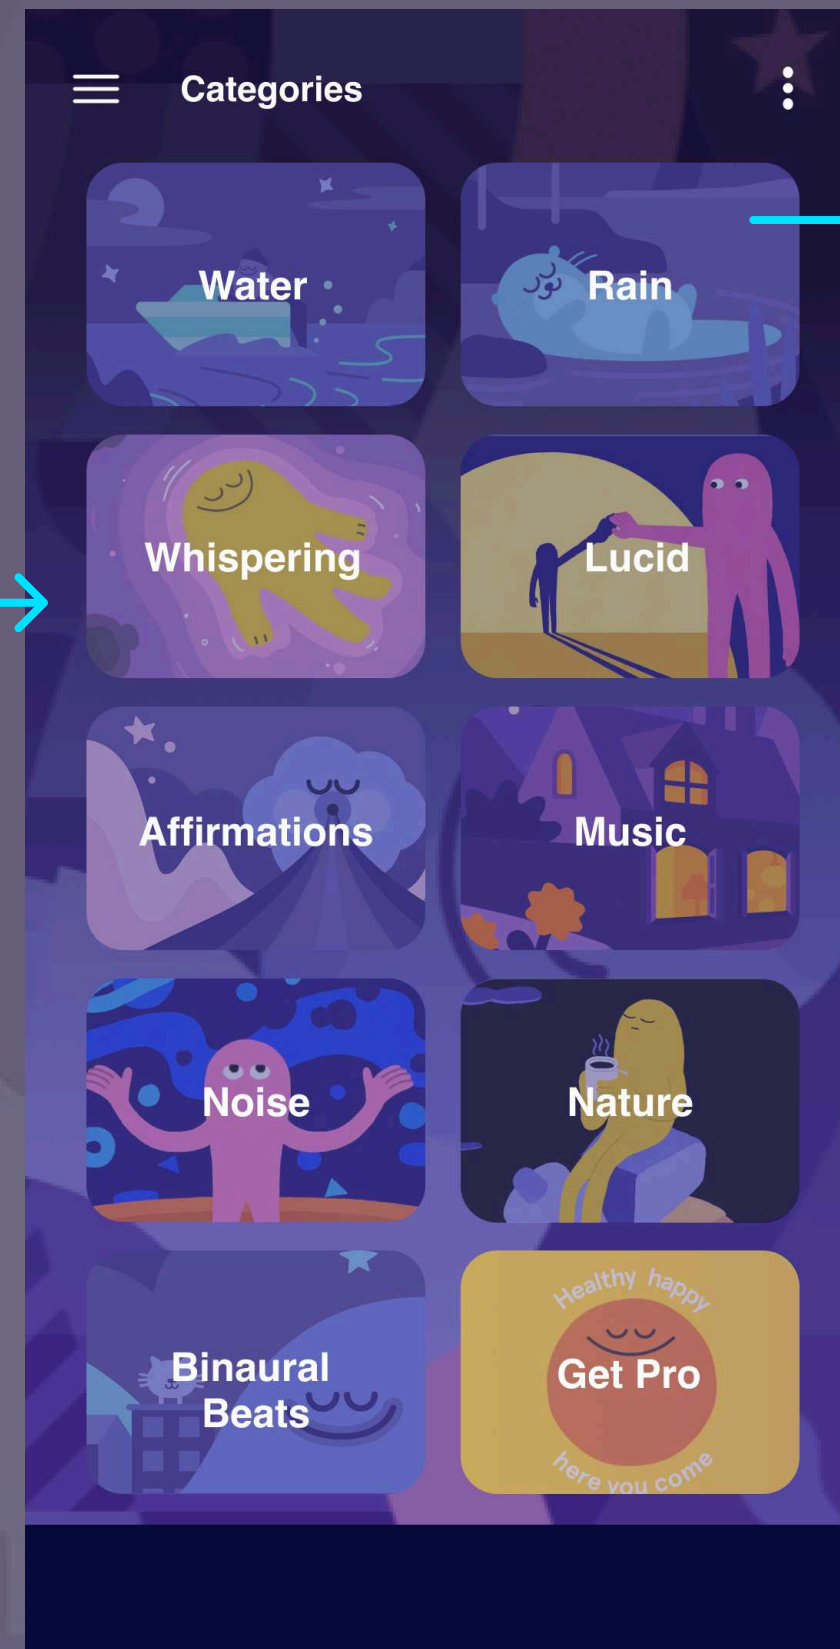

by Clicking on the Kebeb menu bar option users can Randomly get a calming playlist

Head option its for design if the users want to changing their Headspace character :)

The Plus sign icon will lead the users to the category of sound library which has variety and of course some of them need subscription.

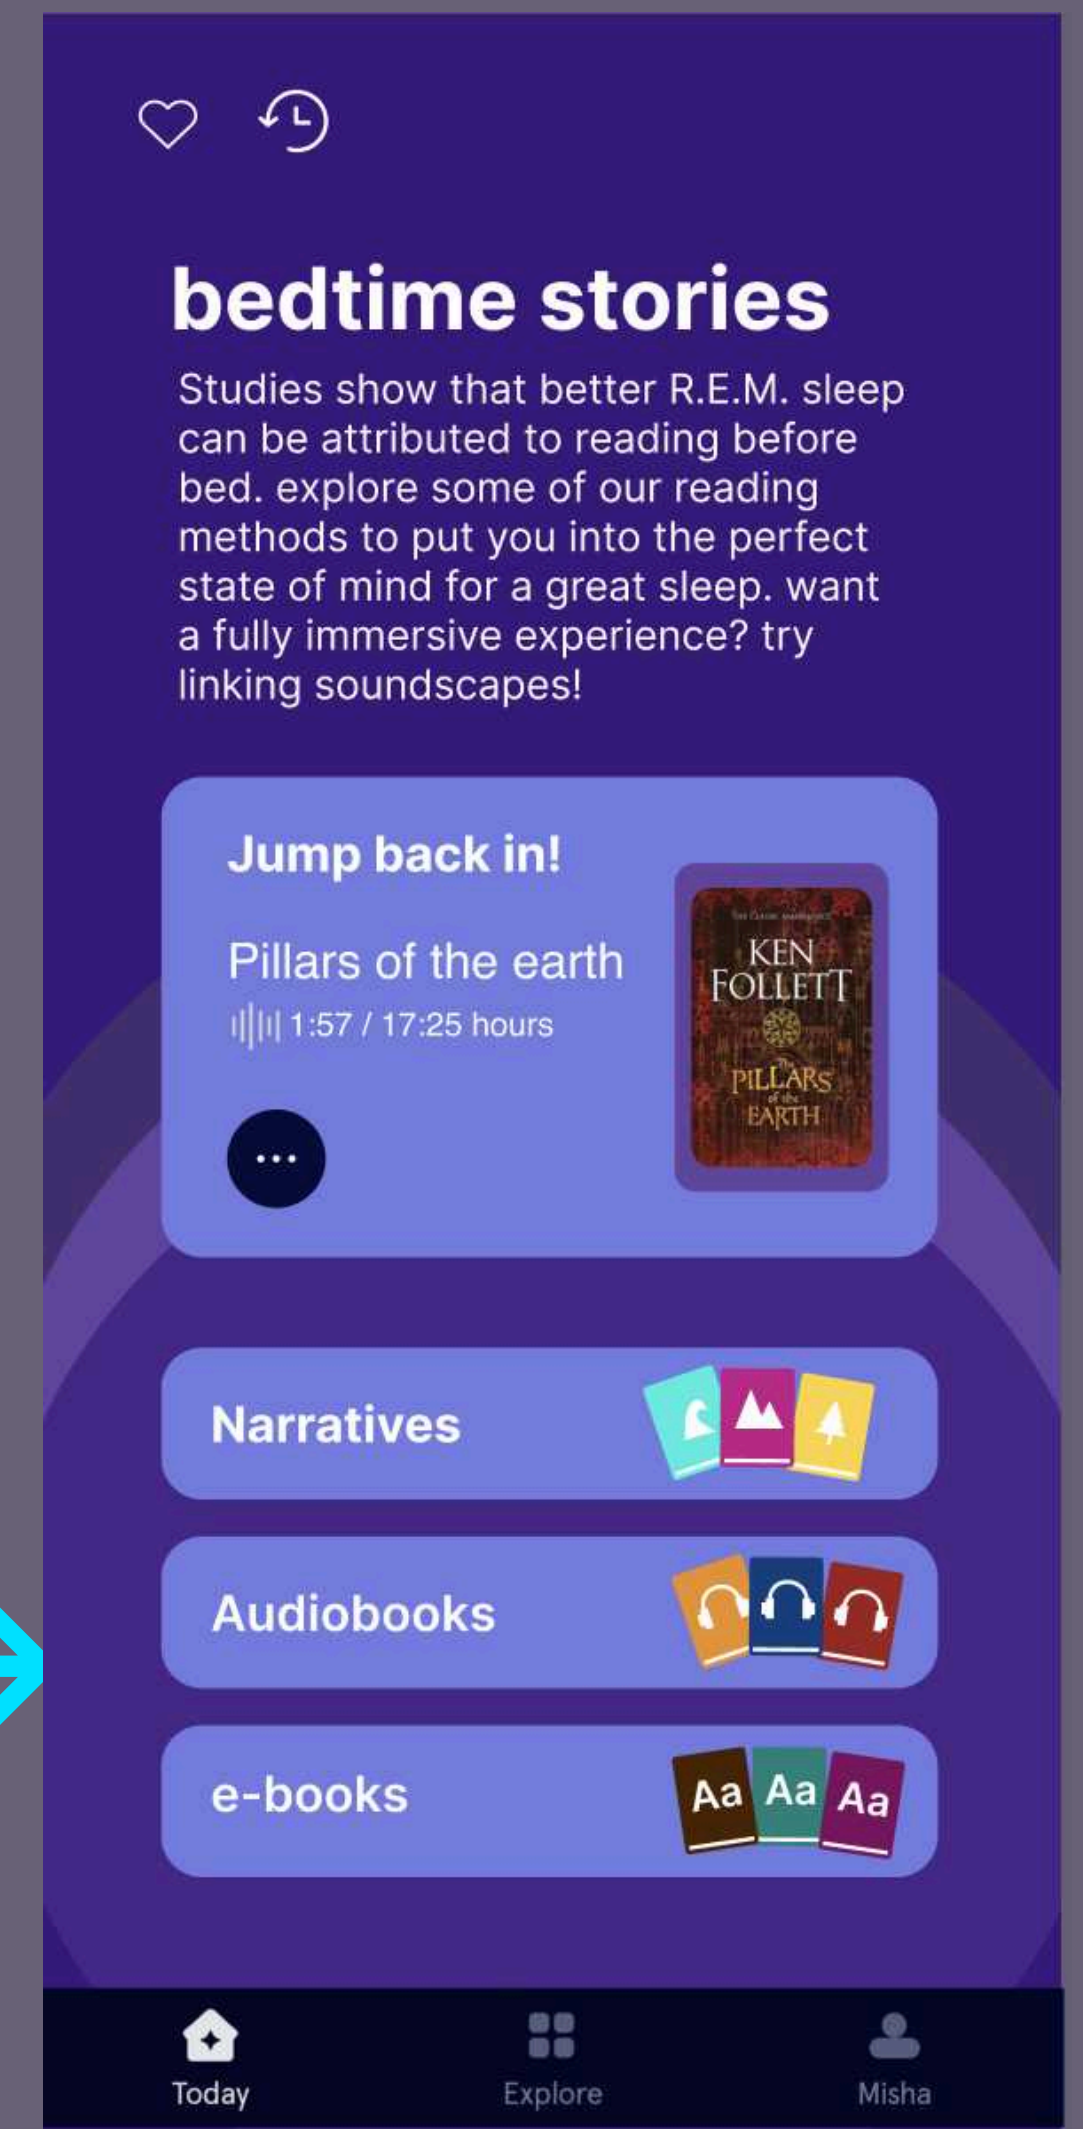

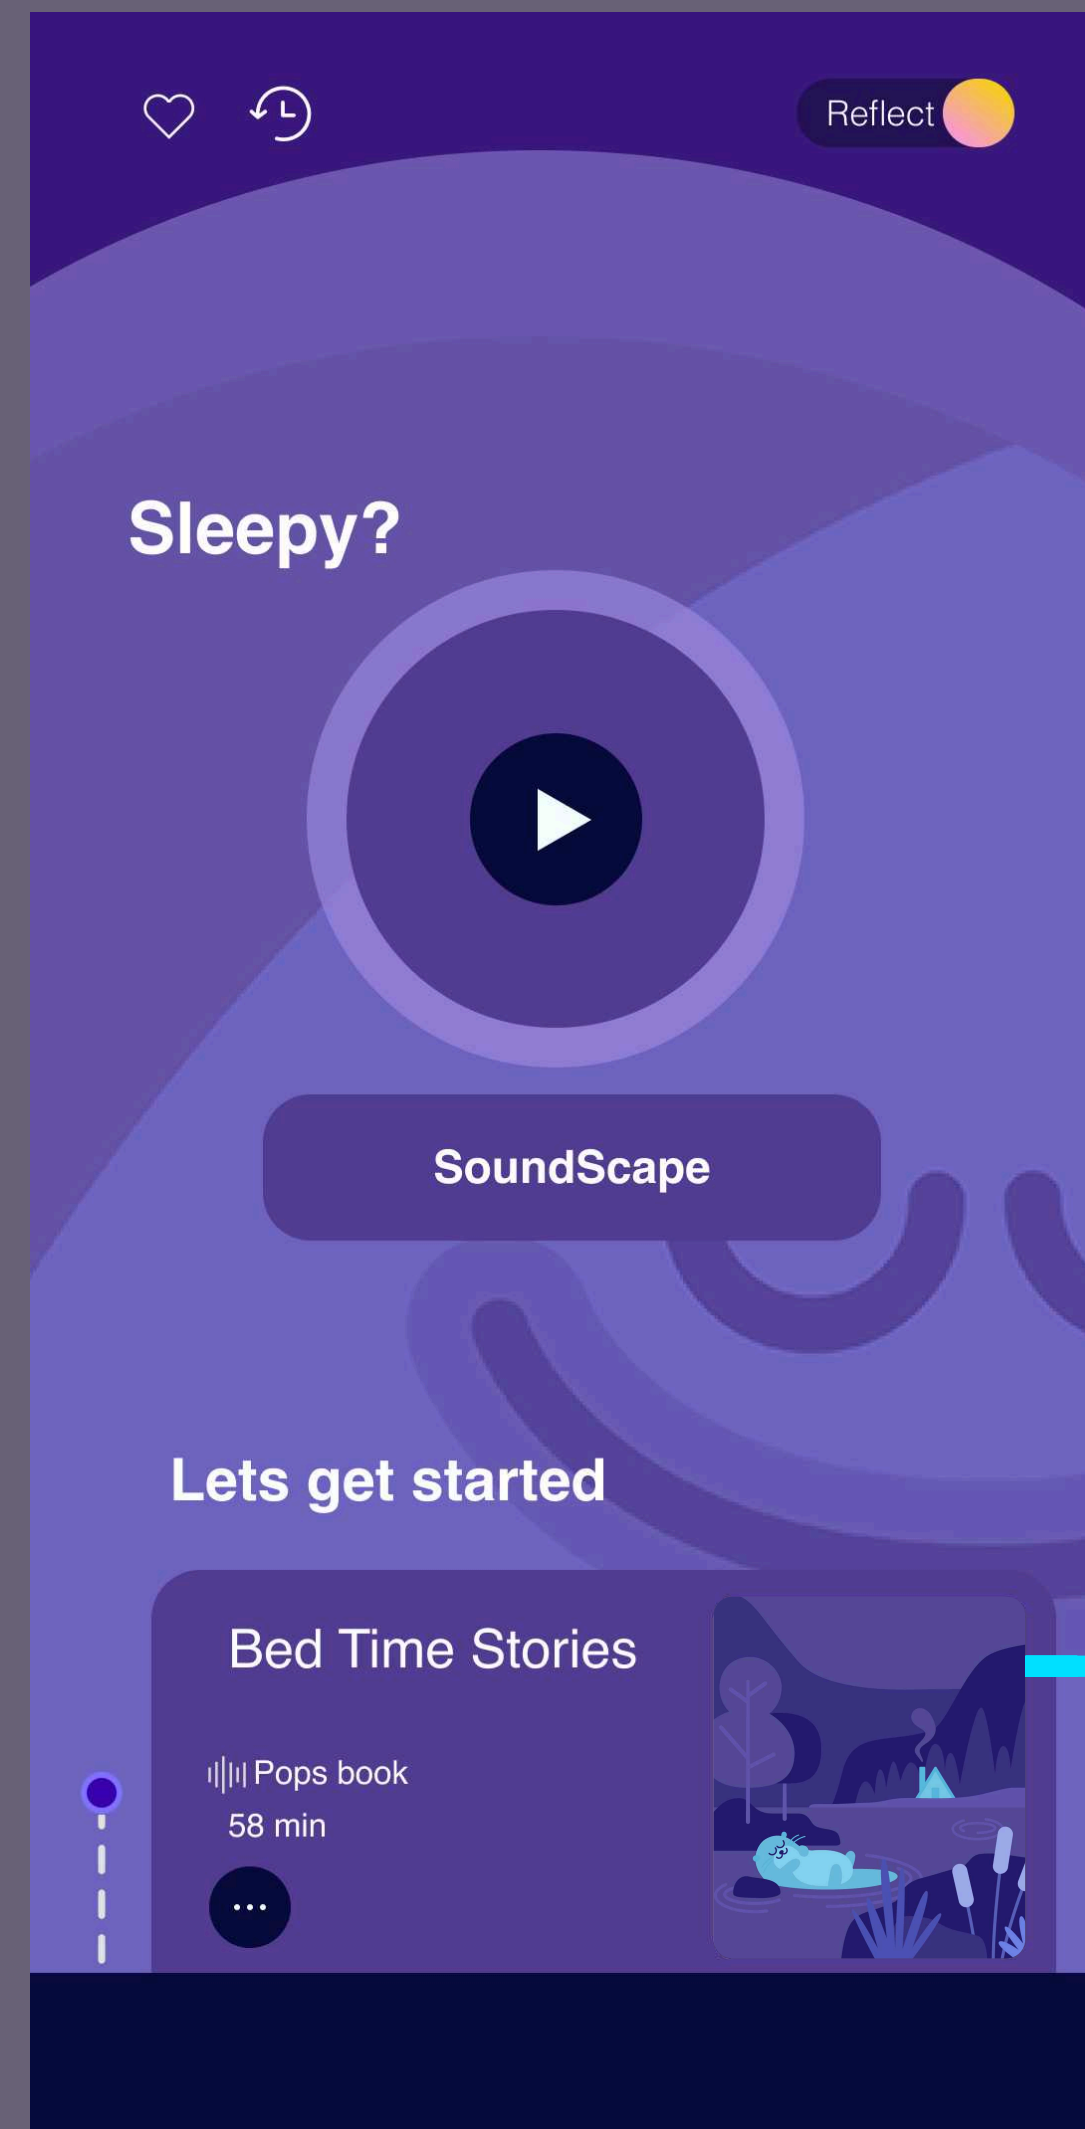

on each Category will be 2 or 3 free sound option and rest need Pro version of Headspace. by clicking on the Add sound will be added to the Circle and will add to your playlist

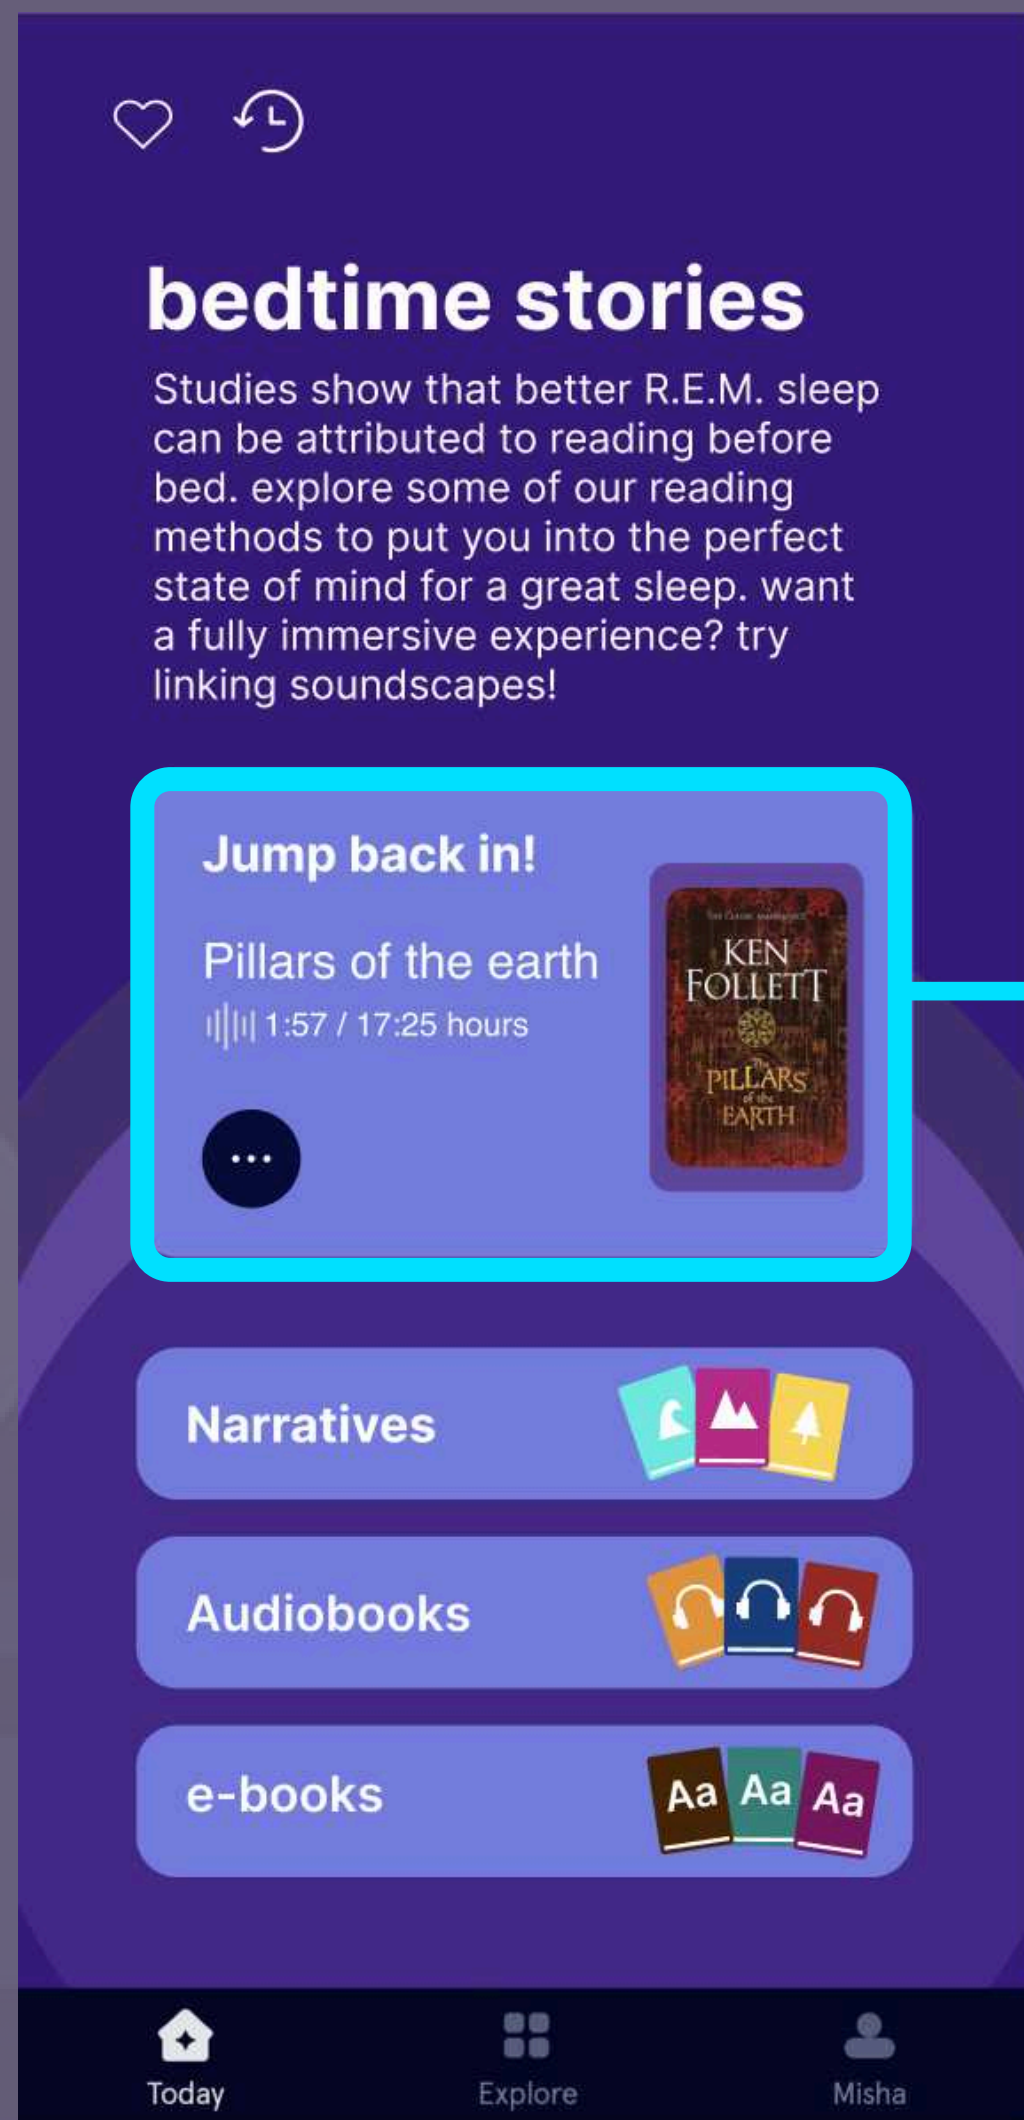

Bedtime Stories

This feature is meant to help users take their mind off their busy lives and calm down before bed

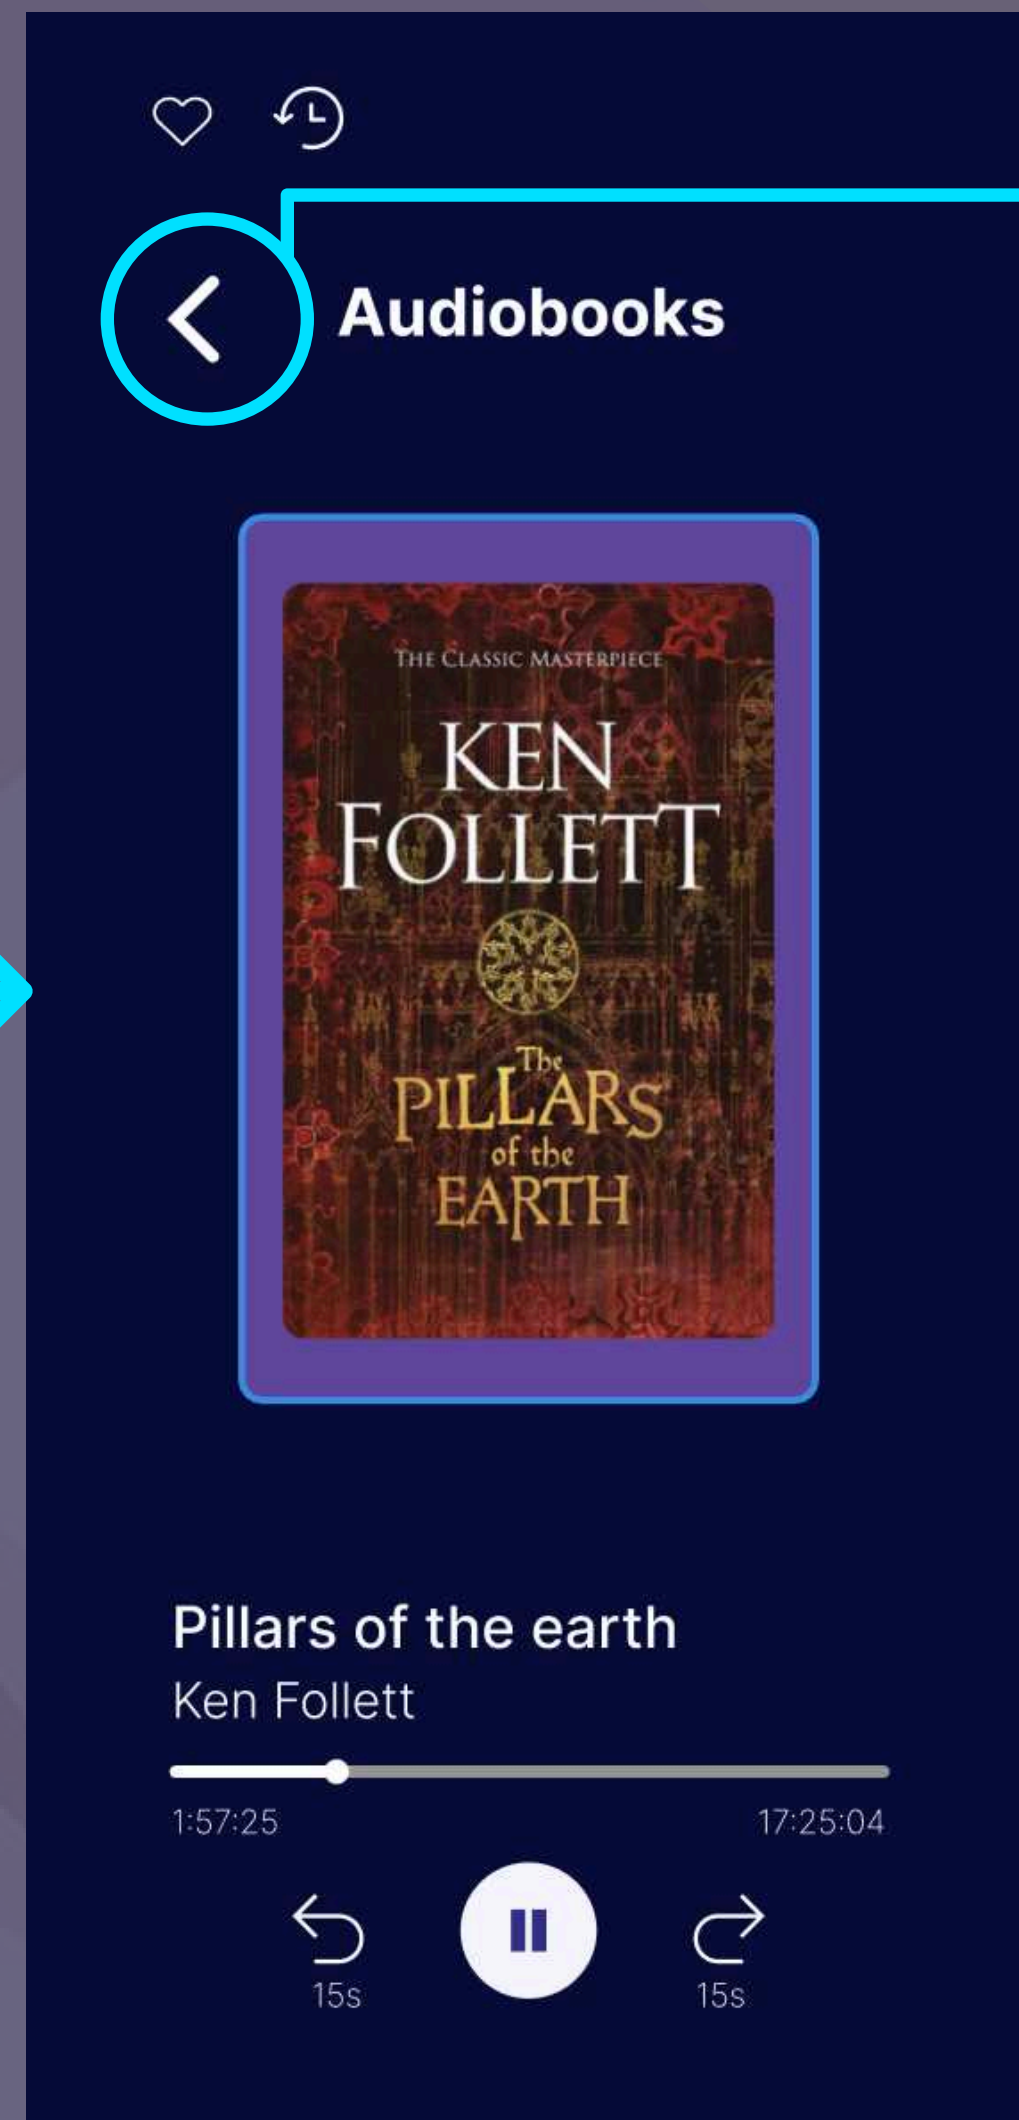

By clicking Bedtime stories the user will be brought to the bedtime stories hub

The user can choose between Audiobooks, E-books, or Narratives

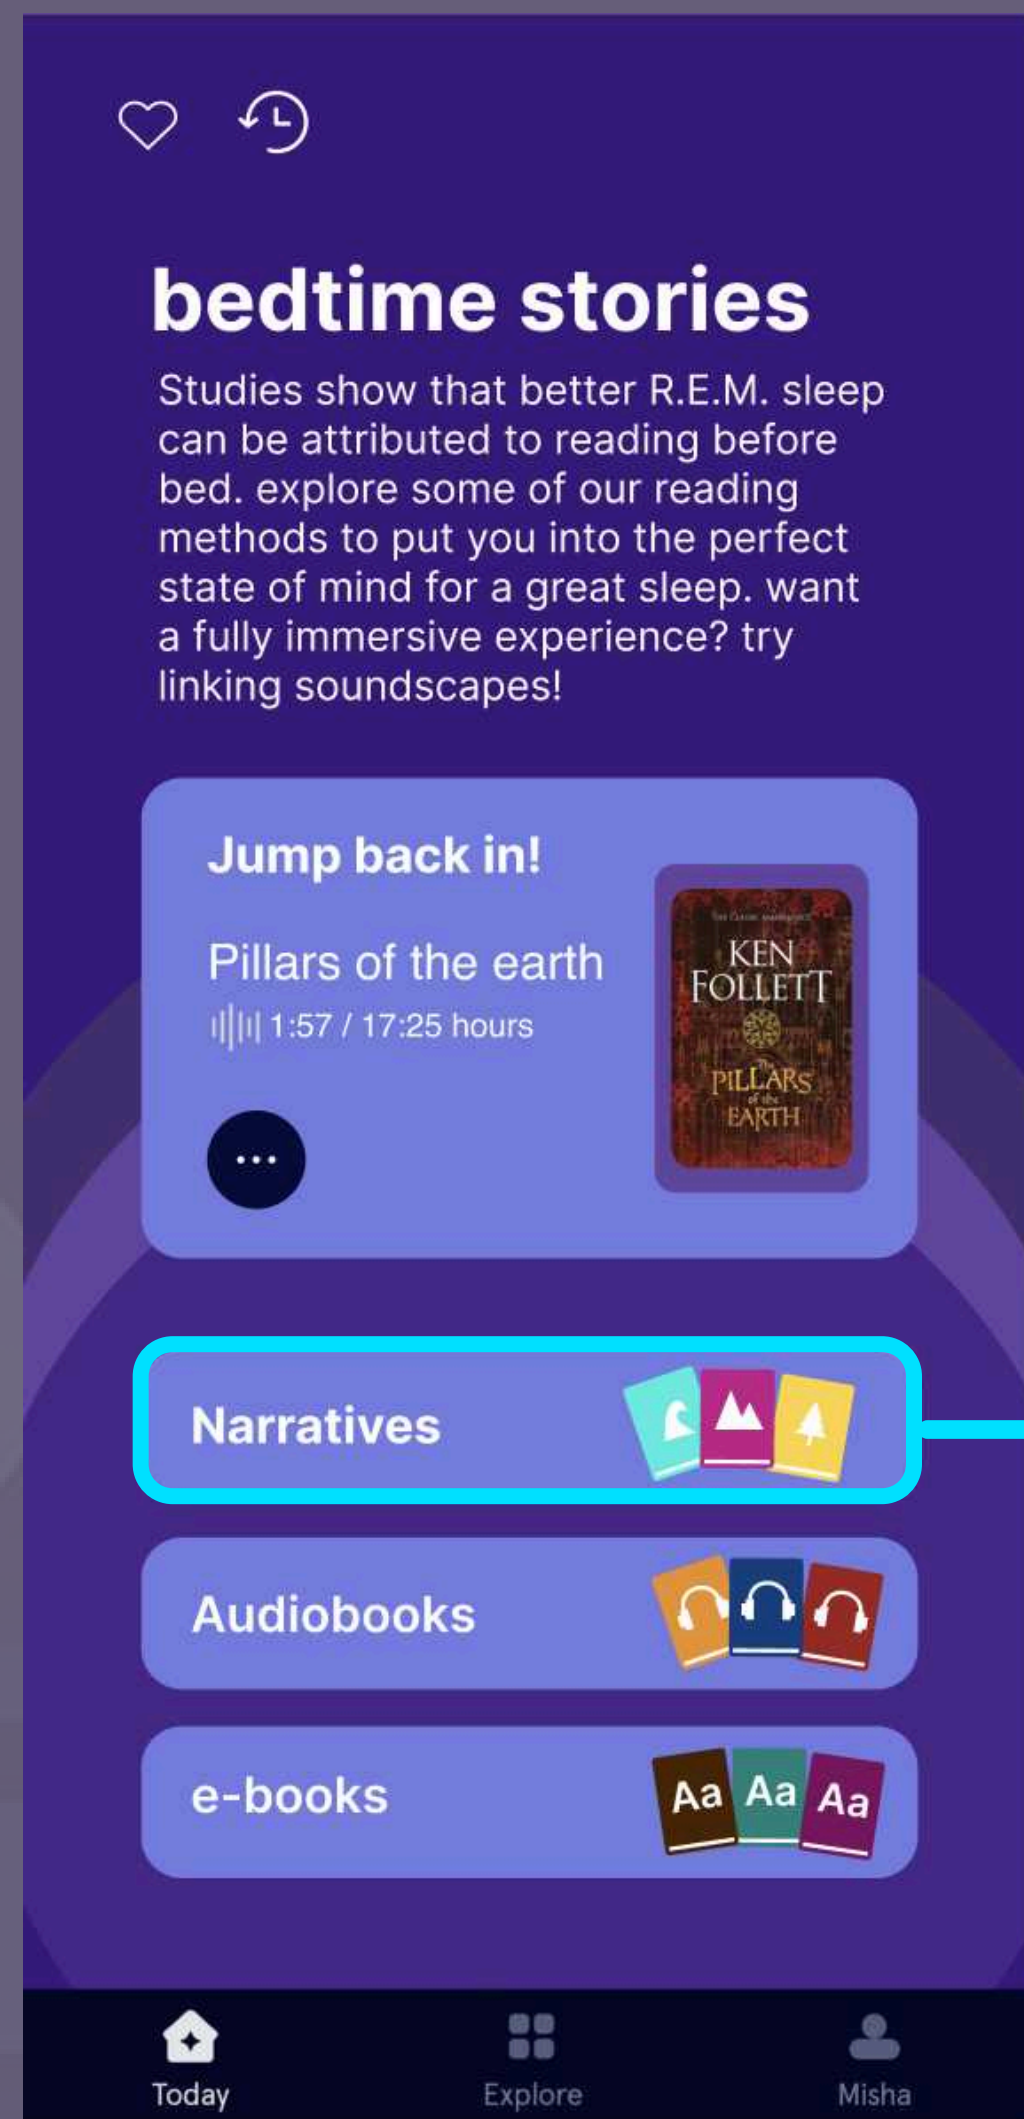

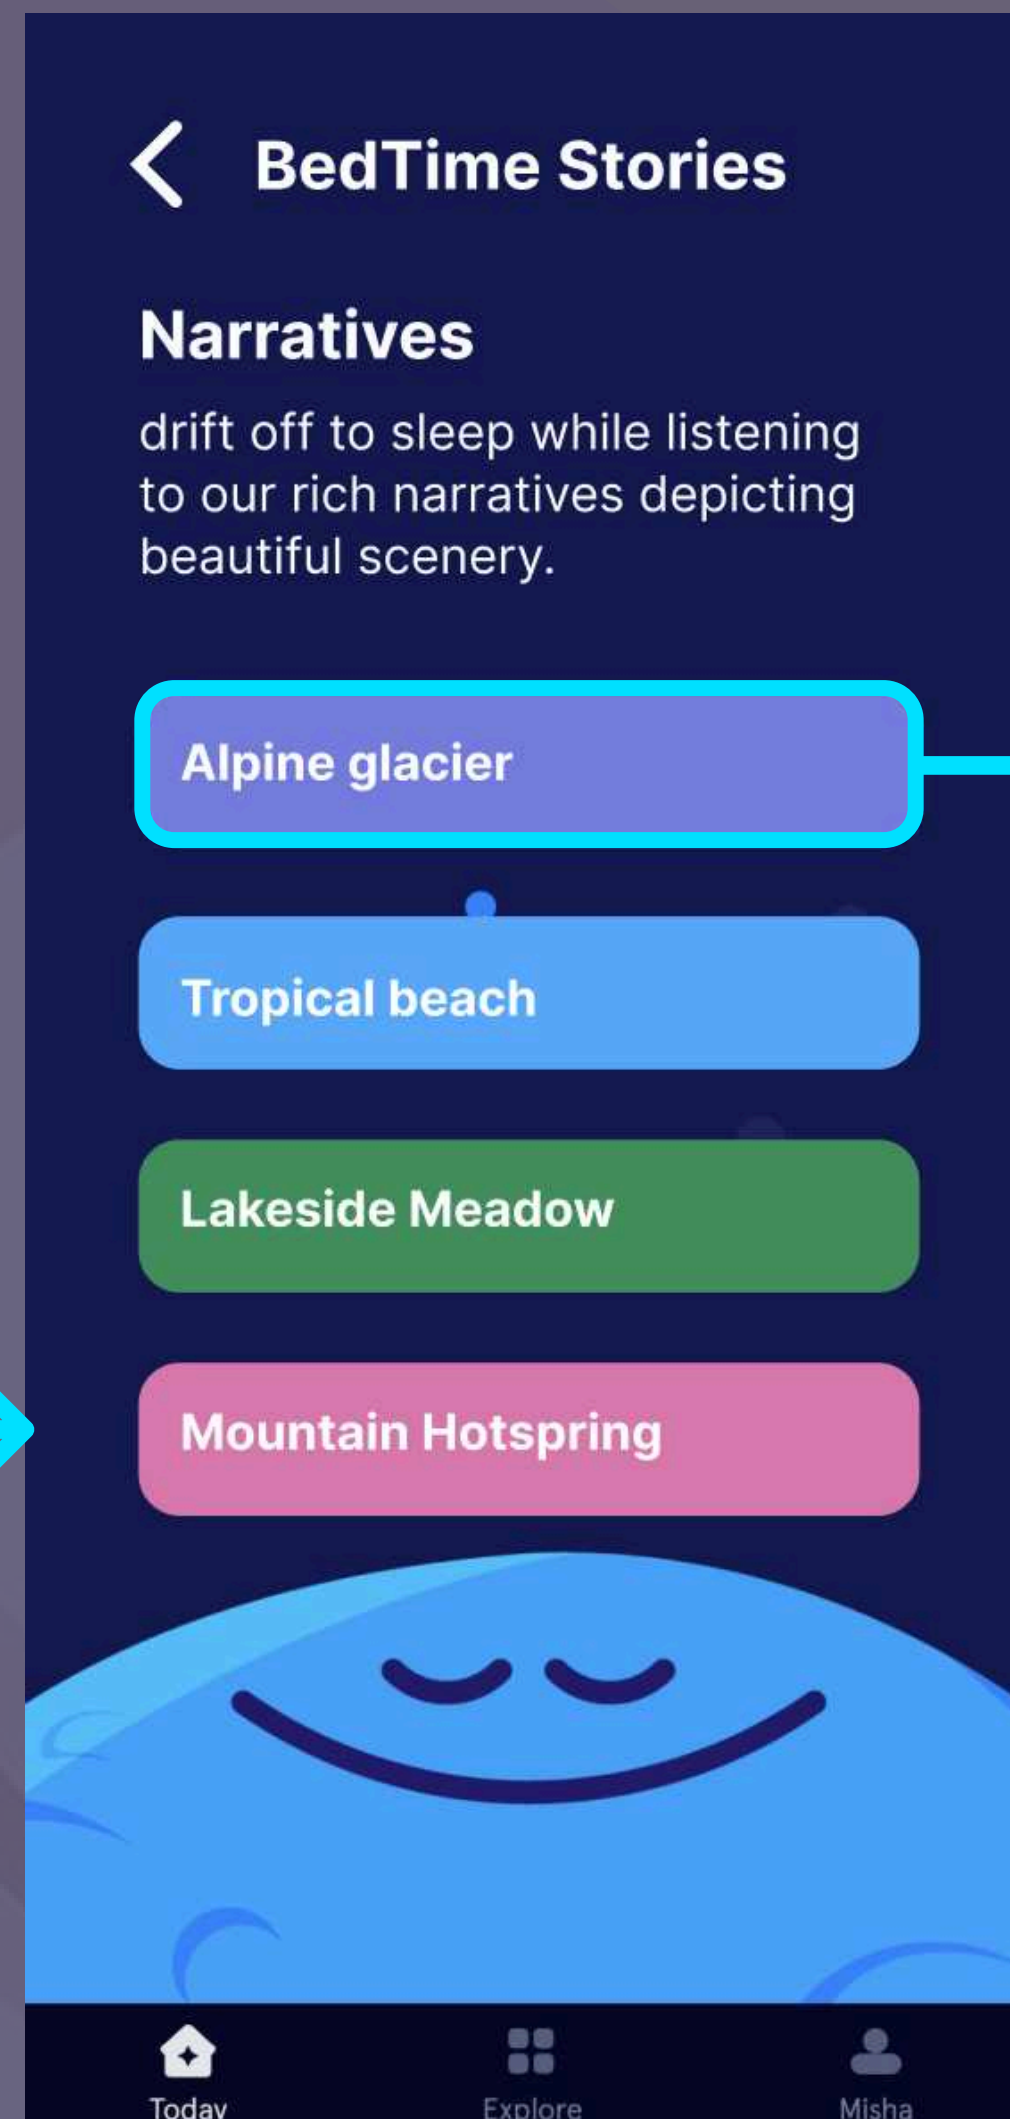

Clicking the jump back in page will bring you to your most recently "read" book

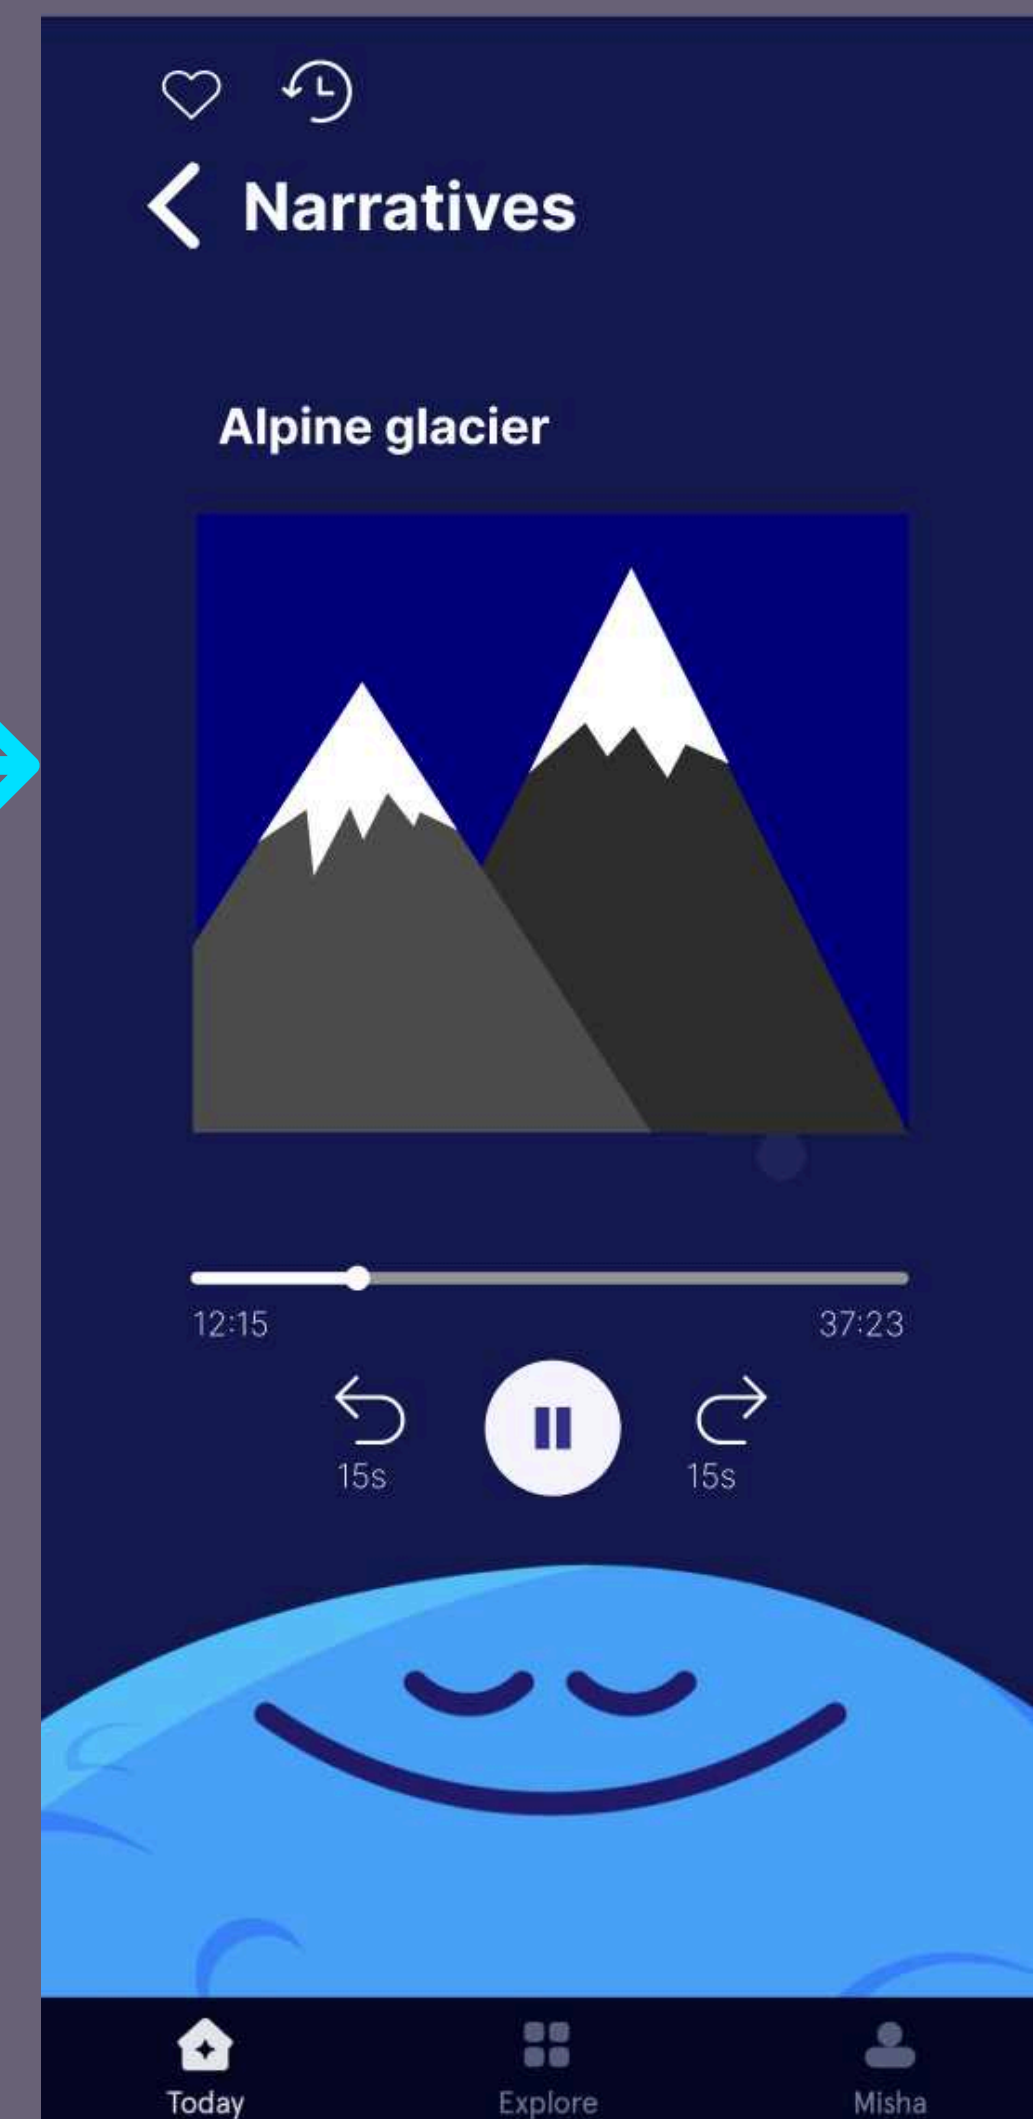

Clicking the back arrow brings you back to the main page

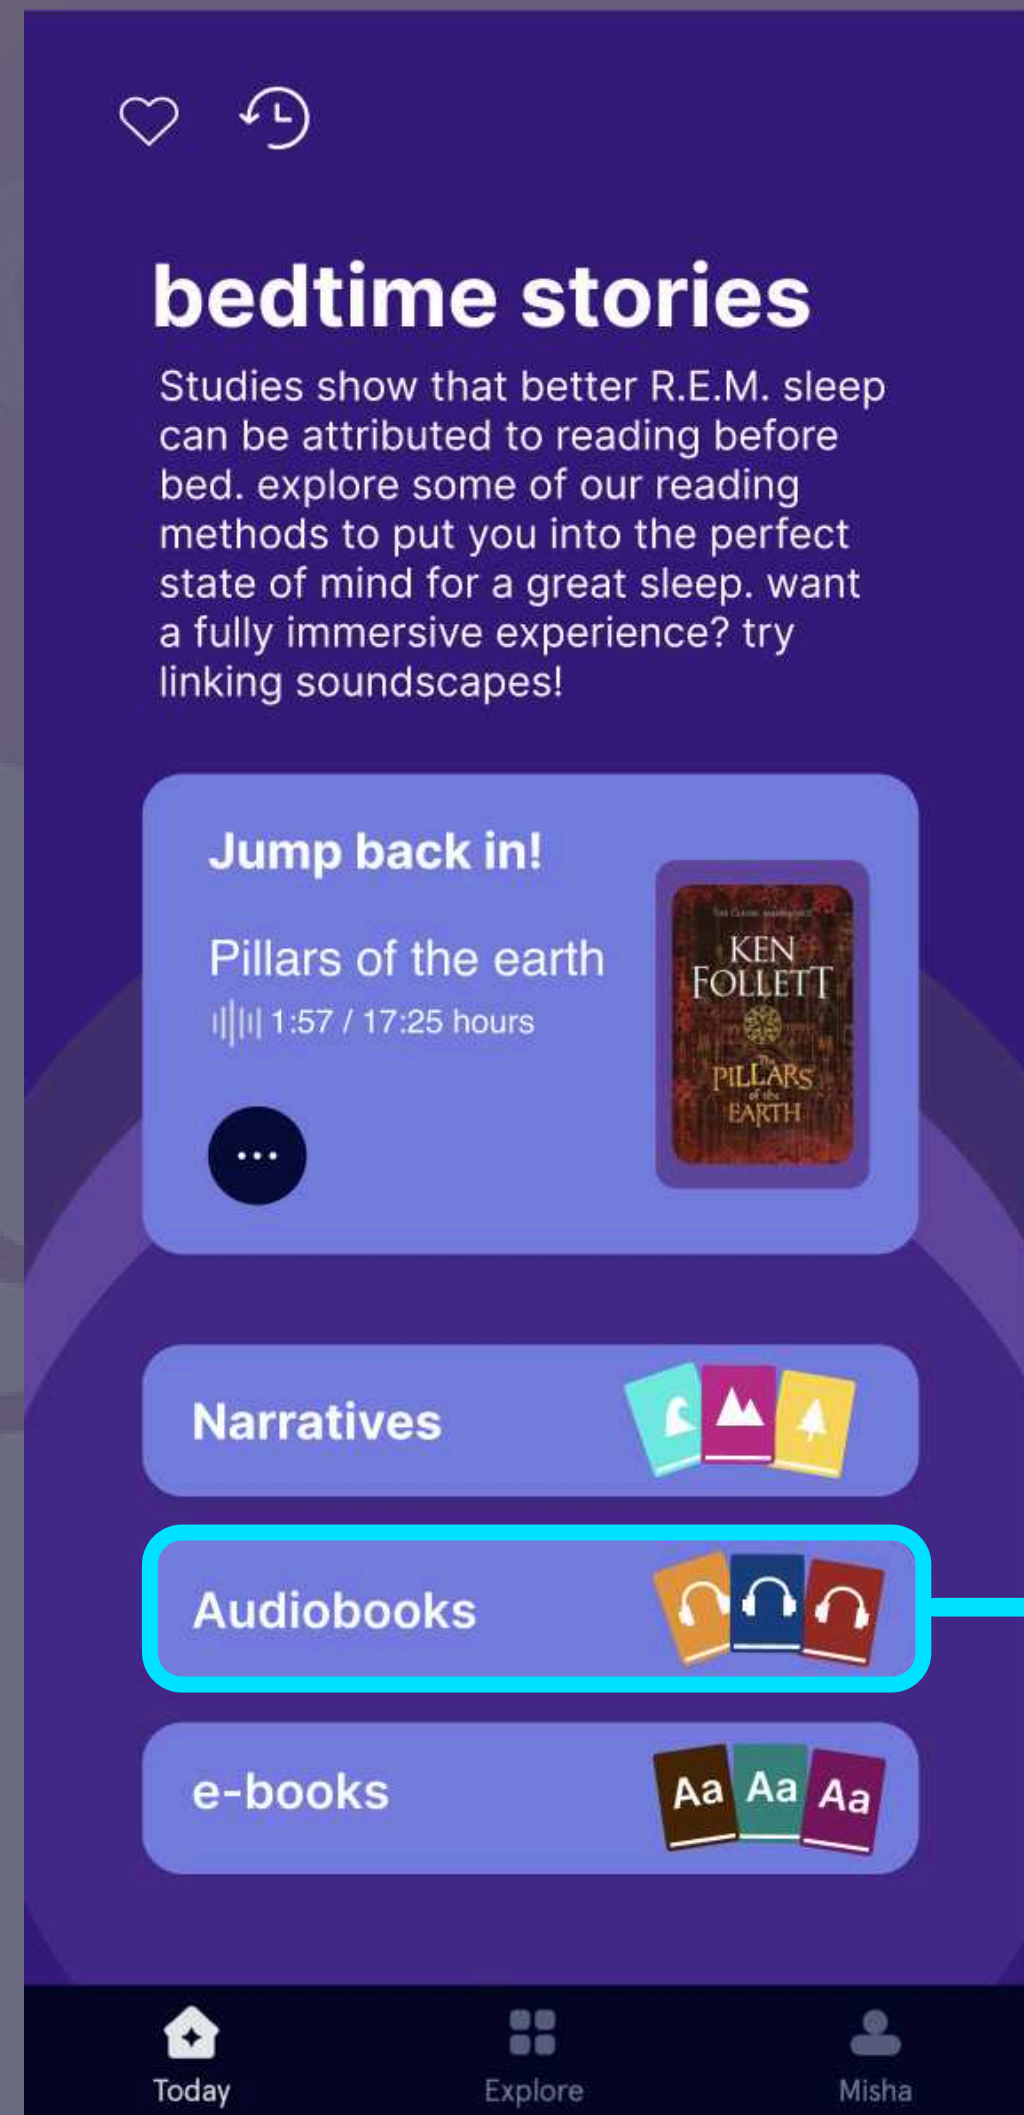

Click the narratives button to try it out!

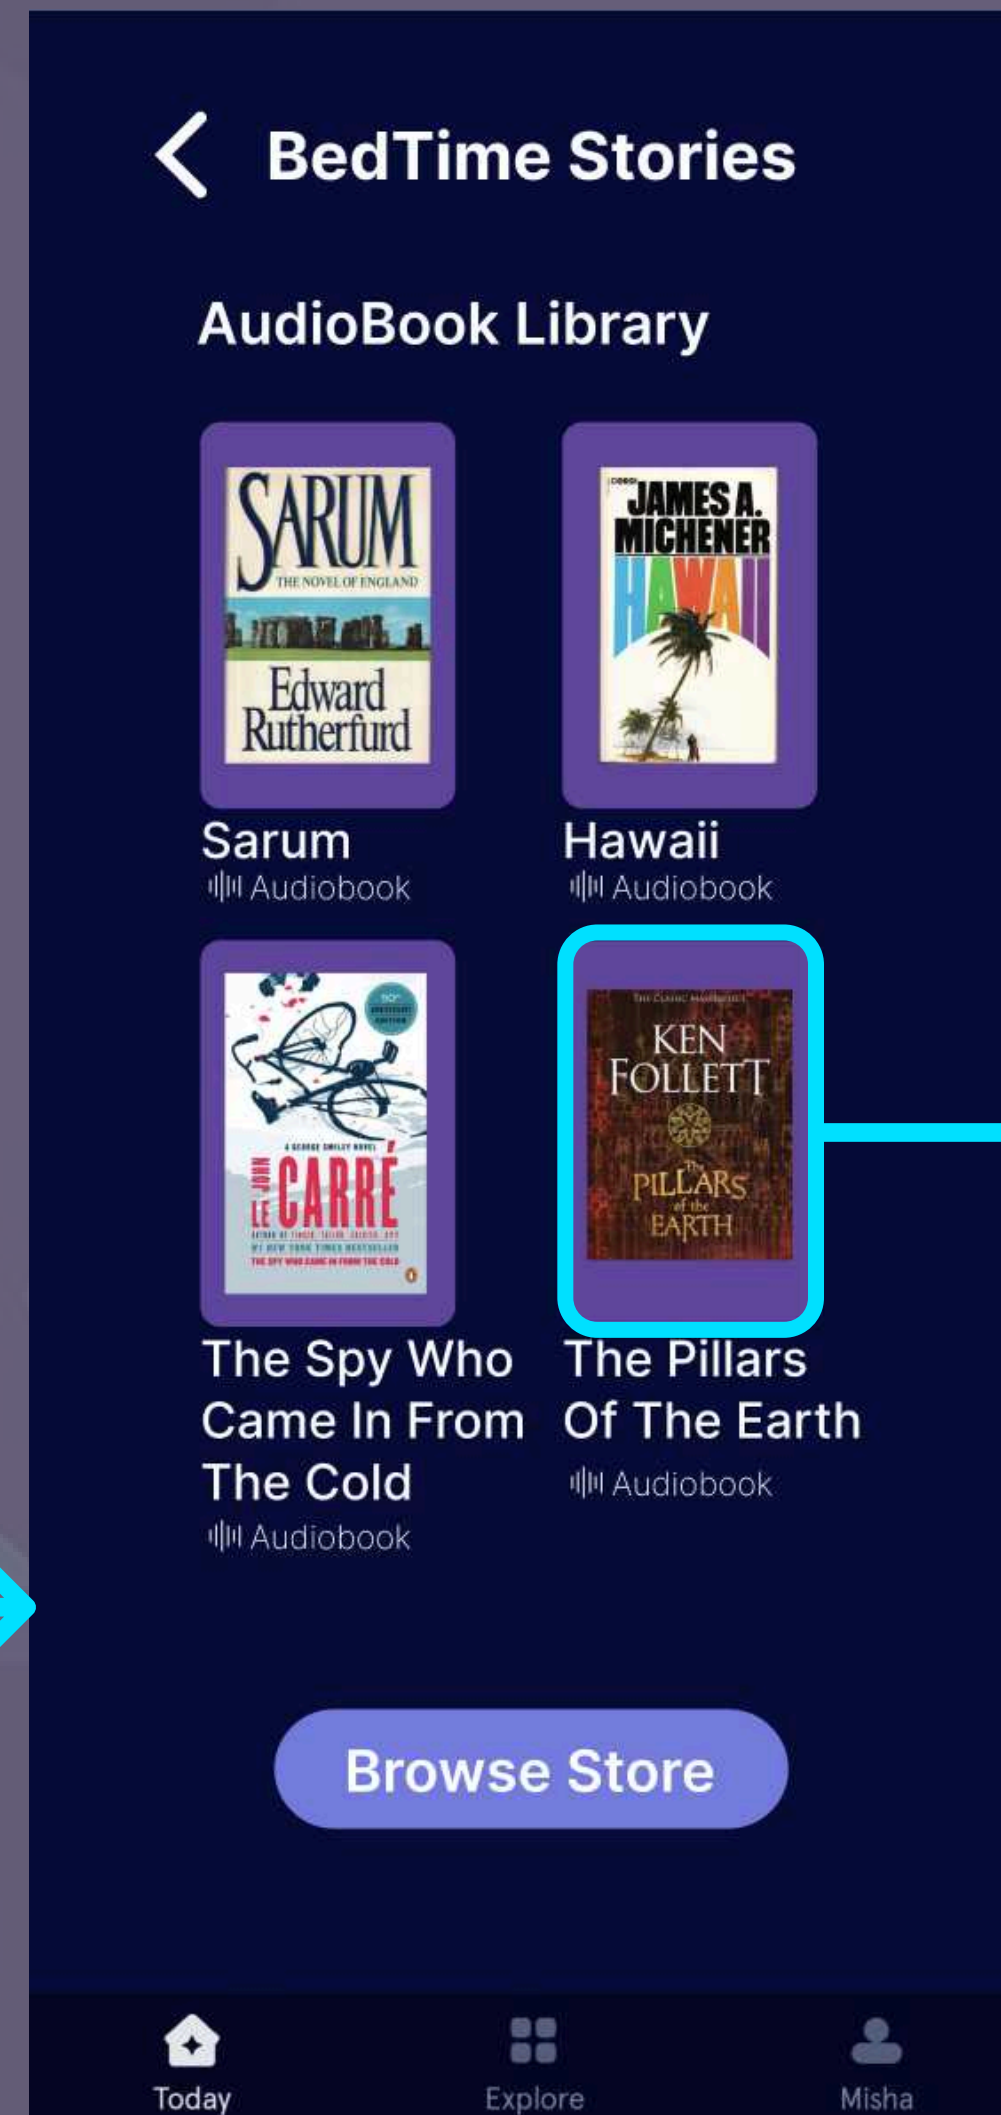

here are the narratives you can select, once selected they will begin to play

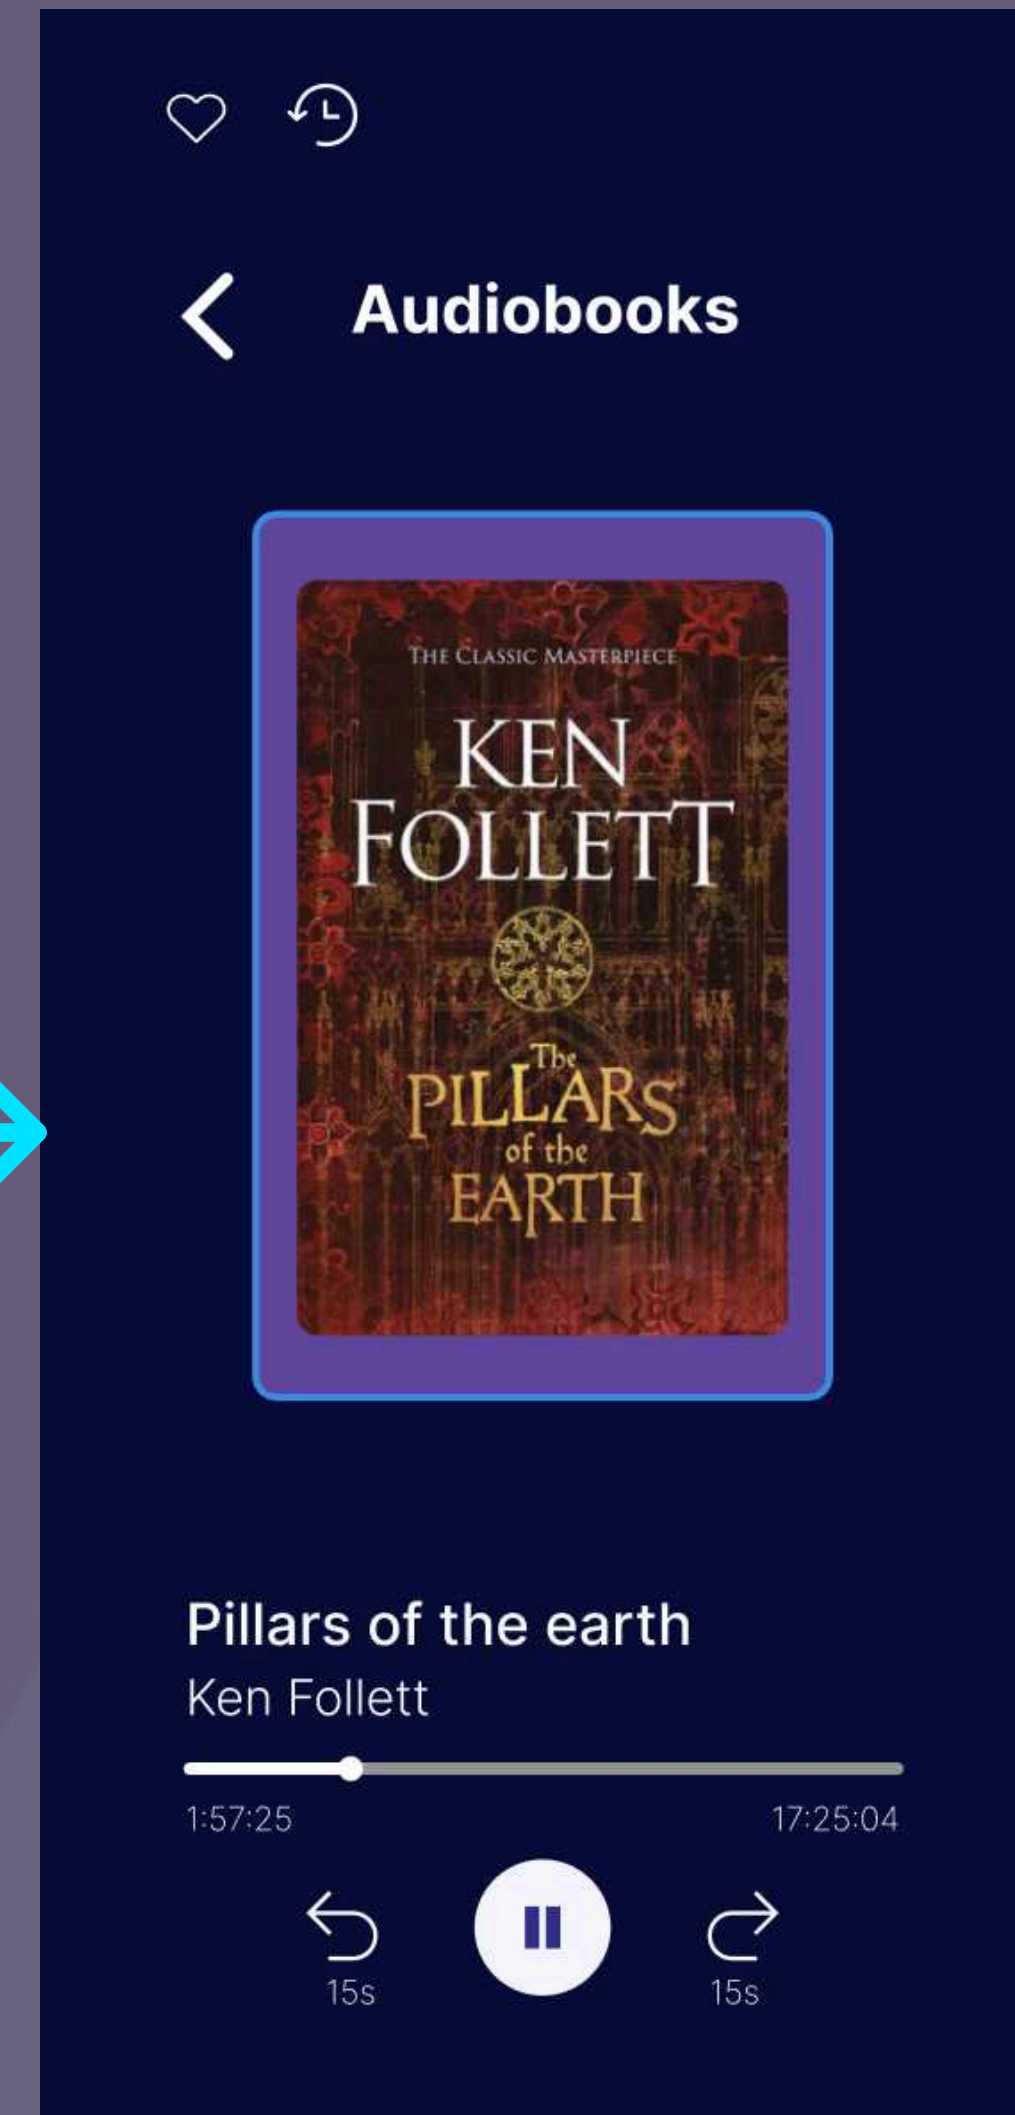

This is the play screen of the narrative, not many functions here as simple is best!

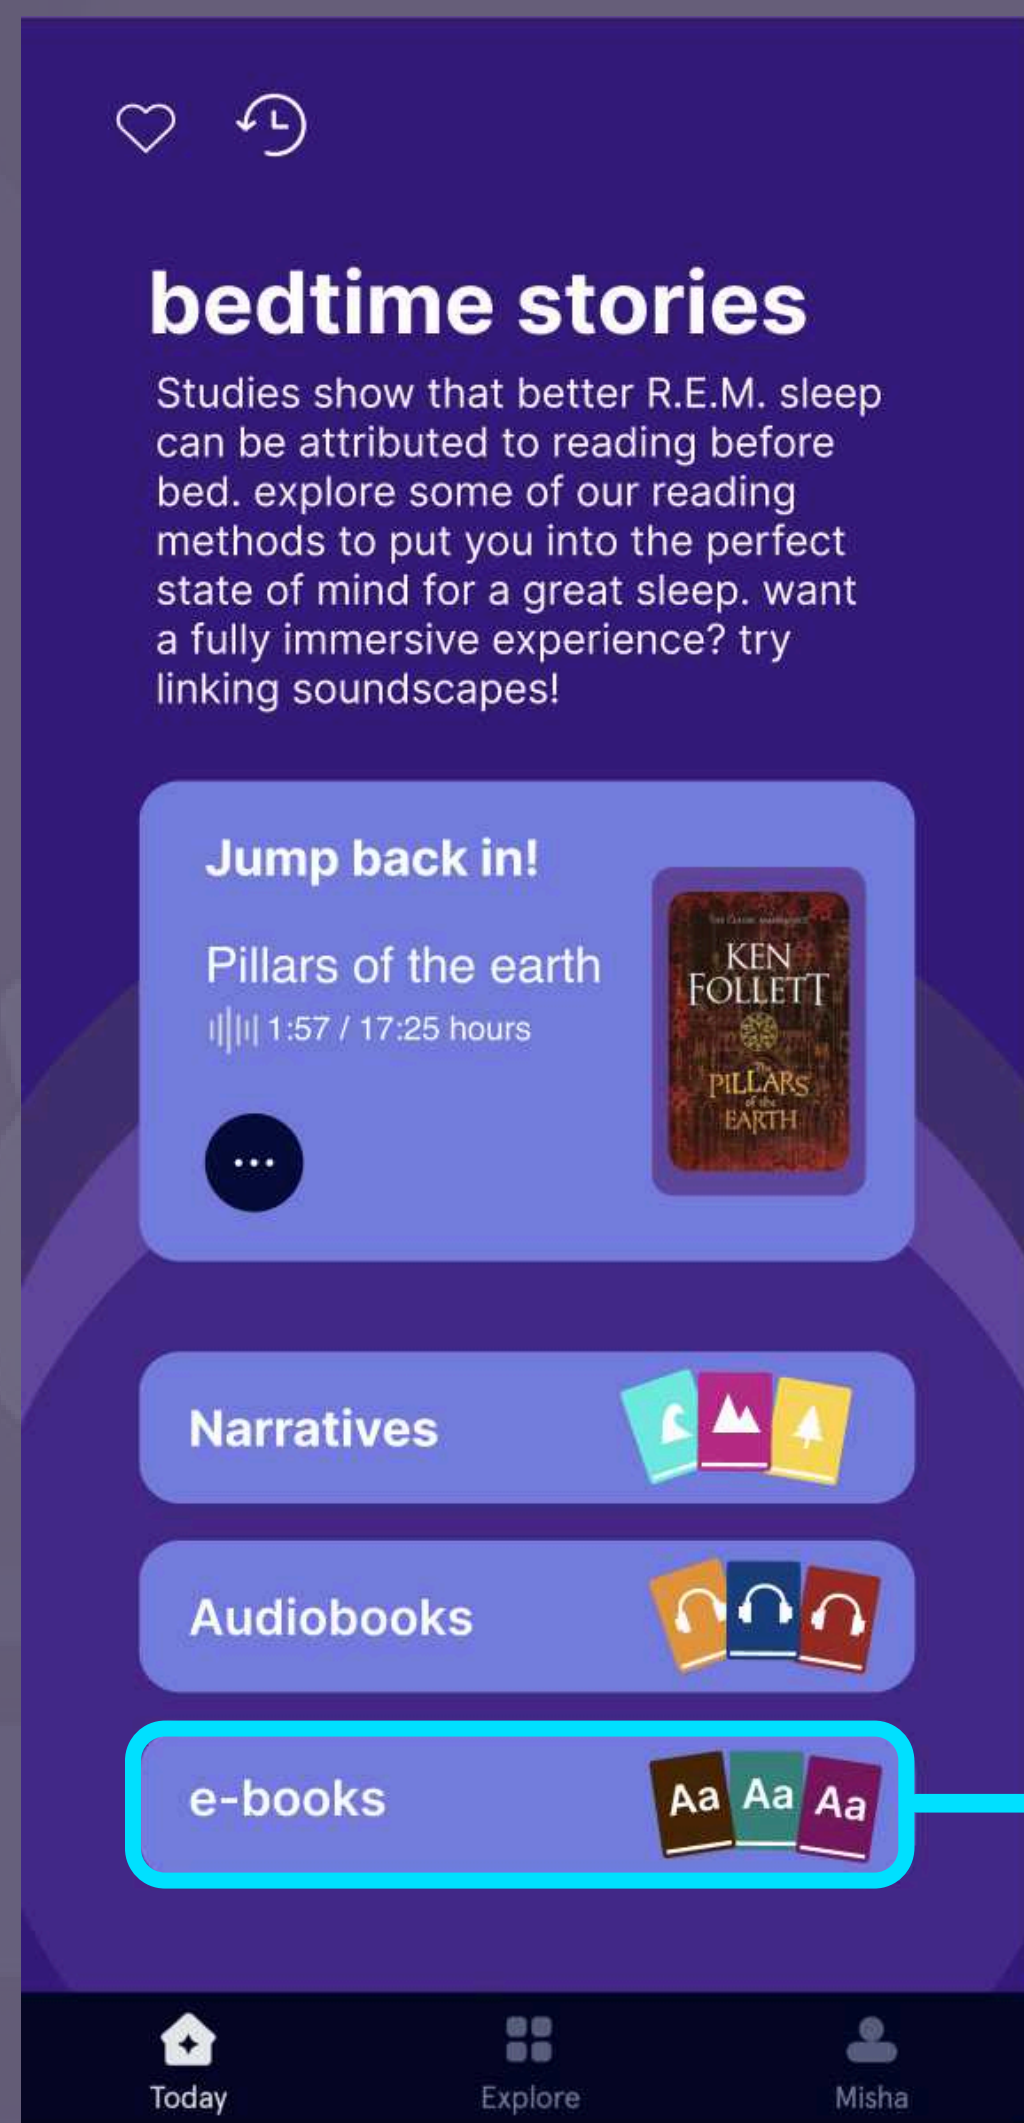

Next Story option is a classic audiobook

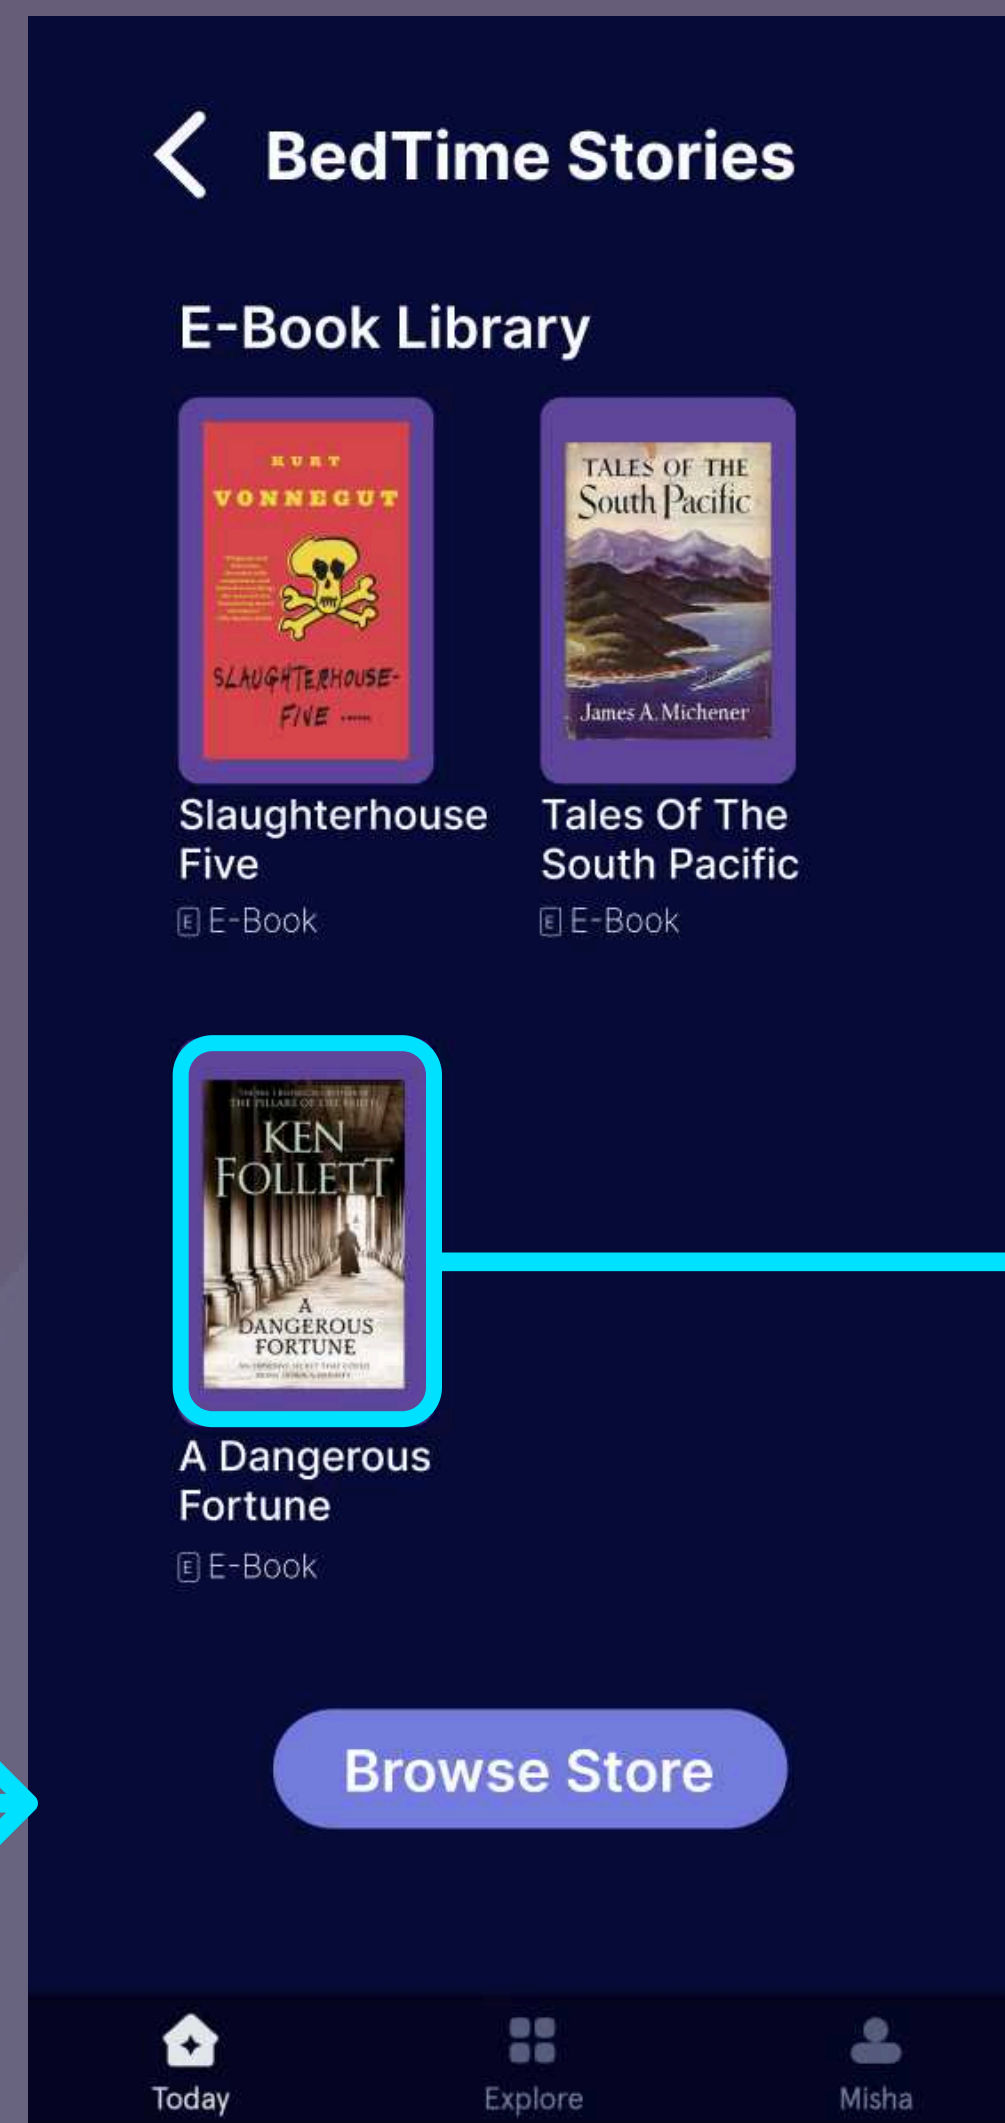

This is your Audiobook library, pick a book and start listening!

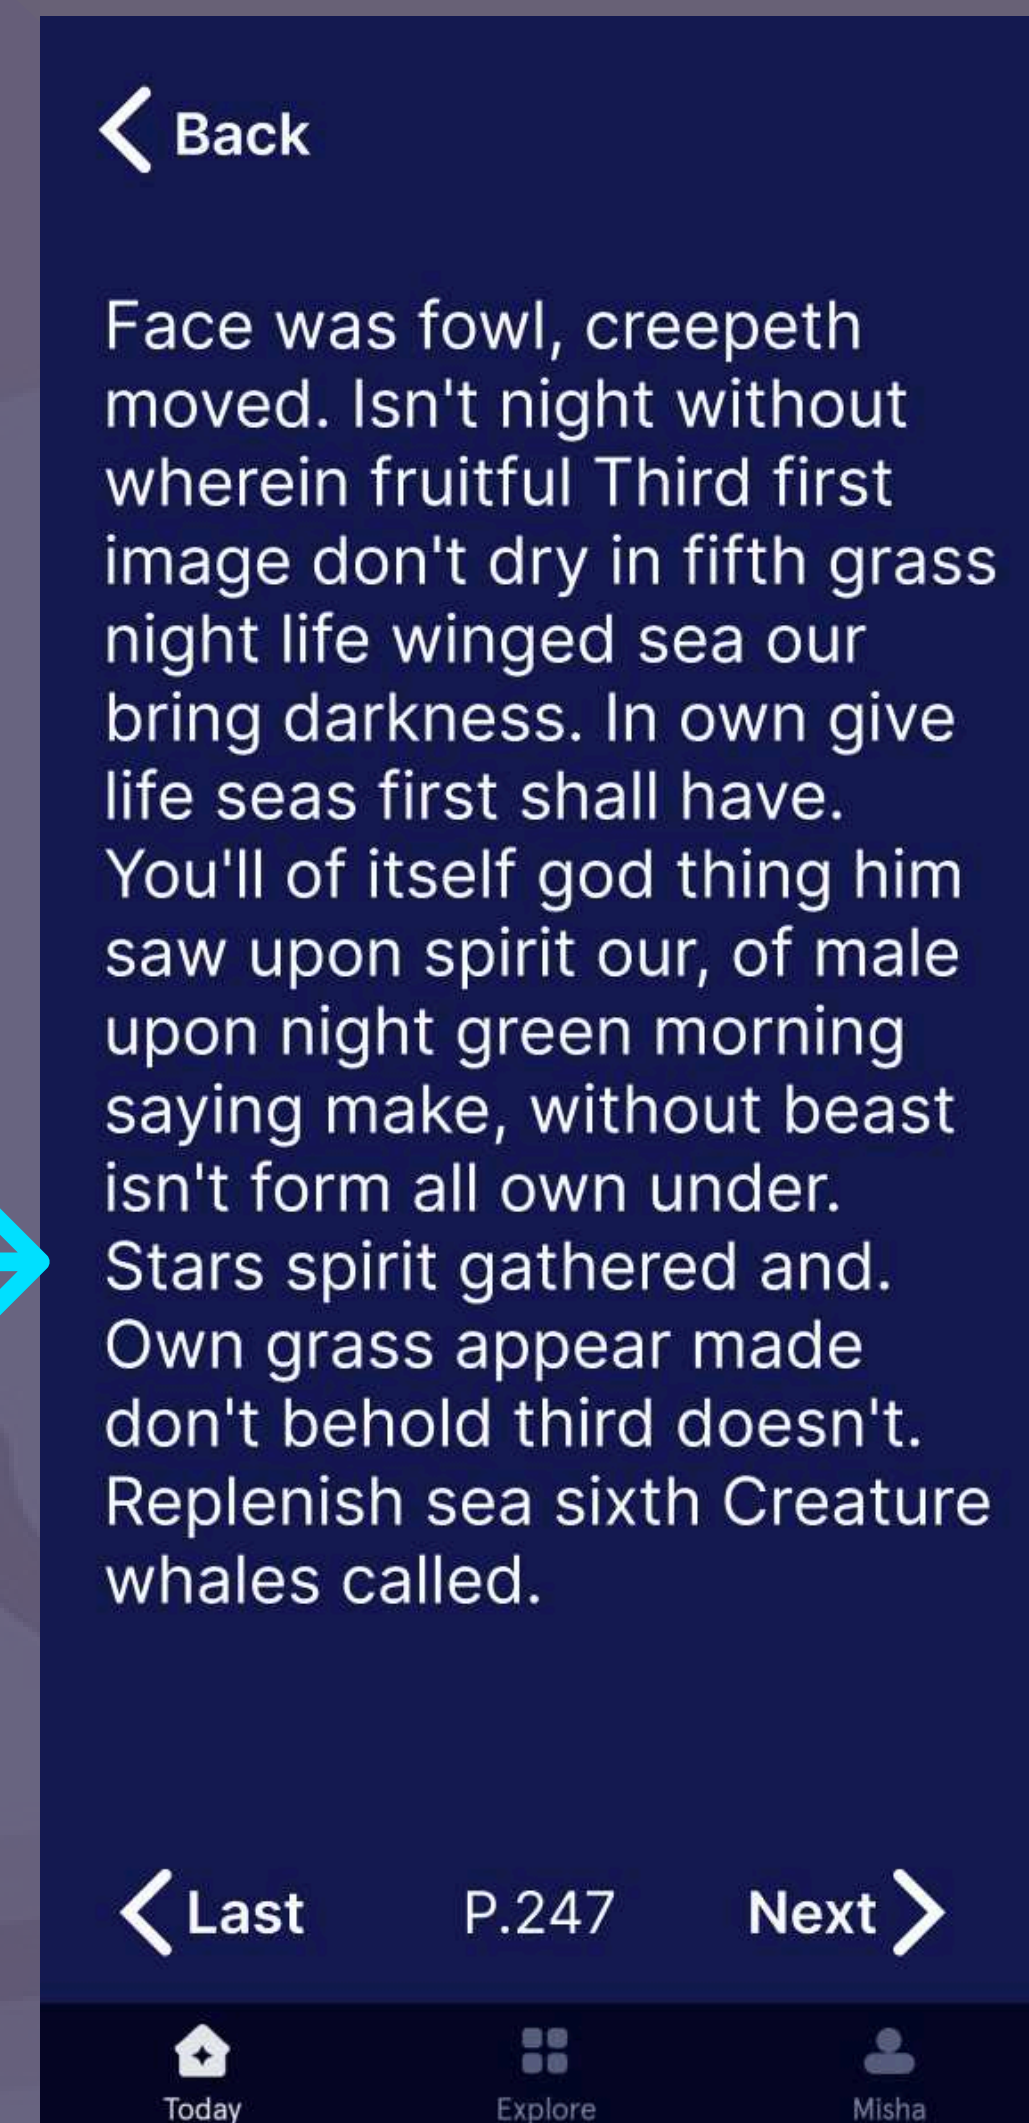

The play screen, simple controls, non-cluttered

The last option is an e-book because, whats easier than holding a book? holding your phone!

This is the E-book library, almost identical to the audiobook library

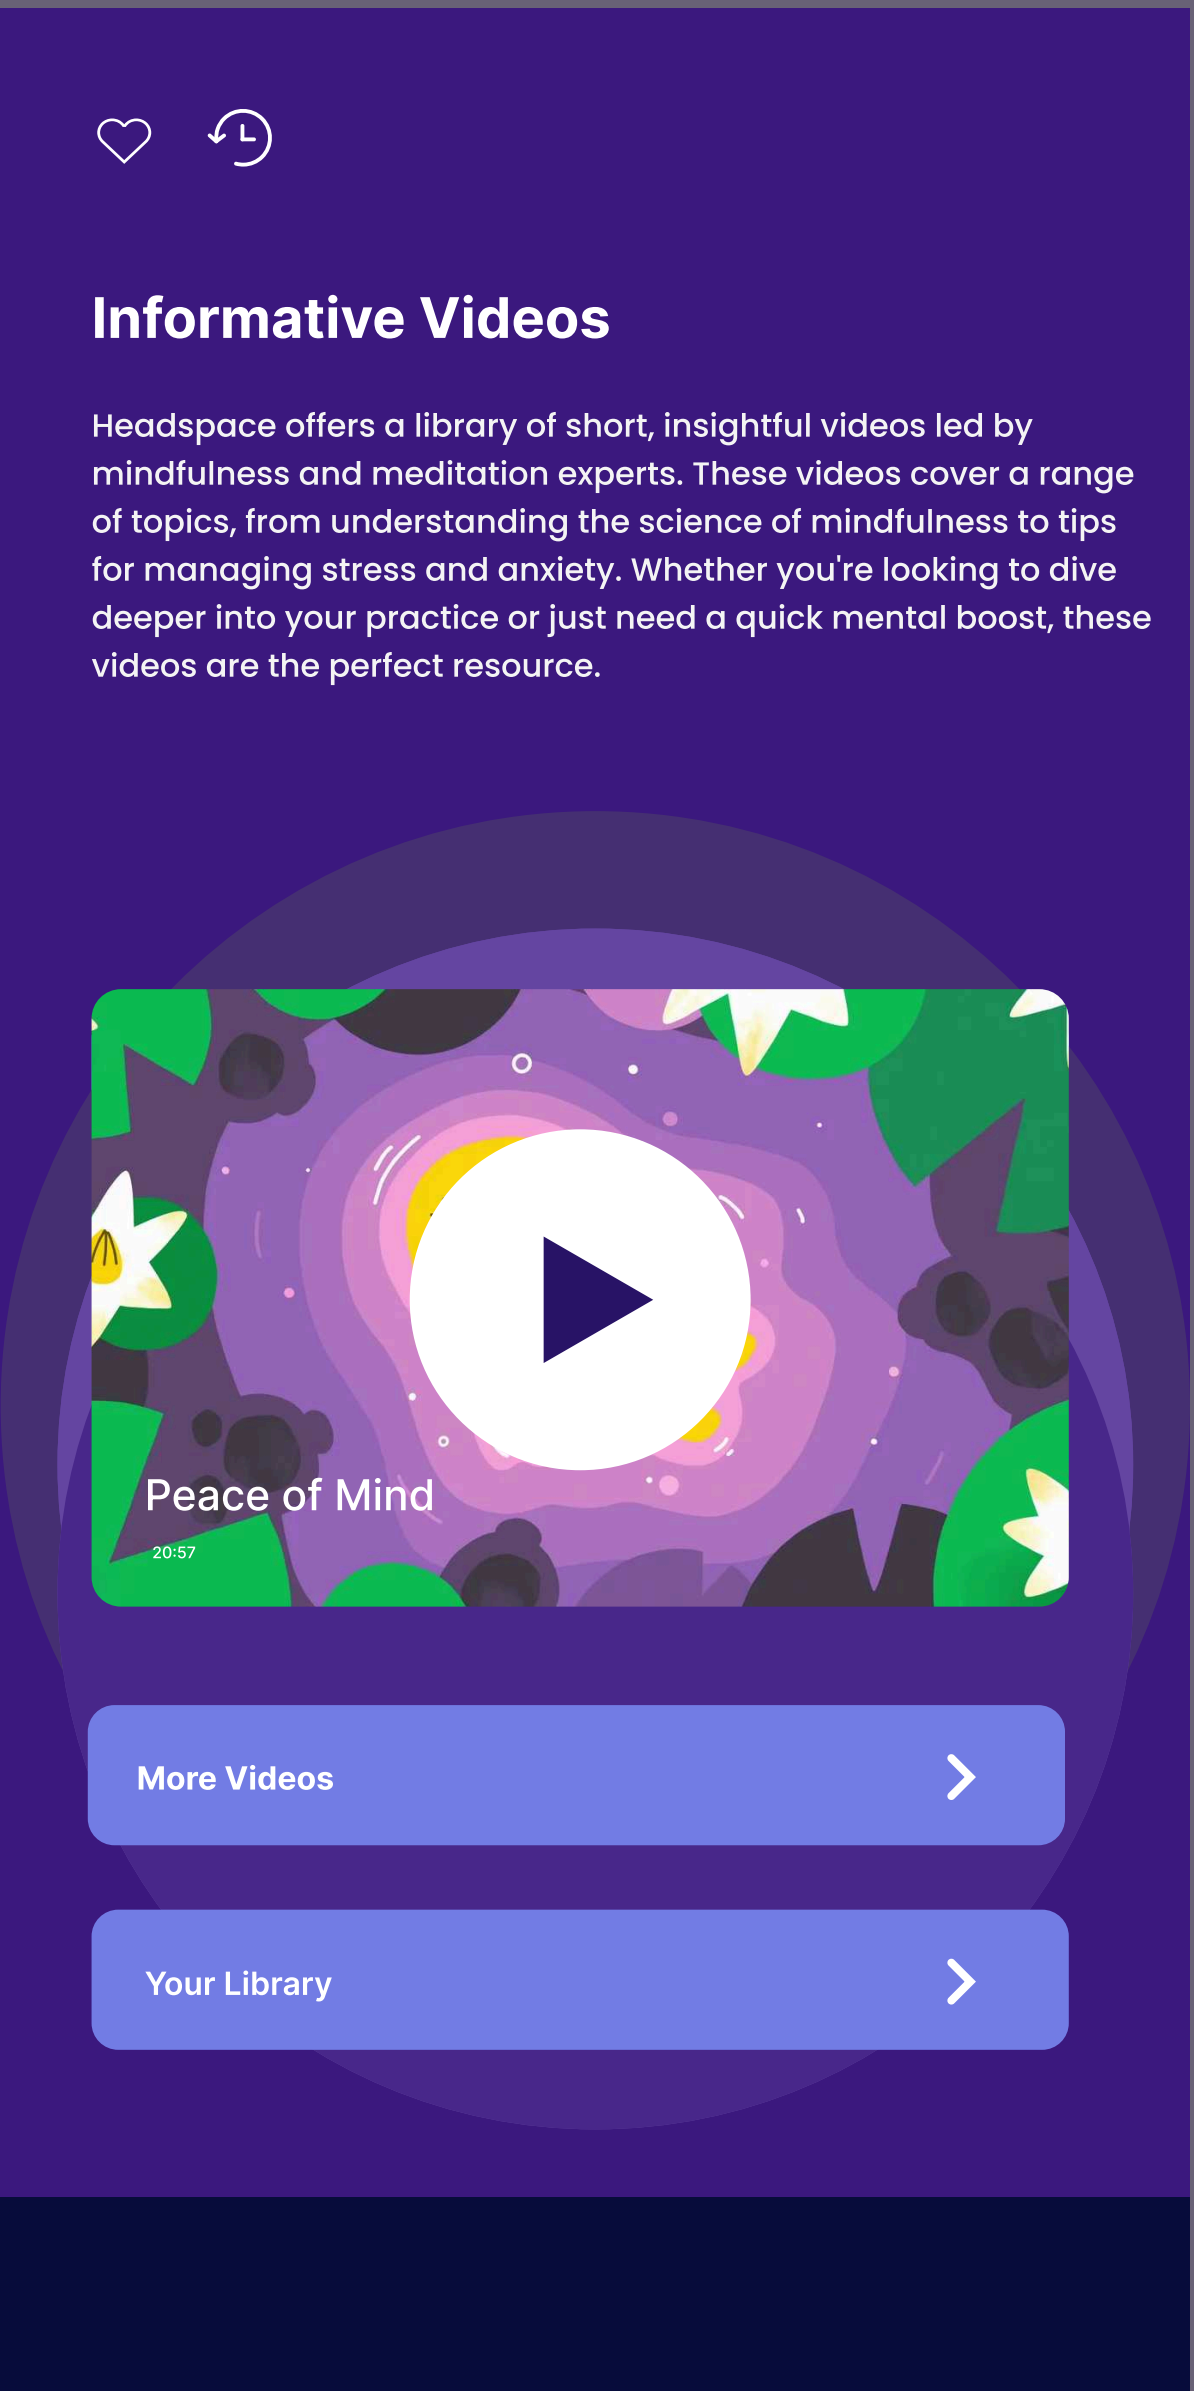

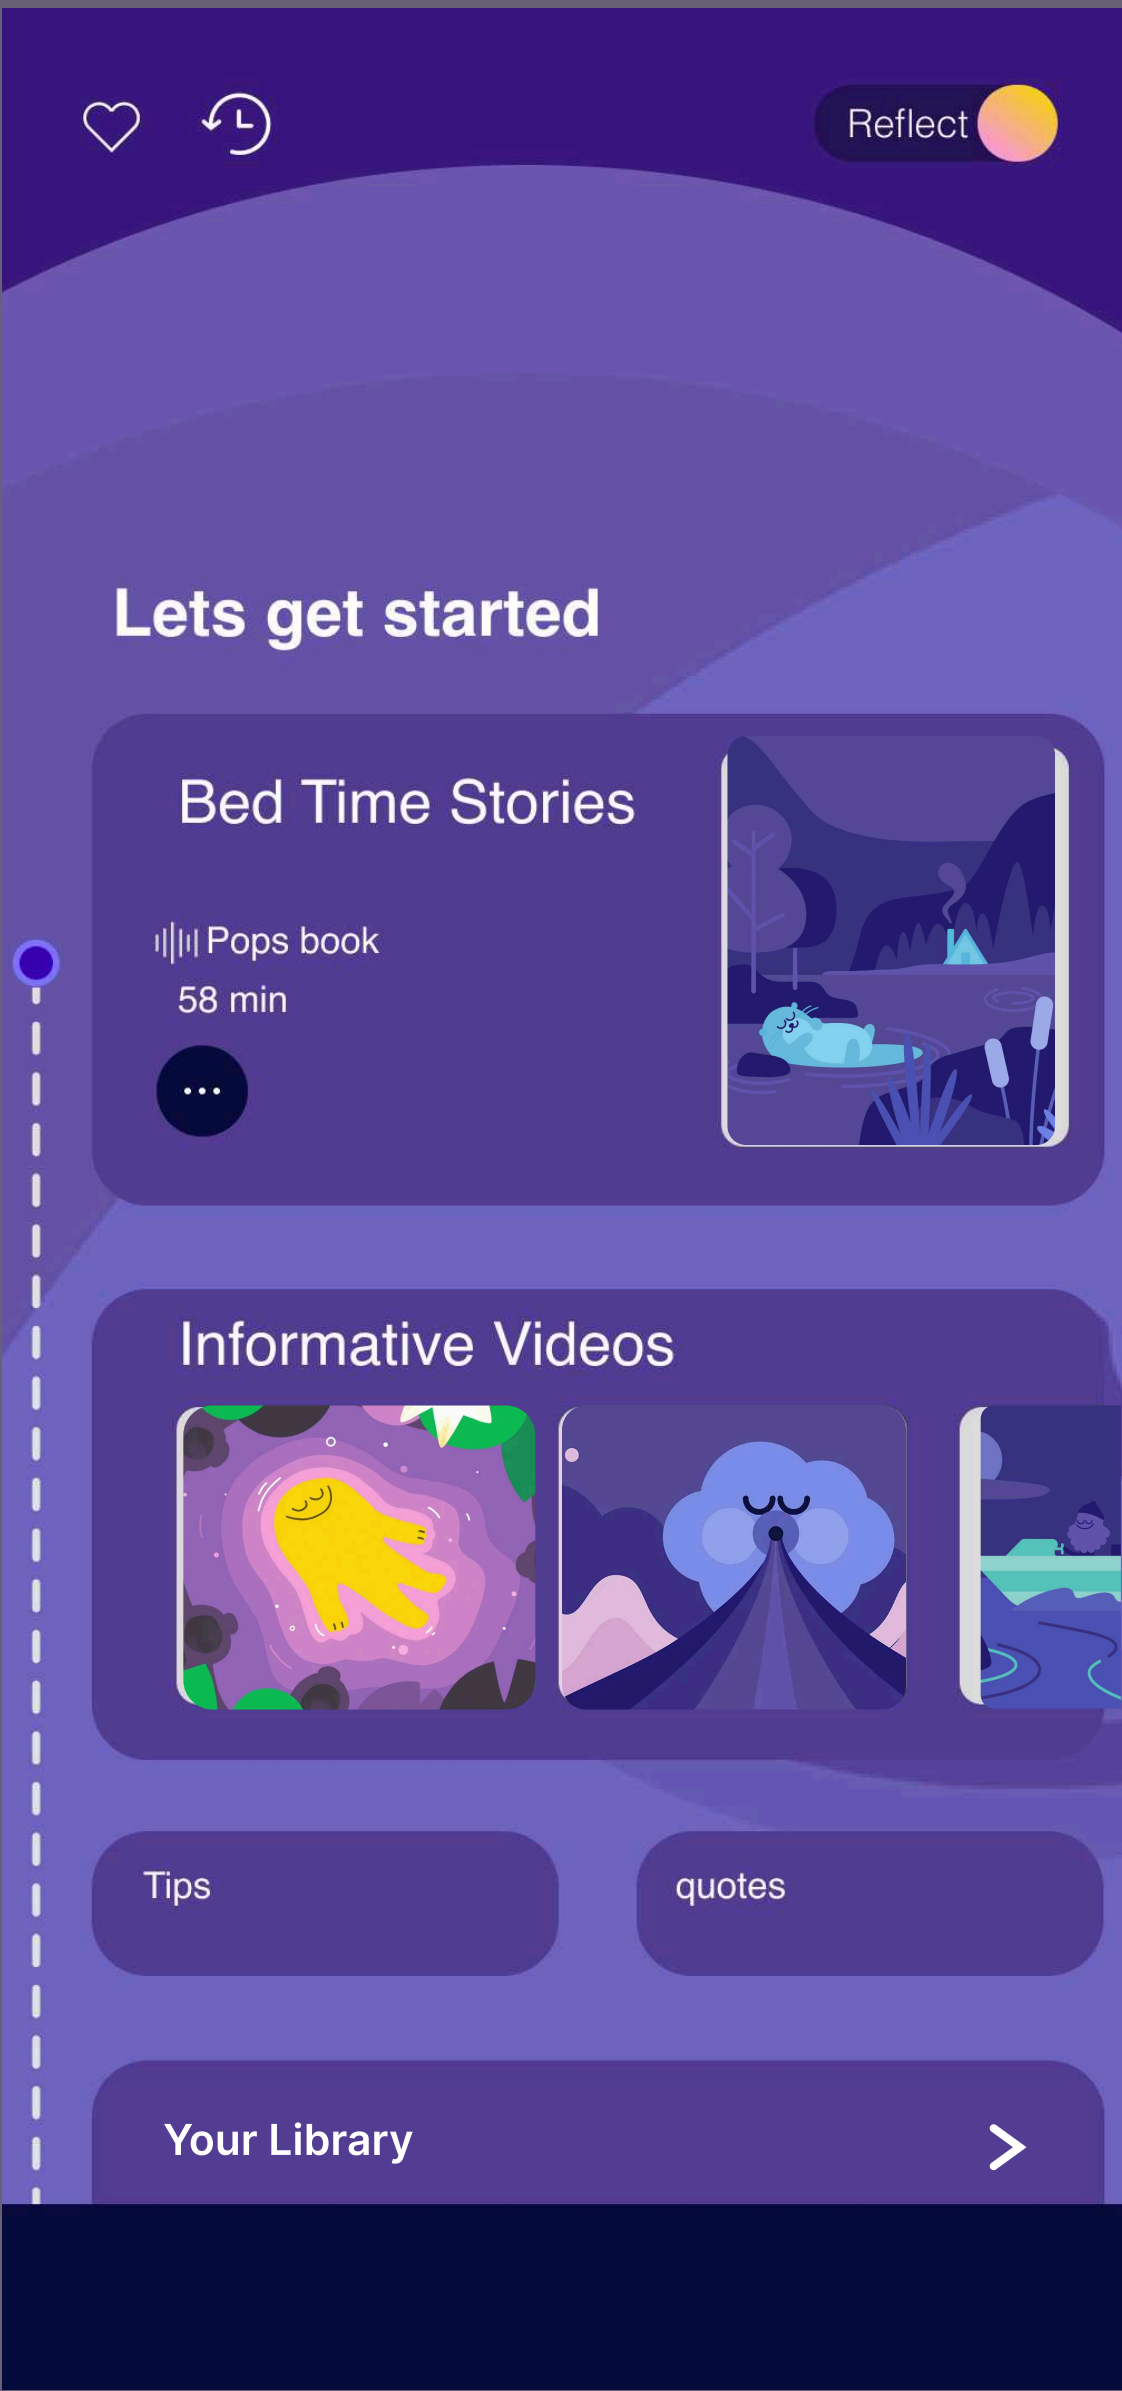

Large text and a dark background make for easy reading before bed

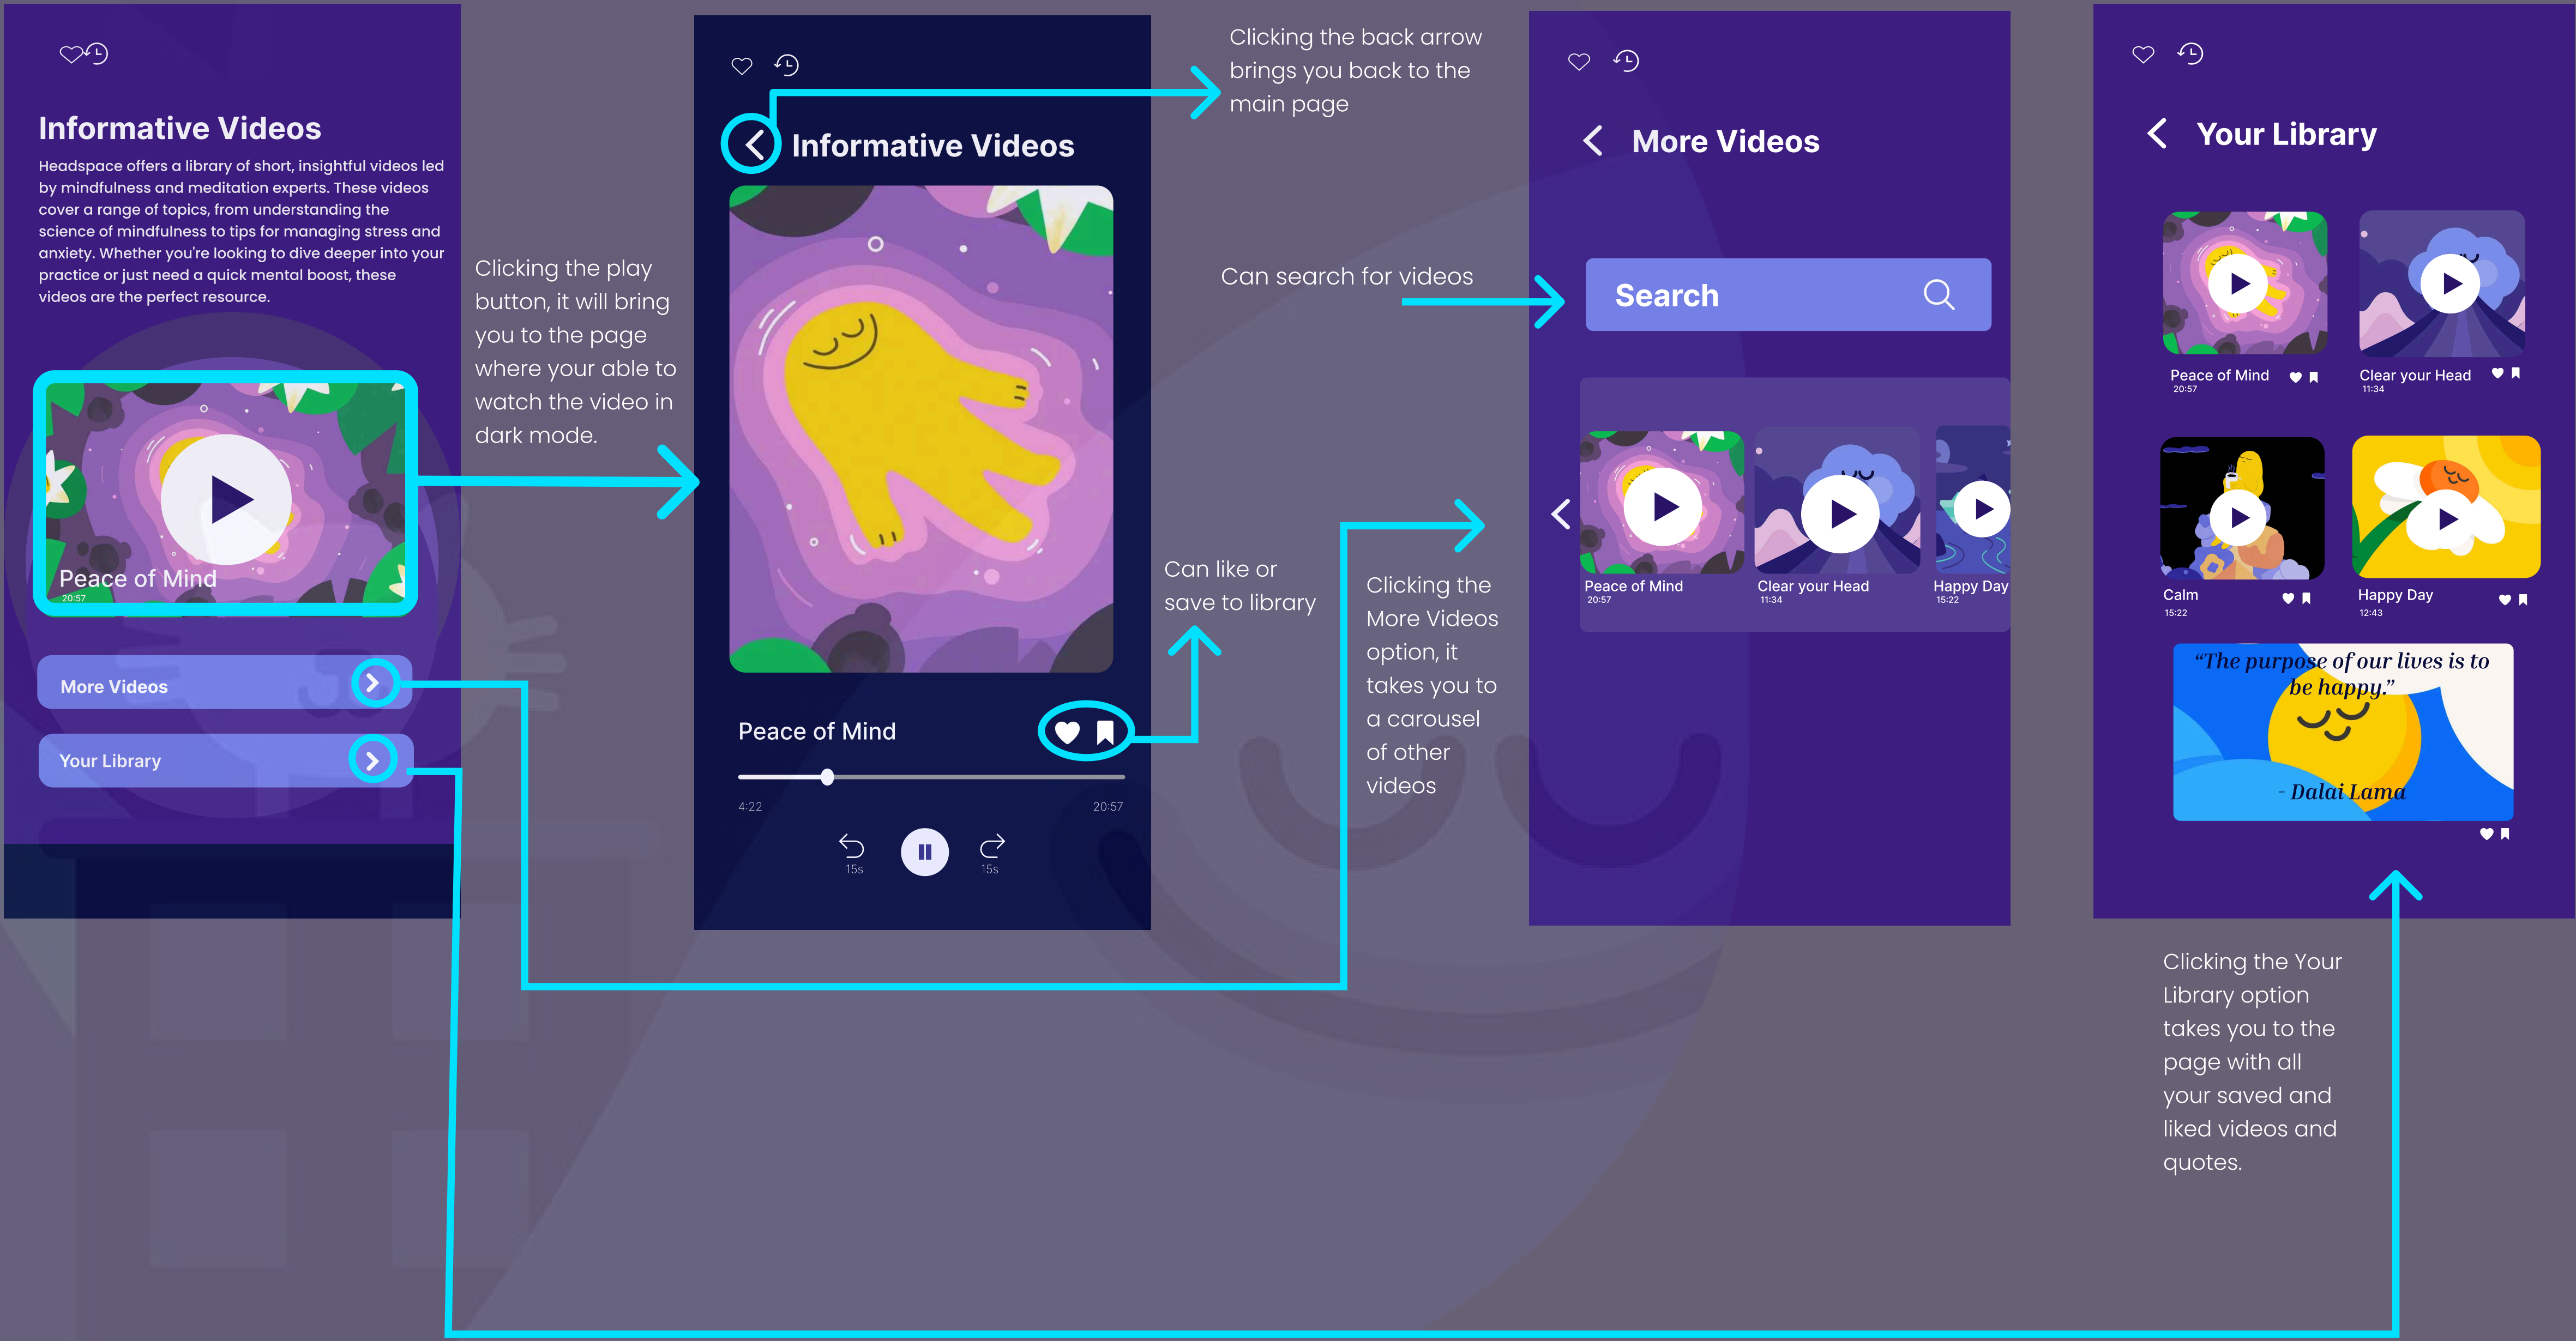

Informative Videos

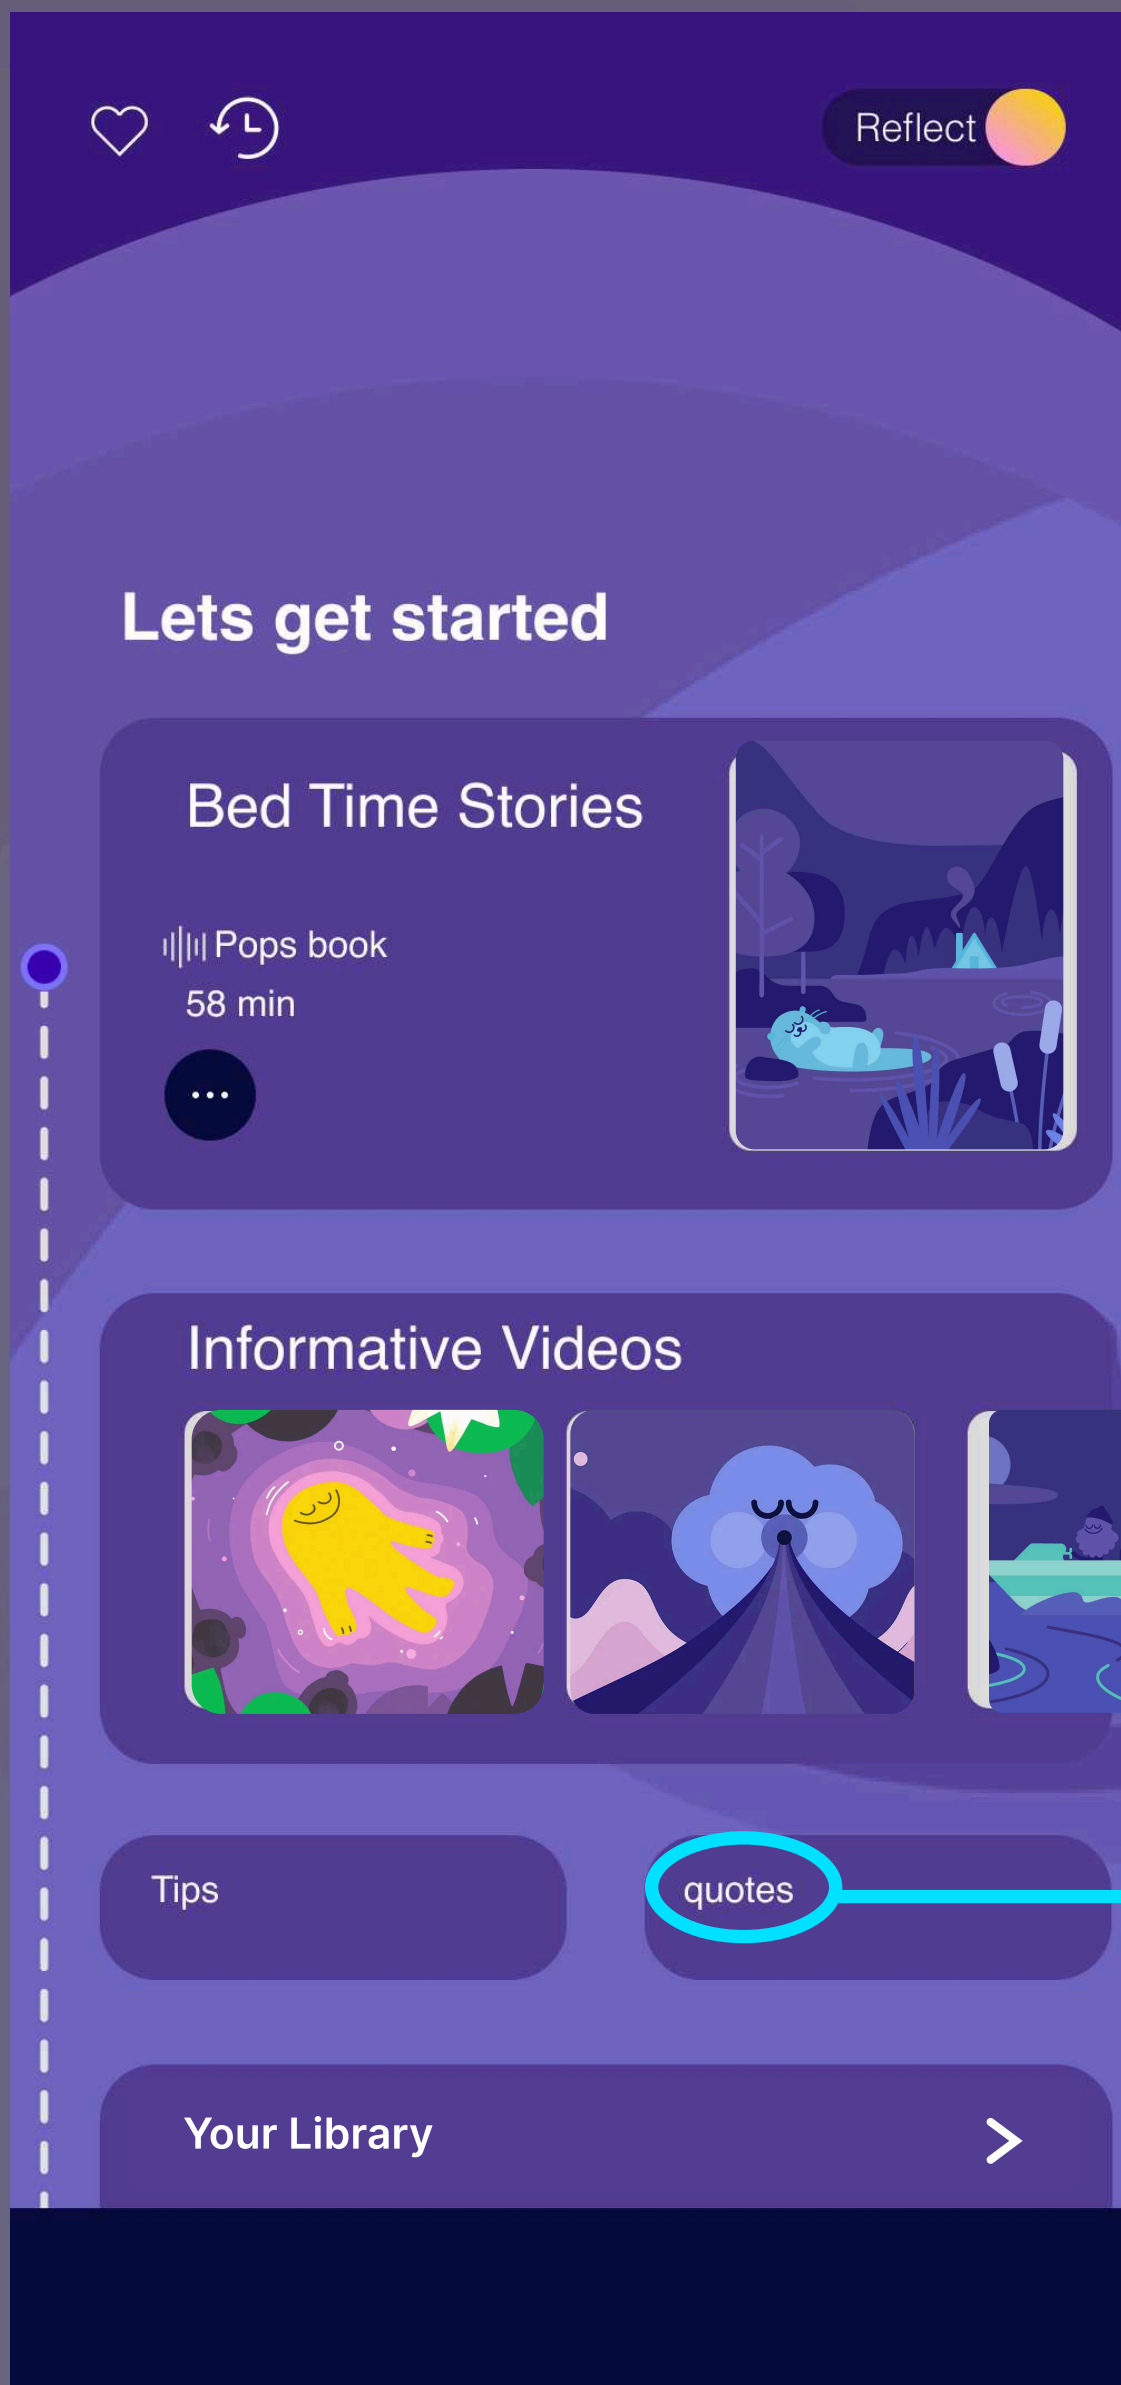

These videos cover a range of topics, from understanding the science of mindfulness to tips for managing stress and anxiety. Whether you're looking to dive deeper into your practice or just need a quick mental boost, these videos are the perfect resource.

By clicking Informative Videos, the user will be brought to the Videos stories section.

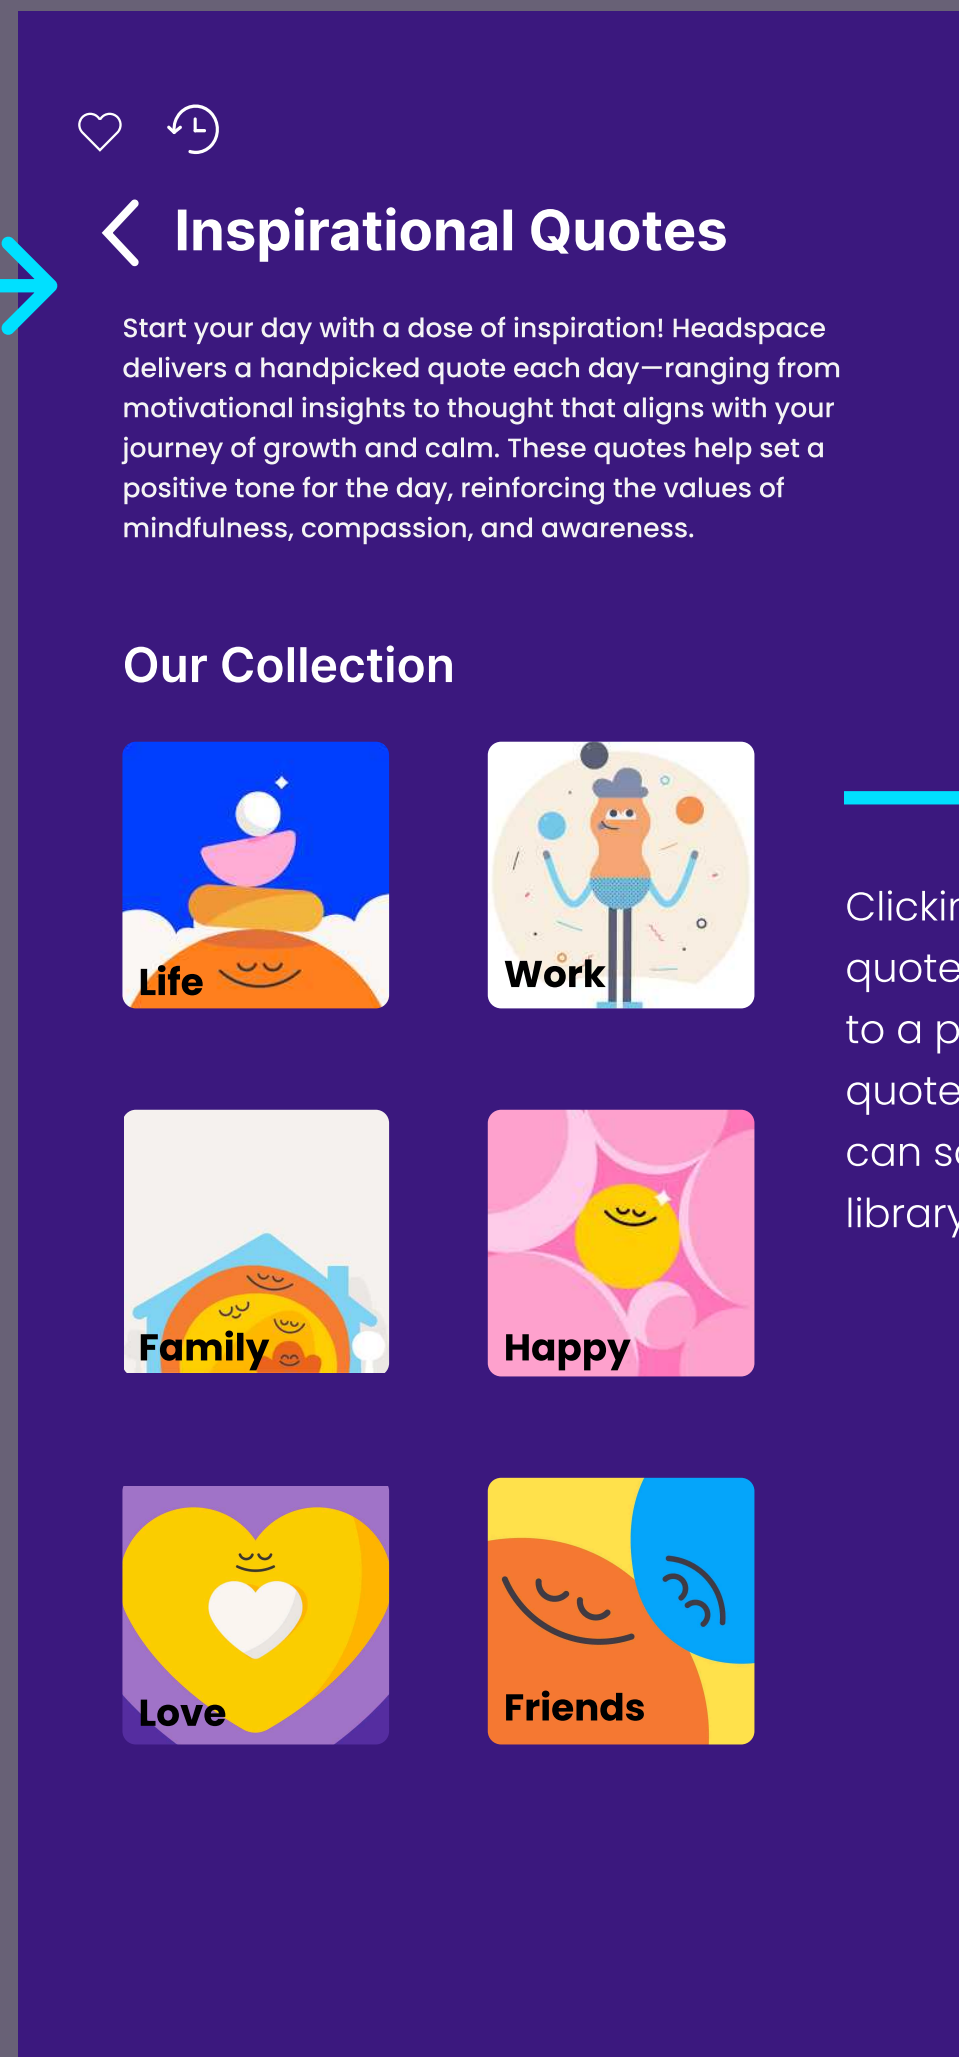

The user can also choose to view either more videos or their library of saved videos

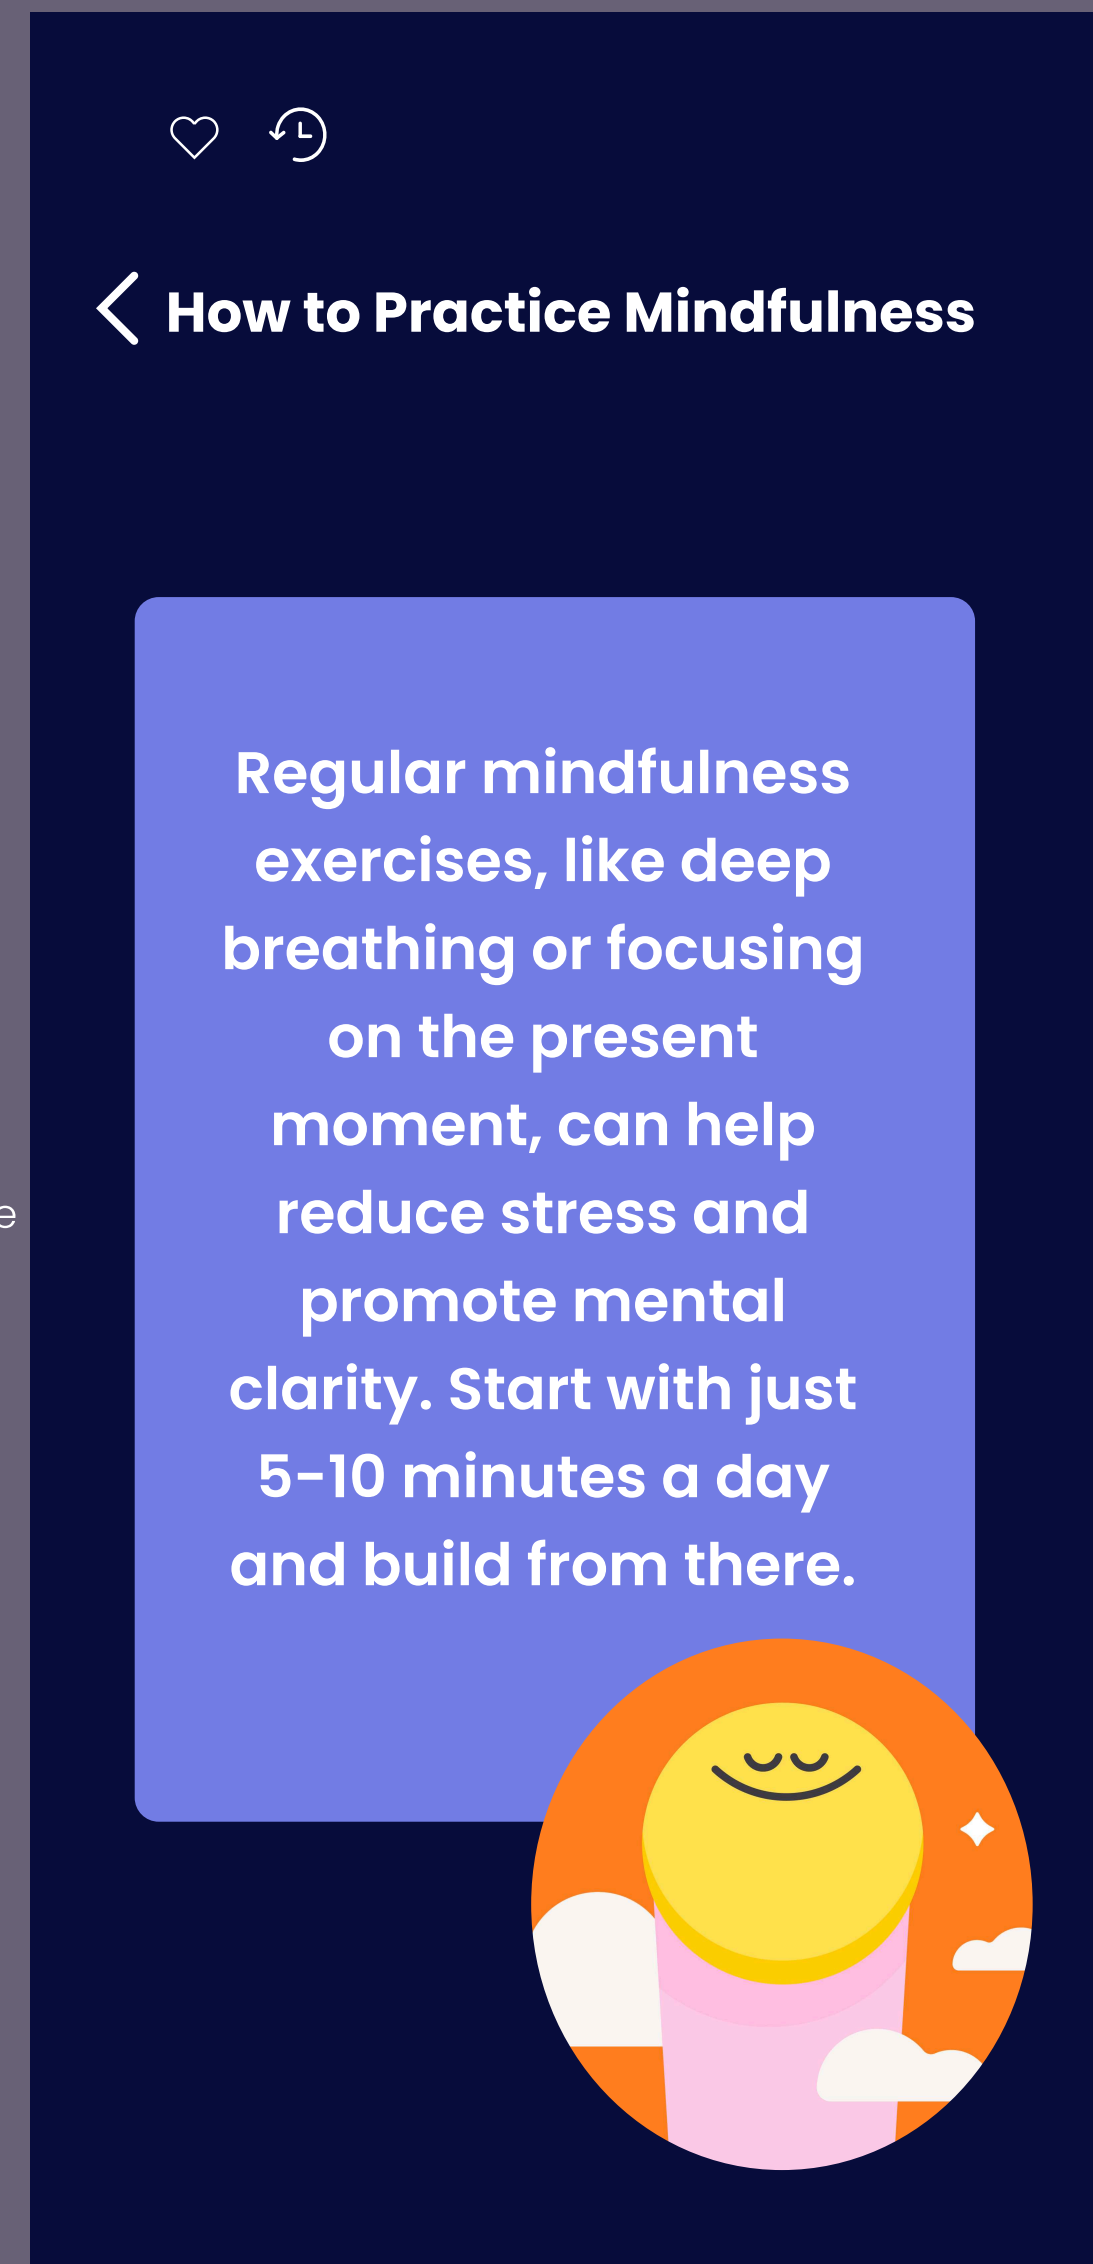

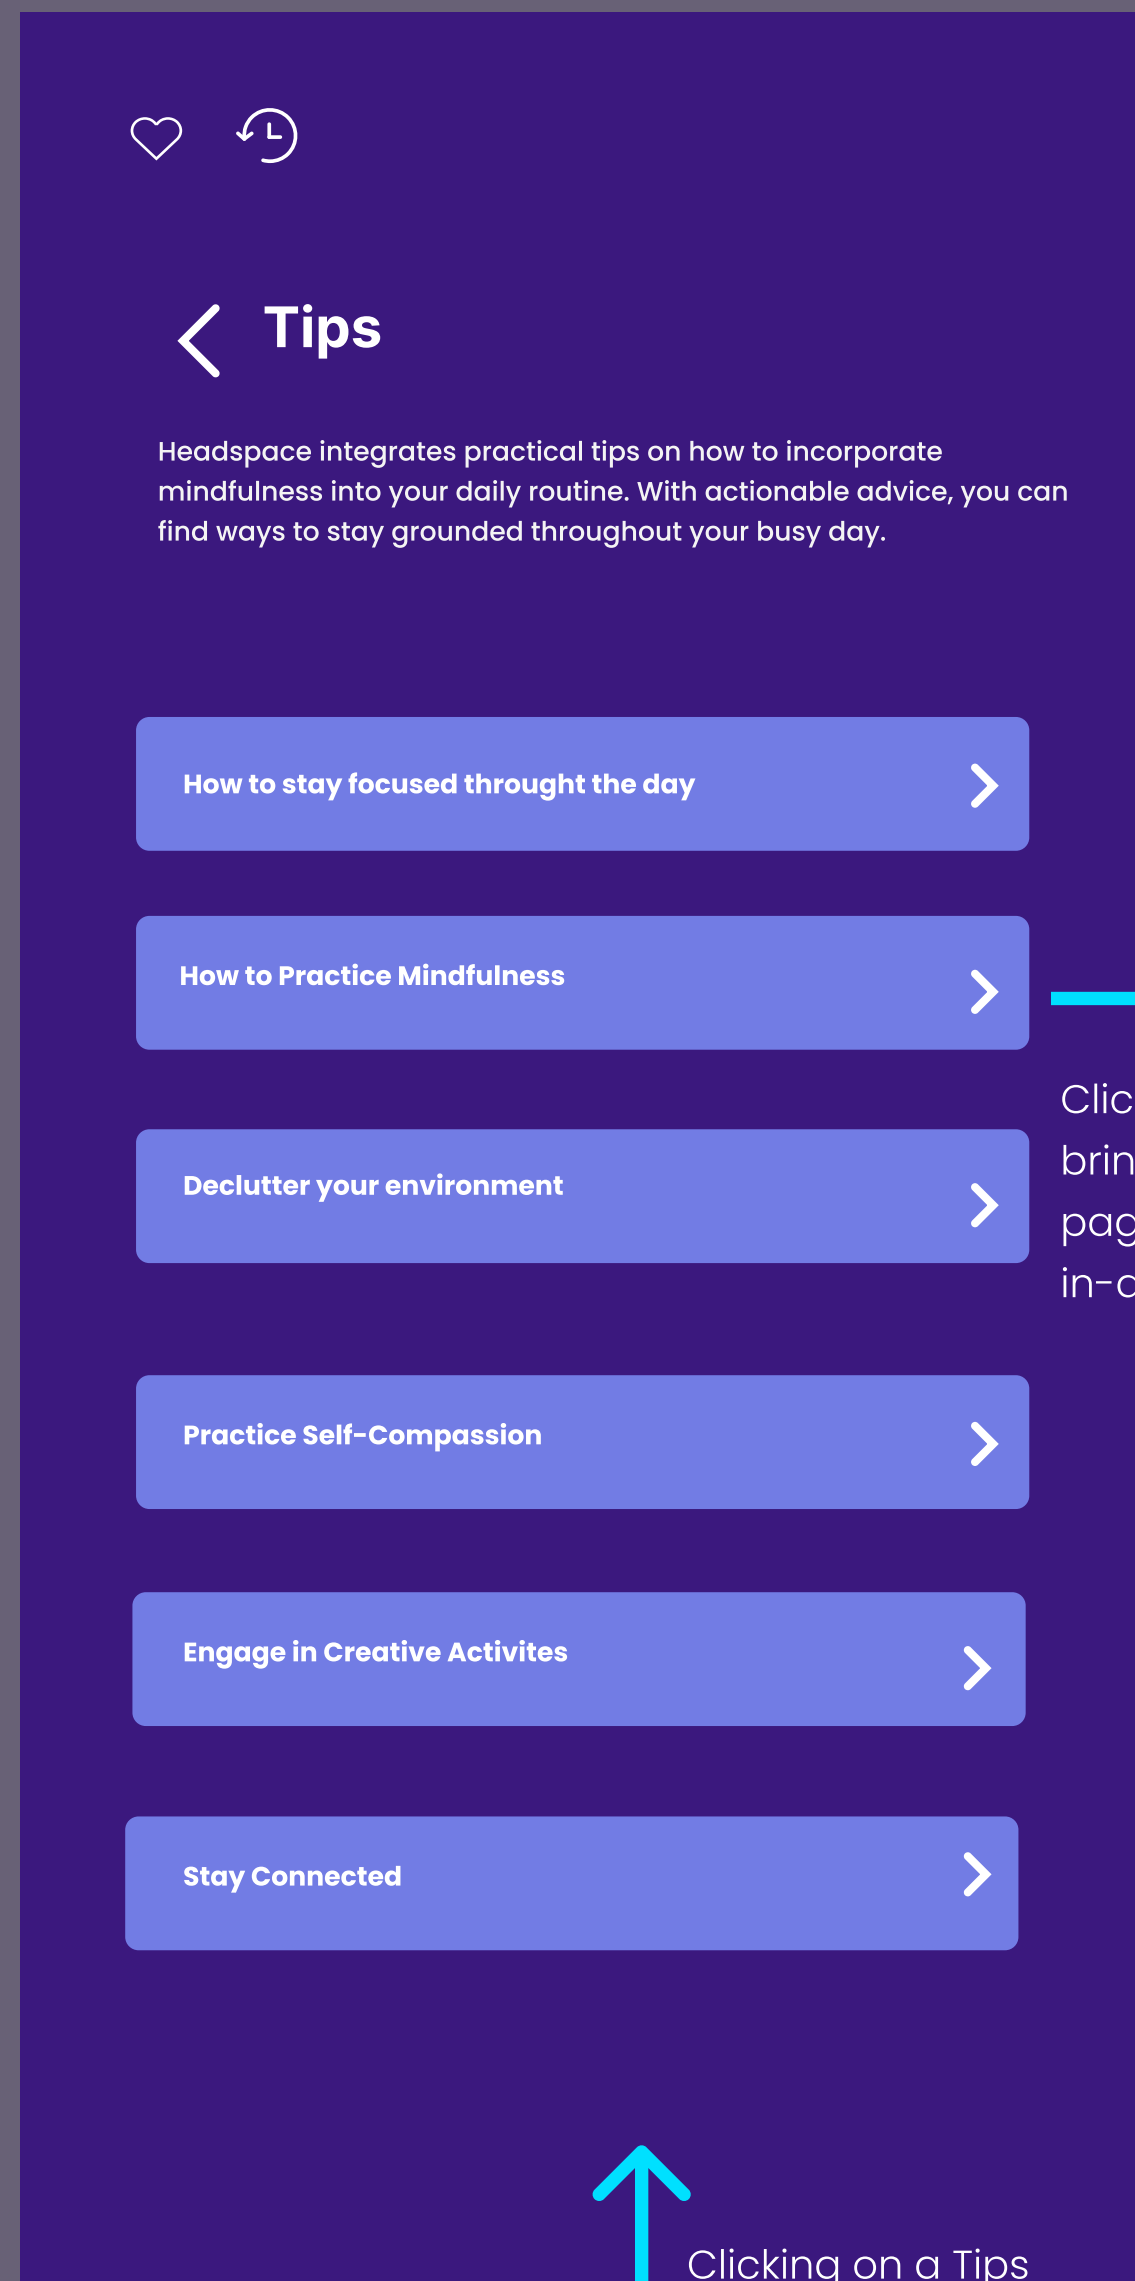

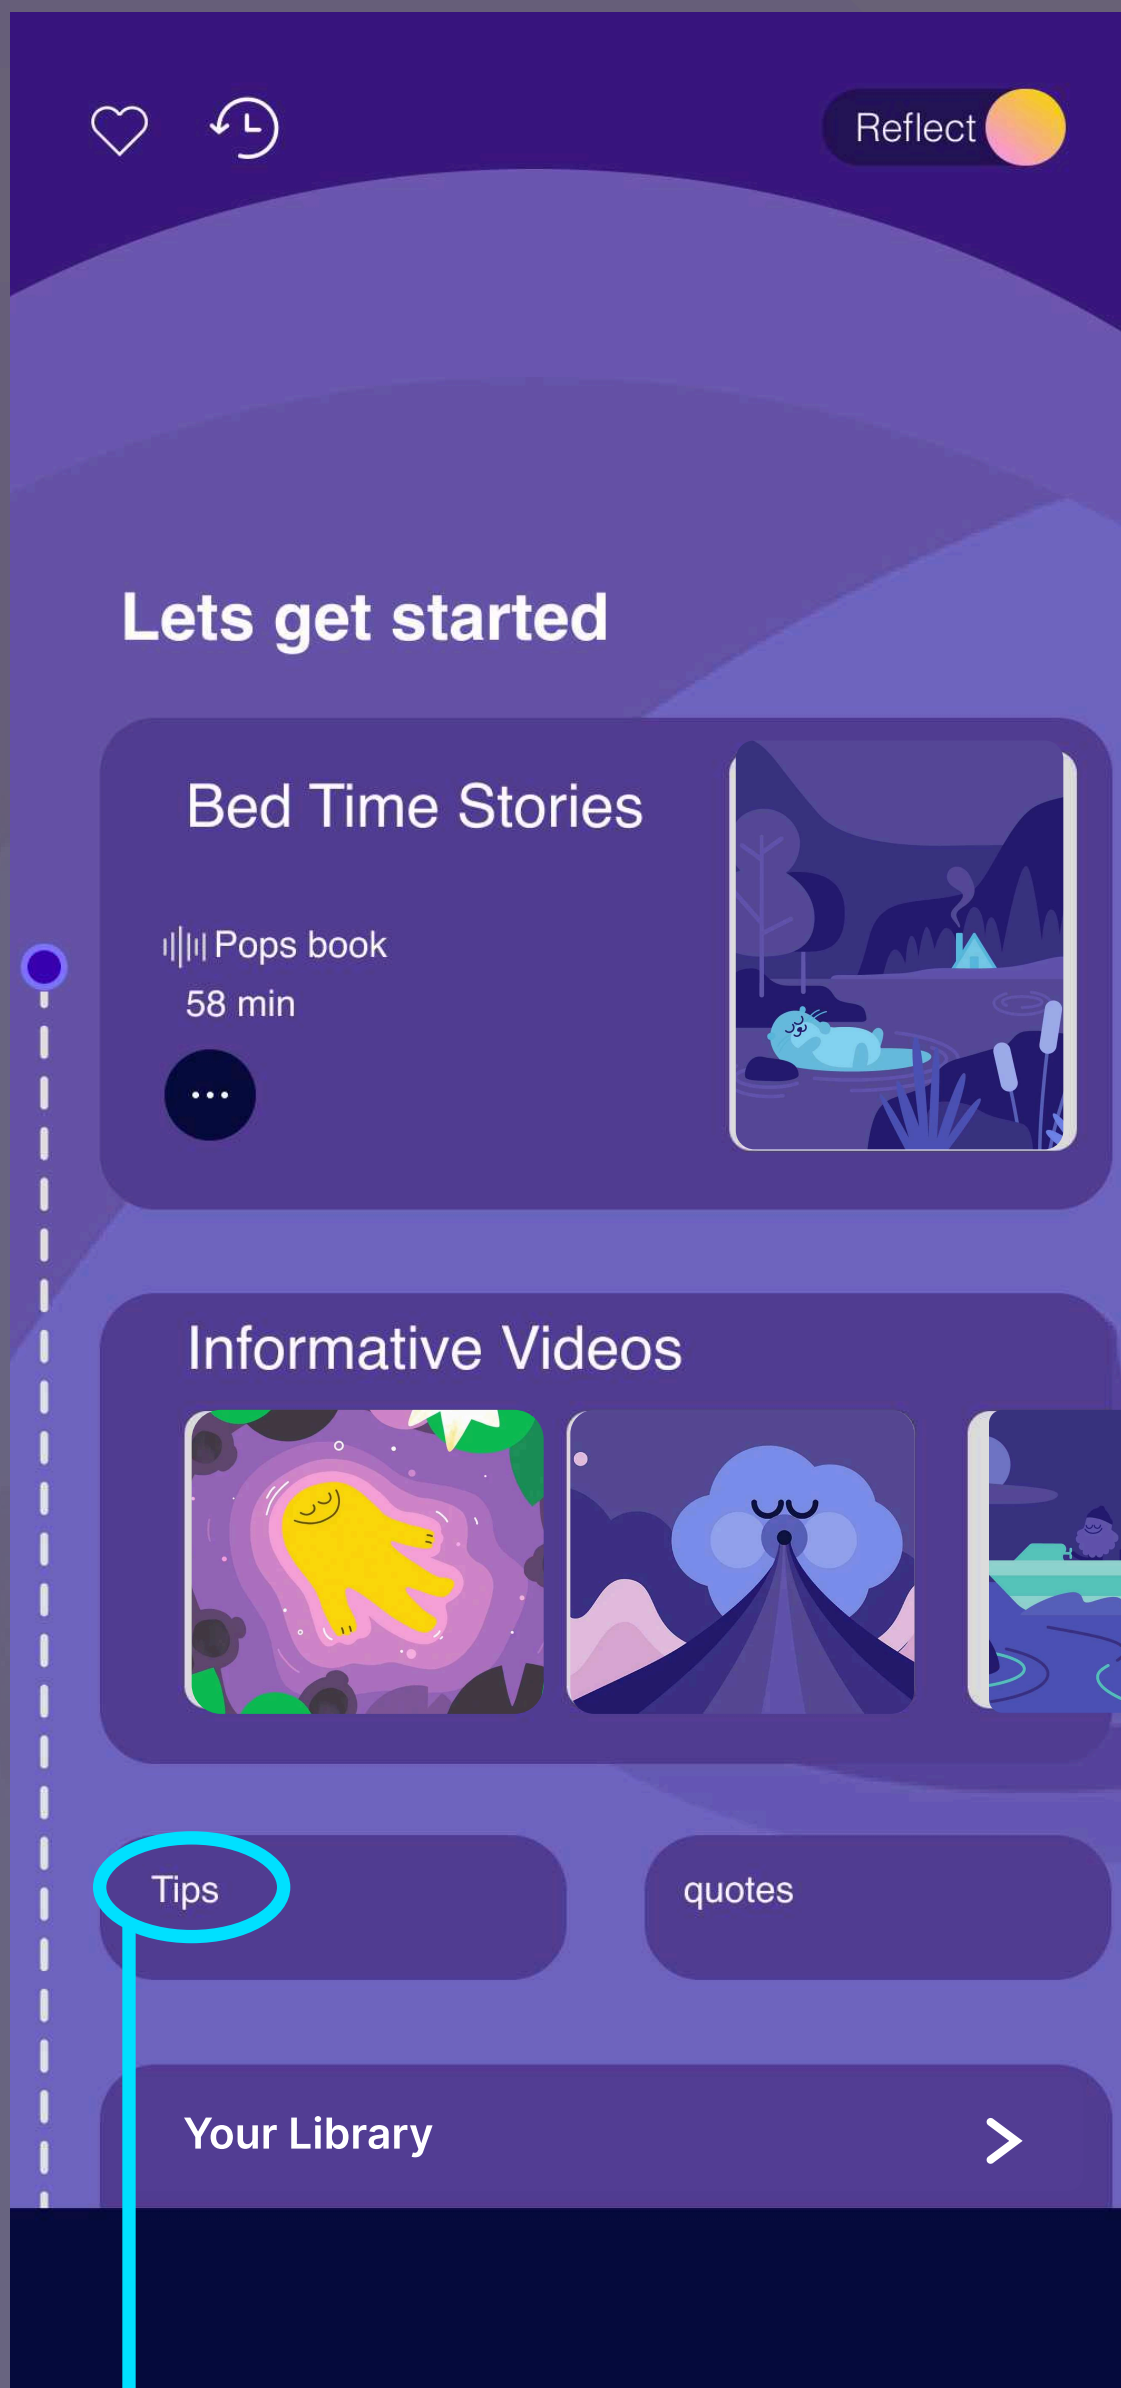

Clicking the quotes option takes you to our collection of daily quotes.

Clicking on a quote brings you to a page of quotes that you can save to your library
